Poucher's Perfumes, Cosmetics and Soaps Feb 04 2021 Cosmetic Science has

developed greatly since the publication of the 8th edition of this textbook in 1974. Although the first part of this volume still consists of chapters about product preparations in alphabetical order, each product category has been revised and updated by a specialist. An outline of the biology, structure and function of skin, hair, teeth and nails and the reasons for the need for cosmetics are given in those dealing with the relevant preparations. Throughout, the word Cosmetics includes toiletries and thus all products which protect, cleanse, adorn, and perfume the human body, and combat body odour and perspiration. The 'f' spelling for the element 'sulfur' and its derivatives has been used following the recommendations of the International Union of Pure and Applied Chemistry (IUPAC) and the decision taken by the Royal Society of Chemistry (RSC) and the British Standards Institute (BSI) to use 'f' instead of 'ph' in all their publications. This stems from the derivation of the use of the 'f' from Latin and its use in England until the 15th century.

How to Create an International Production Formula for Your Homemade Perfume May 14 2024

Homemade perfumes generally lack commercial value, regardless of how wonderful they may be, because their creators fail to record how their perfumes were made. To profit from a perfume, to sell it, to sell the rights to it, or have somebody sell it for you, you must be able to make more of it. To make more of it you need the formula, the record of how the perfume was made: what materials were used and how much of each material was used. While the formula is nothing more than a recipe, a simple piece of paper, it is the key to unlocking your perfume's commercial potential. With the formula in hand you have the ability to make a few dozen bottles more -- or tens of thousands. "How to create an international production formula for your homemade perfume" is a guide to getting you started off on the right foot, correctly documenting everything you do as you are doing it, and then using these notes with some basic mathematics to write a simple, accurate, universal formula for every perfume you make. Writing formulas for your perfumes can change the way you think about them. With these formulas in hand your creations are no longer "here today, gone tomorrow." Now, with your library of formulas, you make your perfumes immortal!

Perfume Jan 18 2022 Object Lessons is a series of short, beautifully designed books about the hidden lives of ordinary things. Our sense of smell is crucial to our survival. We can smell fear, disease, food. Fragrance is also entertainment. We can smell an expensive bottle of perfume at a high-end department store. Perhaps it reminds us of our favorite aunt. A memory in a bottle is a powerful thing. Megan Volpert's *Perfume* carefully balances the artistry with the science of perfume. The science takes us into the neurology of scent receptors, how taste is mostly smell, the biology of illnesses that impact scent sense, and the chemistry of making and copying perfume. The artistry of perfume involves the five scent families and symbolism, subjectivity in perfume preference, perfume marketing strategies, iconic scents and perfumers, why the industry is so secretive, and Volpert's own experiments with making perfume. Object Lessons is published in partnership with an essay series in The Atlantic.

Essence and Alchemy Feb 16 2022 An artisan perfumer reveals a lost art and its

mysterious, sensual history. For centuries, people have taken what seems to be an instinctive pleasure in rubbing scents into their skin. Perfume has helped them to pray, to heal, and to make love. And as long as there has been perfume, there have been perfumers, or rather the priests, shamans, and apothecaries who were their predecessors. Yet, in many ways, perfumery is a lost art, its creative and sensual possibilities eclipsed by the synthetic ingredients of which contemporary perfumes are composed, which have none of the subtlety and complexity of essences derived from natural substances, nor their lush histories. *Essence and Alchemy* resurrects the social and metaphysical legacy that is entwined with the evolution of perfumery, from the dramas of the spice trade to the quests of the alchemists to whom today's perfumers owe a philosophical as well as a practical debt. Mandy Aftel tracks scent through the boudoir and the bath and into the sanctums of worship, offering insights on the relationship of scent to sex, solitude, and the soul. Along the way, she imparts instruction in the art of perfume compositions, complete with recipes, guiding the reader in a process of transformation of materials that continues to follow the alchemical dictum *solve et coagula* (dissolve and combine) and is itself aesthetically and spiritually transforming.
