My Father, the Evangelist Paul Myung-Ha Chung,2008-01-01 A destitute tenant farmer in Pyung Yang Korea gives away his twelve year old son to the nationalist patriot Doh Sahn in 1908 Following the

ardent Patriot thrusts the teenager into the midst of an international struggle raging in the Korean Peninsula Japan proceeds to annex Korea into the Japanese Empire The Patriot fights to thwart the annexation As the Japanese police close in the Patriot and the teenager escape to Tsingtao and Vladivostok the two finally reach New York in 1911 as Korea is no more The teenager struggles alone to survive in America and enters Asbury College in Kentucky Rev Robert Nahm Soo Chung in 1926 returns to his homeland His Evangelistic Crusade Team carries a huge tent of six thousand capacity on a van truck provided by American campgrounds and churches The Team travels even to the remote areas of the Peninsula He preaches to the throngs suffering under the Japanese during their darkest hours Hundreds of thousands of people come to Jesus He suffers torture in the Japanese prison for preaching the gospel and for his close tie with the Patriot You will walk through his tears and triumphs to preach the gospel Paul M Chung PH D is a retired engineering Professor and Dean Emeritus of an engineering college *Publications of the National Bureau of Standards, 1966-1967* United States. National Bureau of Standards,1969 Fundamentals of Physics David Halliday,Oriel Incorporated,2001-07-05 The publication of the first edition of Physics in 1960 launched the modern era of physics textbooks It was a new paradigm then and after 40 years it continues to be the dominant model for all texts The big change in the market has been a shift to a lower level more accessible version of the model Fundamentals of Physics is a good example of this shift In spite of this change there continues to be a demand for the original version and indeed we are seeing a renewed interest in Physics as demographic changes have led to greater numbers of well prepared students entering university Physics is the only book available for academics looking to teach a more demanding course **Handbook on Material and Energy Balance Calculations in Metallurgical Processes** H. Alan Fine,Gordon Geiger,1993 This book approaches the subject of material and energy balances from two directions First it emphasizes the fundamental principles of the conservation of mass and energy and the consequences of these two principles Second it applies the techniques of computational chemistry to materials processing and introduces new software developed by the author especially for material and heat balances The third edition reflects the changes in the professional engineer s practice in the last 30 years reflecting the dramatic shift away from metallurgical engineering and the extractive industry towards materials engineering A large and growing number of recent graduates are employed in such fields as semiconductor processing environmental engineering and the production and processing of advanced and exotic materials for aerospace electronic and structural applications The advance in computing power and software for the desktop computer has significantly changed the way engineers make computations and the biggest change comes from the computational approach used to solve problems The spreadsheet program Excel is used extensively throughout the text as the main computational engine for solving material and energy balance equations and for statistical analysis of data The use of Excel and the introduction of the add in programs enables the study of a range of variables on critical process parameters and emphasis is placed on multi device flowsheets with recycle bypass and purge streams whose

material and heat balance equations were previously too complicated to solve by the normally used hand calculator The Excel based program FlowBal helps the user set up material and heat balance equations for processes with multiple streams and units
