The eight-volume set LNCS 13375 – 13382 constitutes the proceedings of the 22nd International Conference on Computational Science and Its Applications, ICCSA 2022, which was held in Malaga, Spain during July 4 – 7, 2022. The first two volumes contain the proceedings from ICCSA 2022, which are the 57 full and 24 short papers presented in these books were carefully reviewed and selected from 279 submissions. The other six volumes present the workshop proceedings, containing 285 papers out of 815 submissions. These six volumes includes the proceedings of the following workshops: ? Advances in Artificial Intelligence Learning Technologies: Blended Learning, STEM, Computational Thinking and Coding (AAILT 2022); Workshop on Advancements in Applied Machine-learning and Data Analytics (AAMDA 2022); Advances in information Systems and Technologies for Emergency management, risk assessment and mitigation based on the Resilience (ASTER 2022); Advances in Web Based Learning (AWBL 2022); Blockchain and Distributed Ledgers: Technologies and Applications (BDLTA 2022); Bio and Neuro inspired Computing and Applications (BIONCA 2022); Configurational Analysis For Cities (CA Cities 2022); Computational and Applied Mathematics (CAM 2022), Computational and Applied Statistics (CAS 2022); Computational Mathematics, Statistics and Information Management (CMSIM); Computational Optimization and Applications (COA 2022); Computational Astrochemistry (CompAstro 2022); Computational methods for porous geomaterials (CompPor 2022); Computational Approaches for Smart, Conscious Cities (CASCC 2022); Cities, Technologies and Planning (CTP 2022); Digital Sustainability and Circular Economy (DiSCE 2022); Econometrics and Multidimensional Evaluation in Urban Environment (EMEUE 2022); Ethical AI applications for a human-centered cyber society (EthicAI 2022); Future Computing System Technologies and Applications (FiSTA 2022); Geographical Computing and Remote Sensing for Archaeology (GCRSArcheo 2022); Geodesign in Decision Making: meta planning and collaborative design for sustainable and inclusive development (GDM 2022); Geomatics in Agriculture and Forestry: new advances and perspectives (GeoForAgr 2022); Geographical Analysis, Urban Modeling, Spatial Statistics (Geog-An-Mod 2022); Geomatics for Resource Monitoring and Management (GRMM 2022); International Workshop on Information and Knowledge in the Internet of Things (IKIT 2022); 13th International Symposium on Software Quality (ISSQ 2022); Land Use monitoring for Sustainability (LUMS 2022); Machine Learning for Space and Earth Observation Data (MALSEOD 2022); Building multi-dimensional models for assessing complex environmental systems (MES 2022); MOdels and indicators for assessing and measuring the urban settlement deVELOPMENT in the view of ZERO net land take by 2050 (MOVEto0 2022); Modelling Post-Covid cities (MPCC 2022); Ecosystem Services: nature’s contribution to people in practice. Assessment frameworks, models, mapping, and implications (NC2P 2022); New Mobility Choices For Sustainable and Alternative Scenarios (NEMOB 2022); 2nd Workshop on Privacy in the Cloud/Edge/IoT World (PCEIoT 2022); Psycho-Social Analysis of Sustainable Mobility in The Pre- and Post-Pandemic Phase (PSYCHE 2022); Processes, methods and tools towards RESilient cities and cultural heritage prone to SOD and ROD disasters (RES 2022); Scientific Computing Infrastructure (SCI 2022); Socio-Economic and Environmental Models for Land Use Management (SEMLUM 2022); 14th International Symposium on Software Engineering Processes and Applications (SEPA 2022); Ports of the future - smartness and sustainability (SmartPorts 2022); Smart Tourism (SmartTourism 2022); Sustainability Performance Assessment: models, approaches and applications toward interdisciplinary and integrated solutions (SPA 2022); Specifics of smart cities development in Europe (SPEED 2022); Smart and Sustainable Island Communities (SSIC 2022); Theoretical and Computational Chemistry and its Applications (TCCMA 2022); Transport Infrastructures for Smart Cities (TISC 2022); 14th International Workshop on Tools and Techniques in Software Development Process (TTSDP 2022); International Workshop on Urban Form Studies (UForm 2022); Urban Regeneration: Innovative Tools and Evaluation Model (URITEM 2022); International Workshop on Urban Space and Mobilities (USAM 2022); Virtual and Augmented Reality and Applications (VRA 2022); Advanced and Computational Methods for Earth Science Applications (WACM4ES 2022); Advanced Mathematics and Computing Methods in Complex Computational Systems (WAMCM 2022). Due to the increased use of composite materials in aerospace, energy, automobile, and civil infrastructure applications, concern over composite material failures has grown, creating a need for smart composite structures that are able to self-diagnose and self-heal. Structural Health Monitoring Technologies and Next-Generation Smart Composite Structures provides valuable insight into cutting-edge advances in SHM, smart materials, and smart structures. Comprised of chapters authored by leading researchers in their respective fields, this edited book showcases exciting developments in general embedded sensor technologies, general sensor technologies, sensor response interrogation and data communication, damage matrix formulation, damage mechanics and analysis, smart materials and structures, and SHM in aerospace applications. Each chapter makes a significant contribution to the prevention of structural failures by describing methods that increase safety and reduce maintenance costs in a variety of SHM applications. Portuguese Encounters with Sri Lanka and the Maldives: Translated Texts from the Age of the Discoveries is designed to provide access to translations of 16th- and 17th-century documents which illustrate various aspects of this encounter, combining texts from indigenous sources with those from the Portuguese histories and archives. These documents contribute to the growing understanding that different groups of European colonizers - missionaries, traders and soldiers - had conflicting motivations and objectives. Scholars have also begun to emphasize that the colonized were not mere victims but had their own agendas and that they occasionally successfully manipulated colonial powers. The texts in this volume help to substantiate these assertions while also illustrating the changing nature of the interactions. The present volume contains chapters covering the Portuguese arrival in Sri Lanka and their first encounters with the island and its peoples, their subsequent relations with Kandy and Jaffna, and a final chapter on Portuguese relations with the Maldivian Islands. A historical introduction provides the context in which the documents can be read and a select bibliography indicates the most recent and authoritative secondary works on the subject The Journal series consists of reprints of research papers published by the members of the faculty in various periodicals. Geography science aims to observe the dynamics in describing earth's surface as a place and space for humans to carry out their lives, starting from simple identification using recording and sketching models, then utilizing tools such as maps, satellite imagery, statistics and Geographic Information Systems (GIS). In the development of geography science, it is appropriate to explain phenomena of the earth in the present context along with the process of developing science and technology using suitable and effective methods. Physical geography is the branch of natural science that deals with the study of processes and patterns in the natural environment such as the atmosphere, hydrosphere, lithosphere and biosphere. This book covers the methodology of the study for all aspects of physical geography, biosphere, hydrosphere, lithosphere, and atmosphere. A comprehensive geography textbook consists of a detailed research methodology for physical geography research including a few selected case studies in Asia. The uniqueness of this book is due to the contribution of several professors and subject experts from South East and East Asia with special particular reference to cases studies from a particular region. This book covered selected methodological approaches for hydrology, climatology and geomorphology including the discovery of the best method for exploring and assessing mysterious physical phenomena using a diversity of methodologies. This book explains the principal concept, basic method, optional method, detailed description of each method, and the advantages and disadvantages of the various methods. The technique of data selection, data acquisition, method of analysis, data interpretation and data analysis techniques with a specific focus on deterministic modeling, geography techniques, geospatial modeling with Geographic Information System (GIS), Artificial Intelligence (AI), Analytic Hierarchy Process (AHP), and Automated machine techniques and combination of statistical analysis. This book attempts to explore different approaches, methodological possibilities and challenges in conducting geographical research in physical geography. New digital geographic data sources and GIS applications can help researchers to receive clearer concepts and obtain better measurements of the relevant attributes changes in the physical environment. Opportunity to critically examine the conceptualization and identification of the field in geographical research and how digital media has not only expanded the scope of what constitutes the field but has redefined the field in itself as well as the practices of observing, knowing, and analyzing the real world. This three-book set constitutes the refereed proceedings of the Second International Conference on Recent Trends in Image Processing and Pattern Recognition (RTIP2R) 2018, held in Solapur, India, in December 2018. The 173 revised full papers presented were carefully reviewed and selected from 374 submissions. The papers are organized in topical sections in the tree volumes. Part I: computer vision and pattern recognition; machine learning and applications; and image processing. Part II: healthcare and medical imaging; biometrics and applications. Part III: document image analysis; image analysis in agriculture; and data mining, information retrieval and applications. "No matter where you are in the world, you are at home when tea is served." -- Earlene Grey Tea has its very own significance in every consumer’s life. However, above all, tea represents enjoyment, the ritual of preparation and the appreciation of the moment. In this sense, tea creates hospitality and peace, tea brings people together to talk and to make time for each other. Tea needs time, tea spends time. In this pioneering book featuring hospitality embraced by tea culture, you will read of fascinating tea ceremonies, impressive tea china and comfortable tea houses as well as different national and regional tea-related habits in European countries. Nearly 50 contributions provide unique insights -- Samowars in the East, Dresmer blue porcelain in Germany, tulip glasses in Turkey and around, silver tea pots in Great Britain and, many more. The first tea plantations in Portugal or Georgia are discussed, as well as tea in arts, tea events, tea flavoured signature products, tea pairing and, impulses for entrepreneurship and education. Tea Cultures of Europe is written for tea lovers, educators and students, as well as industry practitioners (tea sommeliers, tea masters) and entrepreneurs. This publication is part of a series of six country reports on technical and vocational education and training (TVET) and higher education in Bangladesh, Nepal, and Sri Lanka. Each report presents current arrangements and initiatives in the respective country’s skills development strategies. These are complemented by critical analyses to determine key issues, challenges, and opportunities for innovative strategies toward global competitiveness, increased productivity, and inclusive growth. The emphasis is to make skills training more relevant, efficient, and responsive to emerging domestic and international labor markets. The reports were finalized in 2013 under the Australian AID-supported Phase 1 of Subproject 11 (Innovative Strategies for Accelerated Human Resource Development) of Regional Technical Assistance 6337 (Development Partnership Program for South Asia). This book is empirically grounded on Ignasio Malizani Jimu’s firsthand experience of governance and quality control in Malawi higher education. Informed by the liberalisation of higher education and the quality turn in Africa, this book reflects on higher education policy, how higher education institutions manage their core business processes, the dynamic character of their stakeholdership and governance and management arrangements that are involved. Its primary purpose is to contribute to the discourse on increasing access to, regulation of and more importantly the pursuit of quality culture in higher education. Key questions, insights and directions have been packaged in eight chapters, some of which are: the purpose and inclusion in higher education, stakeholdership, context and quality culture in private higher education institutions, peer reviews as quality control mechanism, quality rating of institutions and setting and operating quality assurance units. It is intended for higher education managers, policy makers and students of higher education management. The Assessment of Development Results (ADR) is an independent evaluation by the Evaluation Office (EO) which systematically assesses progress of key interventions by the United Nations Development Programme (UNDP) in countries receiving its support. The ADR in Sri Lanka is the seventy-fourth assessment conducted by the EO and the twenty-first conducted within the Asia-Pacific region, and the first such evaluation conducted in Sri Lanka. This ADR was conducted jointly with the Government of Sri Lanka with a view to strengthening the ownership of the evaluation results by national partners, and thereby its credibility and utility. For this purpose, a Joint Management Group (JMG) was set up with participation from both the Government and the EO. The JMG provided oversight to the evaluation which was conducted by an independent national team and guided by a professional evaluation manager from the EO. Through this mechanism, both the Government and the EO ensured

that established norms and standards for evaluation, such as independence, impartiality and rigorous methodology, were followed. We believe that this joint approach has helped the evaluation team collect inputs from a broad range of national partners and resulted in a report that is soundly rooted in the national reality making it useful for national partners and UNDP in designing their future engagement with a better sense of UNDP's strategic direction. The evaluation found that UNDP had significantly helped the country overcome major challenges that emerged during the last decade. Today, Sri Lanka is looking at a new development path as a middle income country, and UNDP has been seeking to reposition itself to maintain its relevance in the new context. We therefore believe that the evaluation was very timely. Having provided the opportunity to take stock of what worked, and what did not, in the past decade, the evaluation proposes the most useful role UNDP can play in the future. Written by authorities who led the team involved in accident response and damage assessment Focused on identifying plausible root causes, pitfalls in accident response, and weaknesses in current regulatory and management protocols Delivers in-depth understanding of a unique marine chemical accidental to help formulate necessary future policies and regulations related to such disasters Includes many case studies related to the accident illustrated with photos and figures that are true evidence of the disaster, the response, and the mitigation Explain and discusses key research findings in a streamlined manner understandable for a wide audience This book articulates an understanding of what is meant by the term social justice from a global perspective, drawing upon examples of practice from across a range of English for academic purposes (EAP) and English language teaching (ELT) higher education contexts. Presently, within western higher educational systems, there is a drive for greater integration of approaches that lend themselves to social justice. However, questions still remain about what that means in practice. This book seeks to answer that not by telling but by showing. It presents a series of chapters that act as vignettes into a diverse set of classrooms, contexts and countries, offering examples of how and where an epistemology of social justice has been put into practice in teaching and learning situations. Such situations range from cross-continental higher educational partnerships between east and west to instances of EAP practitioners' work with refugees from North Africa and the Middle East. These examples are threaded together by the common goal of understanding what it is that defines an enactment of social justice and what the shared denominators are across these contexts. Through looking at these various examples, the authors produce a set of codes and themes that are common to practice across contexts and discuss how these might help inform practice in other areas of language education, higher education and educational development work in general.

Fundamentals of Academic Writing, by Linda Butler, is the newest addition to the Longman Academic Writing Series. Fundamentals provides beginning-level students with the essential tools they need to master basic academic writing by integrating sentence structure, paragraph organization, grammar, mechanics, vocabulary, and the writing process. Fundamentals leads students to build strong academic writing skills that will last them throughout their academic careers. Features: A step-by-step approach guides students seamlessly through the writing process. Clear, succinct explanations help students to understand and apply key concepts and rules. Numerous models and varied practice support students at all stages of writing. Journal writing helps students build literacy. Challenge activities give added opportunities to master the writing process. Reviewer's Checklists motivate students to revise their work. The Longman Academic Writing Series also consists of: Level 2 First Steps in Academic Writing, Second Edition Level 3 Introduction to Academic Writing, Third Edition Level 4 Writing Academic English, Fourth Edition Food Preservation and Safety of Natural Products addresses the most common causes of food spoilage that create significant loss to global food production while also discussing how food serves as a vehicle for the transmission of pathogenic microorganisms responsible for mild to debilitating health conditions in humans. The book provides essential information for food safety professionals on issues relating to foodborne diseases and offers potential solutions by presenting various methods of incorporating natural products in food production to prevent the spread of foodborne pathogenic organisms. The demand for green consumerism and consumers' general distaste for synthetic food additives poses a serious challenge to food safety and preservation. Natural products are used as green and sustainable source of bioactive compounds that can be applied in various fields including food. The use of plant and other natural products in food preservation is on the rise, hence this book reviews microbial mediated food spoilage, foodborne pathogens and food contamination and offers applications of natural products in food preservation. Provides important information on microbial metabolic by-products (natural enzymatic processes) to prevent food spoilage or deterioration Includes molecular techniques for antimicrobial and antioxidant applications in food, food packaging and edible films Presents the latest evidence-based science on the natural products used as additives in food The last decades witnessed a vigorous debate over the role of corporations in society. Interest in corporate social responsibility (CSR) has become intense as corporate stakeholders have called for higher performance and ethical standards from businesses, and many corporations have developed CSR programs to harvest the benefits resulting from such initiatives. CSR practices have become a crucial component of business strategy contributing to organizational success and sustainable competitiveness. Cases on Corporate Social Responsibility and Contemporary Issues in Organizations is an essential reference source that provides specific case studies that elaborate on the strategies and policies enacted by contemporary organizations to address environmental and social issues, as well as economic and financial ones. Featuring research on topics such as sustainable development goals, CSR pillars, employee retention, gender equality, and social accountability, this book is ideally designed for business managers, researchers, practitioners, and students seeking coverage on innovative business practices enacted in multiple organizations/industries. With the modernization of services offered through the internet, many traditional face-to-face services have adopted new e-service phenomena. Especially prevalent among the younger generations, this change in service has promoted many industries to rethink how to best reach their consumers using modern technology. Structural Equation Modeling Approaches to E-Service Adoption is a pivotal reference source that aims to share the latest empirical research findings within technology acceptance, information systems, information technology, human-computer interaction, and management information systems. While highlighting topics such as e-commerce, internet banking, and technology acceptance, this publication explores the understanding of today's e-services in a dynamic and complex environment, as well as the methods within the field of information systems and information technologies. This book is ideally designed for academics, students, managers, and scholars interested in the up-and-coming research surrounding the field of information technology. This book includes the papers presented in 2nd International Conference on Image Processing and Capsule Networks [ICIPCN 2021]. In this digital era, image processing plays a significant role in wide range of real-time applications like sensing, automation, health care, industries etc. Today, with many technological advances, many state-of-the-art techniques are integrated with image processing domain to enhance its adaptiveness, reliability, accuracy and efficiency. With the advent of intelligent technologies like machine learning especially deep learning, the imaging system can make decisions more and more accurately. Moreover, the application of deep learning will also help to identify the hidden information in volumetric images. Nevertheless, capsule network, a type of deep neural network, is revolutionizing the image processing domain; it is still in a research and development phase. In this perspective, this book includes the state-of-the-art research works that integrate intelligent techniques with image processing models, and also, it reports the recent advancements in image processing techniques. Also, this book includes the novel tools and techniques for deploying real-time image processing applications. The chapters will briefly discuss about the intelligent image processing technologies, which leverage an authoritative and detailed representation by delivering an enhanced image and video recognition and adaptive processing mechanisms, which may clearly define the image and the family of image processing techniques and applications that are closely related to the humanistic way of thinking. Efficient supply chain management is essential for maintaining successful workflows within companies. A lack of decisional, organizational, and information integration can lead to increased cost for a business due to missed opportunities, delays, inefficient inventory decisions, poor capacity allocation, and misuse of resources. Companies must employ collaborative practices across all functions of the supply chain in order to avoid costly mishaps. Hierarchical Planning and Information Sharing Techniques in Supply Chain Management is an essential reference source that discusses information exchanges and approaches of coordination related to operation planning for a better understanding of how hierarchical planning techniques and principles can contribute to the effective and efficient management and planning of supply chain activities. Featuring research on topics such as competitive advantages, information sharing, and transport management, this book is ideally designed for managers, academicians, and practitioners in the field of supply chain management, operations management, logistics, and operations research. Strengthening local governance with a view to promoting democratic representation, establishing entitlements, and improving the provision of goods and services, can play a critical role in human development. The evaluation concludes that UNDP has not fully capitalized on its comparative advantage in strengthening local governance, and suggests that, in part, this relates to the absence, within UNDP, of a common understanding of and sufficient corporate guidance on strengthening local governance. While there are numerous examples of support to local governance that have been innovative and effective, other initiatives have had limited impact and some have tended to be ad hoc and isolated, rather than systematic and strategic. For UNDP to play a more effective role in strengthening local governance reforms, the evaluation recommends that it should more explicitly and effectively mainstream local governance into all programmatic focus areas by developing a coherent framework that is firmly grounded in the practice of human development. The evaluation also recommends that UNDP should strengthen its partnerships with its associated funds and programmes in order to enhance the effectiveness of its initiatives in local governance -- Publishers website. Strategic disruptors in companies and economies, including blockchain technology, big data, and artificial intelligence, can contribute to the creation of new business opportunities, jobs, and growth. Research is needed on the impacts of these disruptors in Asia, as well as analyses on new business ecosystems and policy implications. Global Challenges and Strategic Disruptors in Asian Businesses and Economies presents a rich collection of chapters that explore and discuss the state of the art, emerging topics, challenges, and success factors in business, big data, innovation, and technology in Asia. The book explores how the internet of things, big data, and artificial intelligence can provide solutions for global challenges and companies. Including topics on digital economy, strategic management, and information technologies, this book is ideal for managing directors, general managers, corporate heads of firms, politicians, executives, entrepreneurs, academicians, decision makers, policymakers, researchers, and students looking to enhance their understanding and collaboration in business, disruptive innovation, and technology in Asia. Root vegetables are the sections of underground plants that are harvested and consumed by humans for their nutritional value. They are found in a wide variety of plant species. Even though botany draws a distinction between real roots and non-roots, the term "root vegetable" refers to both kinds in the context of agriculture and cuisine, despite botany classifying genuine roots as separate from non-roots. Root vegetables are often storage organs that store energy in the form of carbohydrates. This book explores recent developments in root vegetable research against the background of current and impending environmental change. In the highly competitive business environment of today, organizations are continually making attempts to stay one step ahead of their competitors by implementing various stratagems to improve their employees' competencies and capabilities, as human resources are one of their most important assets. By investing in employees' career development through training, coaching, mentoring, and counseling, the employee will undoubtedly become much more effective. Workforce Coaching, Mentoring, and Counseling: Emerging Research and Opportunities elucidates, examines, and explores theories, practices, and research-based human resource development (HRD) strategies that have proven to be effective in enhancing various aspects relating to the performance of individual employees and the organization as a whole. Featuring research on topics such as adult learning, management science, and work-life balance, this book is ideally designed for practitioners, educators, managers, and researchers. This book highlights current research and development in the area of sustainable built environments, currently one of the most important disciplines in civil engineering. It covers a range of topics, including sustainable construction and infrastructures, waste and wastewater management, enhanced sustainability, renewable and clean energy, sustainable materials and industrial ecology, building automation and virtual reality, and impact of climate change. As such it provides vital insights into responsible urbanization practices, and new tools and technologies in civil engineering that can mitigate the negative effects of the built environment. The Routledge Handbook of Tea Tourism provides comprehensive and cutting-edge insights into global tea tourism. With contributions from leading scholars and experts across 19 countries, it demonstrates the interdisciplinary nature and breadth of topics associated with global tea tourism. Tea is deeply connected to tourism through both travel and consumption. For host communities it provides an opportunity for diversification from the production and/or serving of tea while sharing cultural traditions and improving livelihoods. The Handbook is organised into five parts, with an introduction and epilogue, and the first part begins with an overview of historical and contemporary perspectives on the foundations of tea tourism. It digs into the roots of such tourism in China, the relationship of wild tea to indigenous tourism in Vietnam, heritage railways to tea tourism, and tea tourism in Africa. The second part examines sustainable tea tourism, with examples from Thailand, Turkey, Sri Lanka and India. The third part explores the management and marketing of tea tourism, highlighting tools and techniques for development and the impact of social media on the tea tourism experience. It draws on examples of tea tourism experience in diverse settings, such as the English tea room, a pearl milk tourism factory in Taiwan and a hot spring tea destination in Japan. The fourth part provides perspectives on innovation and practice in tea tourism, such as gastronomic tea tourism in Turkey, Japan and Thailand; tea cafés and community diversification in Japan; the role of GIAHS designation in tea tourism; and tea tour guiding in Iran. Finally, the fifth part provides insights on resilience in tea tourism, examining topics such as human-wildlife conflicts and the impact of the COVID-19 pandemic on the sector in both Asia and Europe. This Handbook provides a valuable resource for students and researchers, presenting a rich collection of theoretical and empirical insights, an agenda for future directions in the field and end-of-chapter discussion questions. It also serves as a useful tool for key stakeholders, aiming to increase interaction between academia and industry, encouraging the development of sustainable responsible tea tourism that benefits local communities on a global basis. The central task of tourism research is to advocate for sustainability. In order to do justice to the various components relating to tourism, such as aspects of the natural and cultural landscape as well as the economic, sociocultural and political situation, an integrative approach is necessary. The "landscape" is the foundation of tourism. Landscapes have their own value, a value that visitors and even locals are often not conscious of. "Landscape interpretation" and "heritage interpretation" attempt to remedy this deficit by defining, vividly presenting and "staging" the essential aspects of a landscape. This makes it possible to enhance awareness of the value of a landscape and its need to be protected, thereby achieving a positive change in the behaviour of visitors. The present volume introduces various initiatives, which illustrate the importance of landscape interpretation for tourism research. It is an unconditional

reality that the tourism industry in Asia is becoming exposed to innovative technologies more than ever before. This book reports the latest research in the application of innovative technology to the tourism industry, covering the perspectives, innovativeness, theories, issues, complexities, opportunities and challenges affecting tourism in Asia. A blend of comprehensive and extensive efforts by the contributors and editors, it is designed especially to cover technology applications in tourism fairs, festivals and events in Asia. The application and practice of technologies in tourism, including the relevant niches of fairs, festivals and events are also covered, with a focus on the importance of technology in tourism. This book highlights, in a comprehensive manner, technologies that are impacting the tourism industry in Asia, as well as the constraints it is facing. It deals with distinct topics, such as tourism promotion, technology-driven sustainable tourism development, social media, accessibility and so on to cover fairs, festivals and events. This book is a significant contribution towards the very limited knowledge in this identified research area, with examples from selected Asian countries. This book is designed to accommodate both qualitative and quantitative research linking theory and practice. This book has a clear focus on outlining the research issues. Each chapter of the book highlights a methodology that was used, with rationale for its use. This book addresses a number of revisions that unify the theme or framework to integrate the chapters. en la sección I, “El proceso de enseñanza aprendizaje en la era digital” se recogen una serie de experiencias donde se ponen de manifiesto que en la sociedad actual, las tecnologías digitales evolucionan a un ritmo acelerado y están expuestas a continuas transformaciones, por lo que surgen nuevas oportunidades de enseñanza-aprendizaje. Este panorama plantea un desafío importante a los distintos agentes educativos que tienen que dar respuesta a las diferentes necesidades del alumnado y desarrollar experiencias pedagógicas innovadoras, tanto desde los contextos de educación formal como no formal, que faciliten el aprendizaje a lo largo y ancho de la vida. En la sección II, de este libro, denominada “Aprendiendo a crear una escuela equitativa y diversa”, realiza un recorrido por una gran variedad de estudios y buenas prácticas encaminadas hacia la mejora de la escuela, en la cual se fomente la igualdad, equidad y normalización de la diversidad. A través de los diferentes capítulos que abarcan temas tan interesantes como los distintos tipos de diversidad, diferentes formas de fomentar el trabajo en equipo y motivación del alumnado y violencia de género, hasta como trabajan los diferentes agentes educativos para derribar falsos mitos relacionados con estas temáticas. Por todo ello, a lo largo de los diferentes capítulos, se va conformando toda una red de buenas prácticas a tener presente como profesionales de la educación para que la escuela tienda a configurarse como un espacio cuya cultura, políticas y prácticas se orienten a favorecer la participación plena y un aprendizaje personalizado. En la sección III, “Competencia socioemocional en futuros docentes y su influencia positiva en el alumnado”, se recogen experiencias muy diversas pero que caminan hacia una misma línea, la mejora de los procesos de enseñanza y aprendizaje. Entre ellas destacan la capacidad para regular las emociones en la formación inicial del profesorado, la motivación del alumnado de diferentes etapas educativas, las estrategias para la estimulación emocional y la orientación como propuesta para prevenir el fracaso escolar. Finalmente, en la sección IV, denominada “La importancia de la educación para la prevención de la violencia escolar”, se divide en once capítulos donde se recogen experiencias que indagan en los diferentes tipos de violencia y la importancia de trabajar aspectos tan importantes como la convivencia desde las edades más tempranas. Sin embargo, cuando hablamos de violencia escolar los adolescentes ocupan un papel protagonista. Con el uso de las tecnologías y redes sociales cada vez aparecen nuevas formas de acoso: ciberacoso o ciberbullying, sextorsion, grooming, etc., de ahí la necesidad de presentar en esta sección nuevas estrategias educativas que sirvan tanto al alumnado, a docentes y a las familias a reducir estos tipos de actuaciones. Global Knowledge on the Commercial Sea Cucumber *Holothuria Scabra*, Volume 91 in the *Advances in Marine Biology* serial, highlights new advances in the field, with this new volume presenting interesting chapters written by an international board of authors. Provides the authority and expertise of leading contributors from an international board of authors Presents the latest release in *Advances in Marine Biology* series Updated release includes the latest information surrounding Global Knowledge On The Commercial Sea Cucumber *Holothuria Scabra*
