Risk May 01 2024 In the tradition of Malcolm Gladwell, Gardner explores a new way of thinking about the decisions we make. We are the safest and healthiest human beings who ever lived, and yet irrational fear is growing, with deadly consequences — such as the 1,595 Americans killed when they made the mistake of switching from planes to cars after September 11. In part, this irrationality is caused by those — politicians, activists, and the media — who promote fear for their own gain. Culture also matters. But a more fundamental cause is human psychology. Working with risk science pioneer Paul Slovic, author Dan Gardner sets out to explain in a compulsively readable fashion just what that statement above means as to how we make decisions and run our lives. We learn that the brain has not one but two systems to analyze risk. One is primitive, unconscious, and intuitive. The other is conscious and rational. The two systems often agree, but occasionally they come to very different conclusions. When that happens, we can find ourselves worrying about what the statistics tell us is a trivial threat — terrorism, child abduction, cancer caused by chemical pollution — or shrugging off serious risks like obesity and smoking. Gladwell told us about “the black box” of our brains; Gardner takes us inside, helping us to understand how to deconstruct the information we’re bombarded with and respond more logically and adaptively to our world. Risk is cutting-edge reading.

Isabella Stewart Gardner Museum Dec 16 2022 The Isabella Stewart Gardner Museum is world renowned for a superb collection of over 10,000 objects that range from ancient Chinese bronzes to Renaissance tapestries, from paintings by Raphael and Rubens to those of Whistler and Matisse. This guidebook charts new pathways through the beloved institution and tells the story its founder, a trail-blazing American who was among the most prominent patrons of her day. Isabella Stewart Gardner built a Venetian-inspired palazzo in Boston to house her exquisite and thought-provoking arrangement of art objects from diverse cultures and periods of history to share with the world. she hosted luminaries in the worlds of music, dance, and literature and supported such famed artists as Henry James and John Singer Sargent. Exploring the museum room by room, the authors of this book look at masterpieces by Botticelli, Rembrandt, Titian, and others, as well as hidden treasures, including often overlooked decorative arts, collected letters, and photographs. Rather than positioning the museum simply as a historical gem, they present it as a site for forging connections between past and present and reinforcing the founder's legacy of sustaining contemporary art, music, and education with initiatives supported by space in the New Wing designed by Renzo Piano and constructed in 2012. Featuring spectacular photography, the book captures this unique museum, helping us consider anew what the museum meant in Gardner's time and what it means in ours.

9/11 The Conspiracy Theories Dec 04 2021 The time is right to learn what really happened on 9/11. The time is right to unearth what has been deliberately withheld from the public. Nearly twenty years ago, on 11 September 2001, four passenger aircraft were hijacked and flown into the World Trade Center in New York, the Pentagon near Washington, and a field in Shanksville, Pennsylvania. Nearly three thousand people were killed. The narrative in the weeks and months that followed seemed straightforward: the attacks had been masterminded by al Qaeda leader, Osama bin Laden, an embittered terrorist with an abiding hatred of the West. But, as the twenty-year anniversary approaches, that neat explanation still fails to answer some important questions surrounding that fateful day. How did World Trade Center Building 7 - 100 yards from the Twin Towers - collapse so quickly and symmetrically when it had not been hit? How could two rogue aircraft bring down three towers? Did the US government help orchestrate the attacks as an 'inside job'? *9/11: The Conspiracy Theories* seeks the truth - not only of what we do know about 9/11, but also what has been intentionally hidden from us. Researching these stories with the help of strong first-person reporting and an in-depth examination of documentation released under freedom-of-information protocols, this book sheds new light on one of history's most tragic and troubling episodes, which shattered for ever the myth of America as a country immune to international terrorism.

Horace & Bunwinkle Jan 29 2024 The first in a young middle grade animal series in which an anxious Boston Terrier and an exuberant potbellied pig team up to solve crimes in their barnyard—from debut author PJ Gardner, with illustrations by David Mottram. Perfect for fans of the Mercy Watson series, The Trouble with Chickens, and A Boy Called Bat. Horace Homer Higgins III despises dirt. And the outdoors. And ducks. But when his person, Ellie, moves to a farm called the Homestead, the anxious Boston Terrier is forced to adapt. As if that isn't enough to strain his nerves, Ellie adopts a perpetually cheerful potbellied pig named Bunwinkle to be his baby sister. Bunwinkle is delighted to be on the farm despite the stuffiness of her new canine brother. She's sure she'll crack his shell eventually—no one can resist her cuteness for long—especially once they bond over watching a TV pet-detective show. When the duo discovers that some neighborhood animals have been disappearing, they decide to use their new detective skills to team up to solve this barnyard mystery. Is it a mountain lion? Or their suspiciously shot-loving veterinarians? Only one thing seems certain: if they don't figure it out soon, one of them might be next.

The Four Books Nov 14 2022 In this engaging volume, Daniel Gardner explains the way in which the Four Books--Great Learning, Analects, Mencius, and Maintaining Perfect Balance--have been read and understood by the Chinese since the twelfth century. Selected passages in translation are accompanied by Gardner's comments, which incorporate selections from the commentary and interpretation of the renowned Neo-Confucian thinker, Zhu Xi (1130-1200). This study provides an ideal introduction to the basic texts in the Confucian tradition from the twelfth through the twentieth centuries. It guides the reader through Zhu Xi's influential interpretation of the Four Books, showing how Zhu, through the genre of commentary, gave new coherence and meaning to these foundational texts. Since the Four Books with Zhu Xi's commentary served as the basic textbook for Chinese schooling and the civil service examinations for more than seven hundred years, this book illustrates as well the nature of the standard Chinese educational curriculum.

Isabella Stewart Gardner, Dog Lover Jun 09 2022 Isabella Stewart Gardner was a force to be reckoned with. She routinely went toe-to-toe with major museums and titans of industry to purchase masterpieces, she created a museum unlike any other, and she was famous for flouting the social conventions that governed women of her time. This book, however, shows another side of Isabella that readers may not expect: her love of dogs. Featuring black-and-white images from the Isabella Stewart Gardner Museum archives, this volume allows readers to meet Isabella's favorite dogs (Kitty Wink and Patty Boy), see the litters of puppies she bred, and discover how her dogs were a source of comfort to her toward the end of her life. Usually stern in photographs, Isabella--like many people--could not help grinning when posing for photos with puppies. Whether it was collecting Renaissance masterpieces or raising Fox Terriers, this book shows that Gardner approached all aspects of life with enthusiasm and dedication.

Herbier merveilleux du Louvre Aug 31 2021 A follow-up to *The Secret Language of Flowers: Notes on the Hidden Meanings of Flowers in Art*. To celebrate the 30th anniversary of the Louvre pyramid, Jean-Michel Othoniel was invited to create a work relating the importance of flowers in the Museum's eight art departments. The artist photographed the floral wealth concealed in the masterpieces of the Museum's painting, drawing, sculpture, embroidery and enamel collections. Using this, Othoniel composes his own original herbarium, accompanied with notes on the secret language of flowers and their symbolism in the history of art. Among the seventy details of flowers, you will find the thistle in Dürer's selfportrait, the poppy in the Paros funerary stele, the apple sitting on a stool in *The Lock* by Fragonard, or the peony attached to the unfastened blouse of the young woman in Greuze's *Broken Pitcher*. The work also introduces us to lesser-known details in works, offering a magnificent treasure hunt for visitors of the museum. Amid this vast prairie spangled with symbolic flowers, the artist asks this question: If there could be only one, which would be the Louvre's flower? A question to which the artist himself offers his own response.

Isabella Stewart Gardner Museum Mar 26 2021 An in-depth study of one of Boston's treasured cultural landmarks, the pioneering patron behind the collection, and the Pritzker Prize-winning architect who modernized the Gardner Museum's vision. When Isabella Stewart Gardner opened her exquisitely curated collection to the public in 1903, she could hardly have imagined the more than 250,000 visitors that now annually explore the art and furnishings housed in her historic re-creation of a Venetian palace. Tasked with the first addition to the museum since its founding, Renzo Piano Building Workshop has brought Gardner's vision into the new millennium. In addition to sumptuous images of the courtyards, gardens, and galleries

of the original stone palazzo and rarely seen journal pages and photographs, this beautifully designed volume features architectural renderings and new photographs of the 70,000-square-foot wing. Essays address Gardner's life, including her friendships with Henry James, James McNeill Whistler, and John Singer Sargent; the museum's interaction with Renzo Piano Building Workshop; and the new building within the firm's distinguished museum work as a whole.

Extraordinary Minds Oct 02 2021 Fifteen years ago, psychologist and educator Howard Gardner introduced the idea of multiple intelligences, challenging the presumption that intelligence consists of verbal or analytic abilities only -- those intelligences that schools tend to measure. He argued for a broader understanding of the intelligent mind, one that embraces creation in the arts and music, spatial reasoning, and the ability to understand ourselves and others. Today, Gardner's ideas have become widely accepted -- indeed, they have changed how we think about intelligence, genius, creativity, and even leadership, and he is widely regarded as one of the most important voices writing on these subjects. Now, in *Extraordinary Minds*, a book as riveting as it is new, Gardner poses an important question: Is there a set of traits shared by all truly great achievers -- those we deem extraordinary -- no matter their field or the time period within which they did their important work? In an attempt to answer this question, Gardner first examines how most of us mature into more or less competent adults. He then examines closely four persons who lived unquestionably extraordinary lives -- Mozart, Freud, Woolf, and Gandhi -- using each as an exemplar of a different kind of extraordinariness: Mozart as the master of a discipline, Freud as the innovative founder of a new discipline, Woolf as the great introspector, and Gandhi as the influencer. What can we learn about ourselves from the experiences of the extraordinary? Interestingly, Gardner finds that an excess of raw power is not the most impressive characteristic shared by superachievers; rather, these extraordinary individuals all have had a special talent for identifying their own strengths and weaknesses, for accurately analyzing the events of their own lives, and for converting into future successes those inevitable setbacks that mark every life. Gardner provides answers to a number of provocative questions, among them: How do we explain extraordinary times -- Athens in the fifth century B.C., the Tang Dynasty in the eighth century, Islamic Society in the late Middle Ages, and New York at the middle of the century? What is the relation among genius, creativity, fame, success, and moral extraordinariness? Does extraordinariness make for a happier, more fulfilling life, or does it simply create a special onus?

The App Generation Jul 11 2022 No one has failed to notice that the current generation of youth is deeply--some would say totally--involved with digital media. Professors Howard Gardner and Katie Davis name today's young people The App Generation, and in this spellbinding book they explore what it means to be "app-dependent" versus "app-enabled" and how life for this generation differs from life before the digital era. Gardner and Davis are concerned with three vital areas of adolescent life: identity, intimacy, and imagination. Through innovative research, including interviews of young people, focus groups of those who work with them, and a unique comparison of youthful artistic productions before and after the digital revolution, the authors uncover the drawbacks of apps: they may foreclose a sense of identity, encourage superficial relations with others, and stunt creative imagination. On the other hand, the benefits of apps are equally striking: they can promote a strong sense of identity, allow deep relationships, and stimulate creativity. The challenge is to venture beyond the ways that apps are designed to be used, Gardner and Davis conclude, and they suggest how the power of apps can be a springboard to greater creativity and higher aspirations.
