Bring deeper understanding to your science/biology classroom through the use of Life Science. The true-to-life drawings and wide variety of topics including systems, cycles, and kingdoms of living things serve as excellent supplements to your already information-rich curriculum. The well-chosen vocabulary on each page blends well with most all biology texts, making this an ideal resource for all comprehensive life science teachers and students. Life Science is a collection of true-to-life drawings showing a variety of systems, cycles, orders, and more in the five kingdoms of living things. These drawings were designed for use as labeling activities which will familiarize your students with the concepts. These activities will serve as excellent supplements for any comprehensive study of science or biology. Educational, easy-to-do life science activities will teach young readers more about the world around them. Using simple, easy to find materials, these activities will help readers better understand biology, zoology, ecology, and more! This collection of over 200 classroom-tested activities and reproducible worksheets for students in grades 7 through 12 covers vital concepts in human biology and health, including extensive coverage of AIDS. These high-interest lessons and worksheets get students actively involved in learning-even students who are poorly motivated, learning disabled, or who lack English proficiency. The lessons are written so you can easily accommodate your students' various learning styles whether it's visual, auditory, and tactile. Each lesson helps students make connections between new material and concepts they're already familiar with. The book features 11 units, covering all the body's systems-such as circulatory, digestive, and immune systems, and offers a detailed look at cells, bones, muscles, and more. Each unit provides enjoyable, hands-on activities that engage secondary students-from building a cell model and testing foods for carbohydrates to dissecting a frog and making an action cartoon of a macrophage battling a microorganism. For convenience, the lessons are printed in a big, spiral-bound format that folds flat for photocopying. Directions for simple experiments which require only a microscope and household objects to prove some basic scientific facts about plants, animals, and human beings. Inquiry Biology for K-8 Teachers provides pre-service k-8 teachers with a firm grasp of basic biology content and how to teach science by inquiry. The workbook provides objectives, questions, and worksheets for the activities presented. It's designed to be a complete repository of course notes that students can take with them as they start their teaching careers. It's based on the 5-E model of teaching. A hands-on and fun-filled resource for teaching science to middle and high school students

New in the 5-Minute Fundamentals Series, *The Science Teacher's Activity-A-Day, Grades 6-12*, includes 180 easy, five-minute hook or sponge activities to capture learners' attention and introduce lessons. Divided into three units, Physical Science, Life Science, and Earth and Space Science; the activities cover topics based on the National Science Education Standards. All the book's activities can be done with materials that are inexpensive and easy to find. Includes quick and fun "sponge" activities that are designed to engage students. All the activities take about 5 minutes to complete. *The Science Teacher's Activity-a-Day* is an ideal resource for middle and high school science teachers. A supplement to the textbook. This textbook takes a unique approach by linking the elements of anatomy and physiology (A&P) with everyday activities we all do without thinking, the 'Activities of Daily Living' such as breathing or eating, in order to explain biological systems and making complex ideas and biological processes easier to understand and relate to practice. By connecting A&P with health, healthcare and wellbeing, the author's exceptional understanding of students' needs contributes to a comprehensive book. As an essential anatomy and physiology textbook that uses accessible language, everyday examples, and connects to your course, this is the ultimate companion to any student. Whether you're studying nursing, health, midwifery, paramedic science, or sport and exercise, this introductory text will offer a head start. The editors of this book have a straightforward goal: to inspire you to engage your students through public collaboration in scientific research--also known as citizen science. The book is specifically designed to get you comfortable using citizen science to support independent inquiry through which your students can learn both content and process skills. Citizen Science offers you: Real-life case studies of classes that engaged in citizen science and learned authentic scientific processes and the habits of mind associated with scientific reasoning. Fifteen stimulating lessons you can use to build data collection and analysis into your teaching. Plenty of flexibility. You can use the lessons with or without access to field or lab facilities; whether or not your students can collect and submit data of their own; and inside your classroom or outside through fieldwork in schoolyards, parks, or other natural areas in urban or rural settings. You don't need an advanced degree in science to guide your students in productive participation in one of a growing variety of citizen science projects. As the editors note, Such involvement can scaffold teachers' entry into facilitating student investigation while connecting students with relevant, meaningful, and real experiences with science. Includes 36 activities designed to present common biology-related topics and enhance students' problem-solving abilities. This collection of over 200 classroom-tested activities and reproducible worksheets for students in grades 7 through 12 covers vital concepts in human biology and health, including extensive coverage of AIDS. These high-interest lessons and worksheets get students actively involved in learning--even students who are poorly motivated, learning disabled, or who lack English proficiency.
