Livingstone,2015-09-02 Transhumanism is a recent movement that extols man's right to shape his own evolution by maximizing the use of scientific technologies to enhance human physical and intellectual potential. While the name is new, the idea has long been a popular theme of science fiction, featured in such films as 2001: A Space Odyssey, Blade Runner, the Terminator series, and more recently The Matrix, Limitless, Her, and Transcendence. However, as its adherents hint at in their own publications, transhumanism is an occult project rooted in Rosicrucianism and Freemasonry and derived from the Kabbalah, which asserts that humanity is evolving intellectually towards a point in time when man will become God. Modeled on the medieval legend of the Golem and Frankenstein, they believe man will be able to create life itself in the form of living machines or artificial intelligence. Spearheaded by the Cybernetics Group, the project resulted in both the development of the modern computer and MK Ultra, the CIA's mind control program. MK Ultra promoted the mind-expanding potential of psychedelic drugs to shape the counterculture of the 1960s, based on the notion that the shamans of ancient times used psychoactive substances equated with the apple of the Tree of Knowledge. And as revealed in the movie Lucy, through the use of smart drugs and what transhumanists call mind uploading, man will be able to merge with the Internet, which is envisioned as the end point of Kabbalistic evolution: the formation of a collective consciousness or Global Brain. That awaited moment is what Ray Kurzweil, a director of engineering at Google, refers to as The Singularity. By accumulating the total of human knowledge and providing access to every aspect of human activity, the Internet will supposedly achieve omniscience, becoming the God of occultism or the Masonic All-Seeing Eye of the reverse side of the American dollar bill.

Lemon-Aid Used Cars and Trucks 2012-2013 Phil Edmonston,2012-05-19 A guide to buying a used car or minivan features information on the strengths and weaknesses of each model, a safety summary, recalls, warranties, and service tips. [Mini Down Under](#)

[Down Under](#) Donn Anderson,2009-03-02 Mini Down Under traces the history of one of New Zealand's and the world's best-loved cars. More versions of the Mini were available in New Zealand than anywhere else, and the launching of the iconic car in February 1960 was a larger-than-life event. In this lively and personal story, the author tracks the Mini's life in New Zealand, the connection between Kiwi racing driver Bruce McLaren and the birth of the Mini Cooper, the heady days of competition success in the Antipodes, the local assembly and marketing of the classic original car, and the eventual development into the latest generation Mini for a new century.

Oudry's Painted Menagerie Mary Morton,2007-06-25 In the 1720s and 1730s Jean Baptiste Oudry established himself as the preeminent painter in France of hunts, animals, still lifes, and landscapes. Oudry's Painted Menagerie focuses on a suite of eleven life-size portraits of exotic animals from the royal menagerie at Versailles, painted by Oudry between 1739 and 1752. These paintings eventually found their way into the ducal collection in Schwerin, Germany. Among them is the magnificent portrait of Clara, an Indian rhinoceros who became a celebrity in mid-eighteenth-century Europe. Her portrait has been out of public view for more than a century and is presented here in its newly conserved state.
