Questions of citizenship and the role of constitutions in determining its boundaries are under scrutiny in this judicious and accessible analysis from Jo Shaw. With populism on the rise and debates about immigration intensifying, it draws on examples from around the world to set out the shifting boundaries of state inclusion and exclusion. Some philosophers have thought that life could only be meaningful if there is no God. For Sartre and Nagel, for example, a God of the traditional classical theistic sort would constrain our powers of self-creative autonomy in ways that would severely detract from the meaning of our lives, possibly even evacuate our lives of all meaning. Some philosophers, by contrast, have thought that life could only be meaningful if there is a God. God and the Meanings of Life is interested in exploring the truth in both these schools of thought, seeking to discover what God could and couldn't do to make life meaningful (as well as what he would and wouldn't do). Mawson espouses a version of the 'amalgam' or 'pluralism' thesis about the issue of life's meaning – in essence, that there are a number of different legitimate meanings of 'meaning' (and indeed 'life') in the question of life's meaning. According to Mawson, God, were he to exist, would help make life meaningful in some of these senses and hinder in some others. He argues that whilst there could be meaning in a Godless universe, there could be other sorts of meaning in a Godly one and that these would be deeper. Teach your kid about English Question Words in a funny way. A history of the UK's regional inequalities, and why they matter Differences between England's North and South continue to shape national politics, from attitudes to Brexit and the electoral collapse of Labour's 'Red Wall' to Whitehall's experimentation with regional pandemic lockdowns. Why is this fault line such a persistent feature of the English landscape? The Northern Question is a history of England seen in the unfamiliar light of a northern perspective. While London is the capital and the centre for trade and finance, the proclaimed leader of the nation, northern England has always seemed like a different country. In the nineteenth century its industrializing society appeared set to bring a political revolution down upon Westminster and the City. Tom Hazeldine recounts how subsequent governments put finance before manufacturing, London ahead of the regions, and austerity before reconstruction. Turkey's Kurdish question is a long-standing issue which gained special importance after the start of armed conflict between Kurdish insurgents and Turkish security forces. Despite multiple failed attempts to solve the Kurdish question, it remains the most significant issue in Turkey today. This book approaches Turkey's Kurdish question for the first time from an educational perspective. It scrutinizes the relationship between the ideological Kemalist education and the challenges facing Kurdish pupils educated in Turkish public schools. Turkey's Kurdish Question from an Educational Perspective represents a comprehensive examination of all major factors in education—teachers, curriculum, policy documents, educational attainments and textbooks—that might possibly affect Kurds. It sheds a critical spotlight on the educational side of the issue, offering a summary of existing challenges, ways to deal with these problems, and the proposal of long-term solutions to achieve permanent peace in the region. The origin of such support is rooted in countries' historical pursuit of three interconnected objectives, namely attaining self-sufficiency in food, managing domestic food prices, and providing income support to the poor. This volume sheds light on the complex, bumpy and non-linear process of how some flagship food-based social protection programs have evolved over time, and how they currently work. In particular, it lays out the broad trends in reforms, including a growing move from in-kind modalities to cash transfers, from universality to targeting, and from agriculture to social protection. Case studies from Egypt, India, Indonesia, Mexico, Sri Lanka, and United States document the specific experiences of managing the process of reform and implementation, including enhancing our understanding of the opportunities and challenges with different social protection transfer modalities. With a range that spans the lyrical, heartfelt songs “Angel from Montgomery,” “Sam Stone,” and “Paradise” to the classic country music parody “You Never Even Called Me by My Name,” John Prine is a songwriter's songwriter. Across five decades, he's created critically acclaimed albums—John Prine (one of Rolling Stone's 500 Greatest Albums of All Time), *Bruised Orange*, *The Missing Years*—and earned two Grammy Awards, a Lifetime Achievement Award for Songwriting from the Americana Music Association, and induction into the Nashville Songwriters Hall of Fame. His songs have been covered by scores of artists, from Johnny Cash and Miranda Lambert to Bette Midler and 10,000 Maniacs, and influenced everyone from Roger McGuinn to Kacey Musgraves. Hailed in his early years as the “new Dylan,” Prine still counts Bob Dylan among his most enthusiastic fans. In *John Prine*, Eddie Huffman traces the long arc of Prine's musical career, beginning with his early, seemingly effortless successes, which led paradoxically not to stardom but to a rich and varied career writing songs that other people have made famous. He recounts the stories, many of them humorous, behind Prine's best-known songs and discusses all of Prine's albums as he explores the brilliant records and the ill-advised side trips, the underappreciated gems and the hard-earned comebacks that led Prine to found his own successful record label, Oh Boy Records. This thorough, entertaining treatment gives John Prine his due as one of the most influential songwriters of his generation. Previous studies have tended to focus on the characteristics of EU leadership, but have failed to examine the extent to which EU leadership generates 'followership'. This book analyzes EU climate policies towards China and India in order to provide a holistic assessment of EU climate leadership, and makes three key arguments. Canada's policy of multiculturalism has been the object of ongoing debate since it was first introduced in 1971. Decades later, Canadians still seem uncertain about the meaning of multiculturalism. Detractors insist that government has not

succeeded in discouraging immigrants and their descendants from preserving their cultures of origin, undercutting a necessary identification with Canada, while supporters argue that immigrant groups' abilities to influence their adjustments to Canada has strengthened their sense of belonging. Beyond what often seems to be a polarized debate is a broad spectrum of opinion around multiculturalism in Canada and what it means to be Canadian. The Multiculturalism Question analyzes the policy, ideology, and message of multiculturalism. Several of Canada's leading thinkers provide valuable insights into a crucial debate that will inevitably continue well into the future. The Kurds, once marginal in the study of the Middle East and secondary in its international relations, have moved to center stage in recent years. In Turkey, where the Kurdish question is an issue of national significance, and in Iraq, where the gains made by the Kurdistan Regional Government have allowed it to impose its authority, moves are afoot to solve "the Kurdish Question" once and for all. In Syria, where the Kurds have borne the brunt of the Islamic State's onslaught as they defended their three self-declared cantons of Afrin, Kobane, and Cezire, and in Iran, where they struggle to express their cultural distinctiveness and suffer disproportionately at the hands of the Islamic Republic's security and intelligence services, the picture is less positive. Yet the situations in both countries remain in flux, affected by developments in Iraq and Turkey in a manner that suggests we may have to revise the notion of the Kurds being forever divided by the boundaries of the Middle East and subsumed into the state projects of other nations. The contributors to *The Kurdish Question Revisited* offer insights into how this once seemingly intractable, immutable phenomenon is being transformed amid the new political realities of the Middle East. The Kurdish question is one of the most complicated and protracted conflicts of the Middle East and will never be resolved unless it is finally defined. The majority of the Kurdish people live in Turkey, which gives the country a unique position in the larger Kurdish conundrum. Society in Turkey is deeply divided over the definition and even existence of the Kurdish question, and this uncertainty has long manifested itself in its complete denial, or in accusations of political rivals of 'separatism' and even 'treason'. Turkey's Kurdish Question explores how these denial and acknowledgement dynamics often reveal pre-existing political ideology and agenda priorities, themselves becoming political actions. While the very term "Kurdish question" is discussed in the academic literature as a given, a new and systemic study is required to deconstruct and analyze the constitutive parts of this discursive construct. This book provides the first comprehensive study and analysis of the discursive constructions and perceptions of what is broadly defined as the "Kurdish question" in Turkish, European and American political cultures. Furthermore, its new methodological approach to the study of discourse and politics of secessionist conflicts can be applied to many similar intra-state conflict cases. Turkey's Kurdish Question would suit students and scholars of Middle East studies, Conflict studies and Comparative Politics, as well as Turkish or Kurdish studies. H. Akın Ünver is an assistant professor of international relations at Kadir Has University. This book is based on his dissertation 'Defining Turkey's Kurdish Question', which has won the Middle East Studies Association (MESA) 2010 Malcolm H. Kerr award for the best dissertation in the field of social sciences.

In Guatemala, it was called the "trial of the century": the 2013 prosecution of former de facto head of state (1982-1983) General José Efraín Ríos Montt and his intelligence chief, General José Mauricio Rodríguez Sánchez, on charges of genocide and crimes against humanity against the Maya-Ixil people. Ríos Montt's seventeen-month reign was one of the bloodiest periods in Guatemala's history, with "scorched earth" massacres, the destruction of hundreds of Maya communities, and militarized resettlement of Mayas into "model villages." Ríos Montt was convicted on all charges. Ten days later, a higher court vacated the verdict on dubious procedural grounds. Nevertheless, Guatemala's genocide trial, held in the domestic courts in the country where the crimes were committed, was precedent-setting. In this volume, Guatemalan and international scholars rigorously explore the complexities of the Guatemala experience and reflect upon the case's implications for understanding and prosecuting the category of genocide more broadly. Topics include: the nexus of racism and counterinsurgency in explaining Guatemala's genocide; the politics of Maya collective memory; the intersections of gender, sexuality, and ethnicity in genocide; the decades-long interconnections of national and transnational justice processes that brought the case to trial; and the limits and contributions of tribunal justice. This book

was originally published as a special issue of the Journal of Genocide Research. As part of the urbanization process, suburban development involves the conversion of rural land to urban use. When discussing the suburbs, most writers focus on particular countries in the northern hemisphere, implying that patterns and processes elsewhere are fundamentally different. The purpose of *The Suburban Land Question* is to identify the common elements of suburban development, focusing on issues associated with the scale and pace of rapid urbanization around the world. Editors Richard Harris and Ute Lehrer and a diverse group of contributors draw on a variety of sources, including official data, planning documents, newspapers, interviews, photographs, and field observations to explore the pattern, process, and planning of suburban land development. Featuring case studies from major world regions, including China, India, Latin America, South Africa, as well as France, Austria, the Netherlands, the United States, and Canada, the volume identifies and discusses the peculiarly transitional character of suburban land. In addition to place and time, *The Suburban Land Question* addresses the many elements that distinguish land development in urban fringe areas, including economy, social infrastructure, and legality. Modern communications networks can be used by the unscrupulous for purposes ranging from cyber-attack, terrorism and espionage to fraud, kidnap and child sexual exploitation. A successful response to these threats depends on entrusting public bodies with the powers they need to identify and follow suspects in a borderless online world. But trust requires verification. Each intrusive power must be shown to be necessary, clearly spelled out in law, limited in accordance with international human rights standards and subject to demanding and visible safeguards. The current law is fragmented, obscure, under constant challenge and variable in the protections that it affords the innocent. It is time for a clean slate. This Report aims to help Parliament achieve a world-class framework for the regulation of these strong and vital powers. The book examines several models which have been advocated for a workable and acceptable solution to the Kurdish problem which would be absolutely necessary for stability in the West Asian region. The book evaluates how the more than two-decade long experience of Kurdish self-rule in a democratic framework in Iraqi Kurdistan affects the debate over the other Kurdish regions in West Asia. With Turkey's European Union accession process contributing to the opening of the political space to ethno-nationalism, there is a need for a non-military solution to the Kurdish issue. The book analyses the role of Kurdish diaspora which plays a significant part in placing the Kurdish question on the European political agenda. It also examines the role of the Kurds in the aftermath of the Arab Spring and the changing geopolitics in the region. Now, the Kurds maintain the strongest platform in battling against the ISIS terrorists.

Essays exploring how reformers and charities used the "magic lantern" to raise public awareness of poverty. Public performances using the magic or optical lantern became a prominent part of the social fabric of the late nineteenth century. Drawing on a rich variety of primary sources, *Screen Culture and the Social Question, 1880-1914* investigates how the magic lantern and cinematograph, used at public lectures, church services, and electoral campaigns, became agents of social change. The essays examine how social reformers and charitable organizations used the "art of projection" to raise public awareness of the living conditions of the poor and the destitute, as they argued for reform and encouraged audiences to work to better their lot and that of others. This classic handbook has once again been updated from cover to cover, assuring its secure place as the preeminent tax practice guide for the conduct of international business transactions. The user-friendly structure has been maintained—first, a hands-on overview of certain key tax aspects of international transactions that have general application (including a chapter on special issues for transactions touching the European Union), followed by detailed country profiles that offer solutions designed to maximize effective tax planning and satisfy compliance obligations in twenty key global trading jurisdictions. The expert country-by-country contributors explain each jurisdiction's approach to the critical areas of concern in transactional tax planning, addressing among other issues: entity classification; taxable transactions; tax-free transactions (both domestic and cross-border); loss and other tax attribute planning; intellectual property transactions; compensation arrangements; acquisition financing; joint ventures; transfer pricing; VAT; and tax treaty usage. Because it is crucial for management and counsel to develop a working knowledge of the salient aspects of the relevant law in a broad range of global jurisdictions, the work is of immeasurable value in assessing, strategizing, and implementing international transactions while also allowing quick jurisdictional comparison of key tax aspects. Addressing an important information gap in an area of widespread commercial concern, this incomparable resource will be welcomed by international tax counsel, corporate and financial services attorneys, and corporate planning and compliance professionals. This volume takes a fresh look at the land question in India. Instead of re-engaging in the rich transition debate in which the transformation of agriculture is seen as a necessary historical step to usher in dynamic capitalist (or socialist) development, this collection critically examines the centrality of land in contemporary development discourse in India. Consequently, the focus is on the role of the state in pushing a process of dispossession of peasants through direct expropriation for developmental purposes such as acquisition of land by (local) states for infrastructure development and to support accumulation strategies of private business through industrialization. Land in India is sought for non-agricultural purposes such as purchasing land to reduce risk and real estate development. Land is also central to tribal communities (adivasis), whose livelihoods

depend on it and on a moral economy that is independent of any price-driven markets. Adivasis tend to hold on to such property, not as individual owners for profit, but for collective security and to protect a way of life. Thus land, notwithstanding its role in the accumulation process, has been, and continues to be, a turbulent arena in which classes, castes, and communities are in conflict with each other, with the state, and with capital, jockeying to determine the terms and conditions of land transactions or their prevention, through both market and non-market mechanisms. The volume goes beyond the traditional political economy of the agrarian transition question, and deals with, inter alia, distributional conflicts arising from acquisition of land by the state for capital accumulation on the one hand and its commodification on the other. It provides new analytical insights into the land acquisition processes, their legal-institutional and ethical implications, and the multifaceted regional diversity of acquisition experiences in India.
