**Improving the Efficiency of Engines for Large Nonfighter Aircraft** National Research Council, Division on Engineering and Physical Sciences, Air Force Studies Board, Committee on Analysis of Air Force Engine Efficiency Improvement Options for Large Non-fighter Aircraft, 2007-08-30 Because of the important national defense contribution of large non fighter aircraft rapidly increasing fuel costs and increasing dependence on imported oil have triggered significant interest in increased aircraft engine efficiency by the U S Air Force To help address this need the Air Force asked the National Research Council NRC to examine and assess technical options for improving engine efficiency of all large non fighter aircraft under Air Force command This report presents a review of current Air Force fuel consumption patterns an analysis of previous programs designed to replace aircraft engines an examination of proposed engine modifications an assessment of the potential impact of alternative fuels and engine science and technology programs and an analysis of costs and funding requirements *Department of Defense Authorization for Appropriations for Fiscal Year 1985* United States.
