Essential for the high school and college math classrooms. Choosing the right notebook to start your journaling! Graph paper has lots of uses! It is great for learning math, science, writing, making patterns, and drawing shapes. We wanted to make this a little more than just plain graph paper so we put a small picture on each page. There is an object on the left page and a character on the right page. This is to encourage the thought process that leads to one of the most exciting uses of math out there! APPLIED SCIENCES! When kids learn how to do math it is amazing. A whole new language! When they learn about it AND think about a real-life situation where math is actually happening, it makes math even more special, useful, and lots of fun! Using the picture prompts to spark their imagination, they can write math word problems, draw mathematical pictures, color them, etc. The picture prompts will also help to develop a very important part of the brain, the photographic memory center! They may remember that they drew a really great star and you ask them "Where is that star you drew?" They may answer, "It is on the page with the elephant!" This graph paper notebook is a fun way to bring math to a whole new level. Applied Sciences are so important and truly exciting! There is even a 'Middle of the Book Invention Activity' and a few other educational surprises from the beloved animals (book characters) of AwesomeKids Press! Book Details: 8.5" x 11" 120 pages Perfectly sized for math, science, daily graph / grid notebook, journal, drawings, taking notes, lists, charts, architectural drawings, cross stitch, knitting patterns, floorplans, engineering, and many more!
