The Acquisition and Use of Yes-no Questions in English Oct 13 2023 This monograph offers a comprehensive account of the L1-acquisition and use of yes-no questions in English from a usage-based, construction grammar perspective. On the basis of the BNC and a high-density,

longitudinal CHILDES corpus, the book explores two issues which have largely been neglected in previous research: 1. the prevalence of non-canonical questions (such as elliptical and declarative questions) in adult-to-adult as well as child(-directed) speech and the L1-acquisition of these structures. 2. The discourse-functional properties of both canonical and non-canonical yes-no questions, especially with regard to their influence on the acquisition process.

Natural Language Processing in Artificial Intelligence – NLPinAI 2021 Oct 01 2022 The book covers theoretical work, approaches, applications, and techniques for computational models of information, language, and reasoning. Computational and technological developments that incorporate natural language are proliferating. Adequate coverage of natural language processing in artificial intelligence encounters problems on developments of specialized computational approaches and algorithms. Many difficulties are due to ambiguities in natural language and dependency of interpretations on contexts and agents. Classical approaches proceed with relevant updates, and new developments emerge in theories of formal and natural languages, computational models of information and reasoning, and related computerized

applications. Its focus is on computational processing of human language and relevant medium languages, which can be theoretically formal, or for programming and specification of computational systems. The goal is to promote intelligent natural language processing, along with models of computation, language, reasoning, and other cognitive processes.

Answering English Questions by Computer May 20 2024 Fourteen question-answering systems which are more or less completely programmed and operating are described and reviewed. The systems range from a conversation machine to programs which make sentences about pictures and systems which translate from English into logical calculi. Systems are classified as data based, text based, and inferential. Principals and methods of operations are detailed and discussed. It is concluded that the data base question answerer has passed from initial research into the developmental phase. The most difficult and important research questions for the advancement of general purpose language processors are seen to be concerned with measuring meaning, dealing with ambiguities, translating into formal languages and searching large tree structures. Question Bank of English Grammar & Composition Dec 03 2022 Learning is achieved through study & application. Application becomes fruitful through exercise. So, there is a question bank, which is handy for vast exercises in the process of application of knowledge acquired through study. A question bank is helpful for students, examinees (who are appearing in different competitive examinations), and this is also useful and time saver for teachers who by profession often have to set questions for their students. Peter's 'Question Bank of English

*Grammar & Composition'* includes question sets from *Parts of Speech to Analysis, Subject-Verb agreement, Moods, Voice & Narration Change, Tenses, Split-up and Joining*. The book also contains question sets relating *Phrasal Verbs (replacing words), Idioms (to find out their meanings), Identifying Clause, Phrase, Sentences (their types or class), Articles & Prepositions* as well. The book is designed as much topics of *English Grammar (which was possible)* to be included in, so that students from *Grade V to XII*, can take its help. All the questions relating *grammar & composition (grammatical)* are divided in 54 major sections or chapters in the attempt to cover as much questions to input what was possible for Mr. Peter. The questions are set along with some explanations too (including answers in tough fields) after or before each chapter begins; so that a learner (from V to XII) can grasp it (the *English Grammar*) without any difficulties and (s)he can write the answers of the questions which are set in, properly. With this, Mr. Peter feels gratitude for all those who are thinking to buy the book or have already bought. Thanking Mr. Peter
