The Patient Michael Palmer

The Patient Michael Palmer, 2000 Dr. Jessie Copeland is a respected neurosurgeon. She spends her days waging life and death battles in the OR and her spare time holed up in a lab leading the development of a tiny robot that could revolutionize brain surgery.

The Patient Michael Palmer, 2001-07-31 Neurosurgeon Jessie Copeland works at the very frontier of neurosurgery developing technology that could revolutionize the treatment of brain tumors. But her work brings her to the attention of an infinitely dangerous man. Claude Malloche is brilliant, remorseless, a terrorist without regard for human life. He is also ill with a brain tumor considered to be inoperable. Nothing can stop Malloche from getting to the woman he believes can cure him. For those caught in his path, the nightmare has just begun, and no one is more aware of the stakes than Jessie Copeland. In brain surgery, there are no guarantees, but that's exactly what Malloche demands. With disaster just one cut away, Jessie faces the most harrowing case of her life, and the price of failure may be thousands of lives.

The First Patient Michael Palmer, 2008-02-19 In his most high concept suspense novel to date, New York Times bestselling author Palmer delivers a thriller pitched at the crossroads of presidential politics and cutting edge medicine.

The First Patient Michael Palmer, 2008-12-30 Reunited with his former Annapolis roommate Andrew Stoddard, now president of the United States, when he is asked to become his personal physician, Gabe Singleton discovers that Andrew is going insane and that the condition may not be the result of natural causes.

Fatal Michael Palmer, 2003-09-30 From *The Sisterhood*, Michael Palmer's first New York Times bestseller to *The Patient*, his ninth, reviewers have proclaimed him a master of medical suspense. Recognized around the world for original, topical, nail-biting suspense, emergency physician Palmer's work has been translated into more than thirty-five languages. Now he reaches controversial and startling new heights in a terrifying tale of cutting edge microbiology, unbridled greed, and murder where either knowing too little or trusting too much can be FATAL. In Chicago, a pregnant cafeteria worker suffering from nothing more malevolent than flu-like symptoms begins hemorrhaging from every part of her body. In Boston, a brilliant musician, her face disfigured by an unknown disease, rapidly descends into a lethal paranoia. In Belinda, West Virginia, a miner suddenly goes berserk, causing a cave-in that kills two of his co-workers. Finding the link between these events could prove FATAL. Five years ago, internist and emergency specialist Matt Rutledge returned to his West Virginia home to marry his high school sweetheart and open a practice. He also had a score to settle: His father died while working for the Belinda Coal and Coke Company, and Matt swore to expose the mine's health and safety violations. When his beloved Ginny succumbed to an unusual cancer, his campaign became even more bitterly personal. Now Matt has identified two bizarre cases of what he has dubbed the Belinda Syndrome, caused, he is certain, by the mine's careless disposal of toxic chemicals. All he needs is proof. Meanwhile, two women, unknown to one another, are drawn inexorably to Belinda: into Matt's life and into mortal danger. Massachusetts coroner Nikki Solari comes to attend the funeral of her roommate killed
