Designing Solutions for Your Business Problems is an essential resource for managers and consultants who help organizations resolve ambiguous problems and develop new opportunities. Taking a hands-on, practical approach, Betty Vandebosch—a leading management consultant and educator—outlines the details on how to conduct a proven process for designing solutions. Designing Solutions for Your Business Problems will teach you how to curtail investigation and generate and justify ideas without sacrificing thoroughness, creativity, persuasiveness, and fit. You will be able to capitalize on more opportunities, and your problem-solving skills will become more efficient and your solutions more compelling. This book will help you design better solutions and design them faster. Betty Vandebosch offers a variety of useful techniques such as the "scooping diagram," which provides a framework for action, and the "logic diagram," which tests the validity of a potential solution. In addition, the book contains illustrative real-life examples of the Designing Solutions approach from a variety of organizations. How to Innovate and Execute Leaders already know that innovation calls for a different set of activities, skills, methods, metrics, mind-sets, and leadership approaches. And it is well understood that creating a new business and optimizing an already existing one are two fundamentally different management challenges. The real problem for leaders is doing both, simultaneously. How do you meet the performance requirements of the existing business—one that is still thriving—while dramatically reinventing it? How do you envision a change in your current business model before a crisis forces you to abandon it? Innovation guru Vijay Govindarajan expands the leader's innovation tool kit with a simple and proven method for allocating the organization's energy, time, and resources—in balanced measure—across what he calls "the three boxes":

- Box 1: The present—Manage the core business at peak profitability
- Box 2: The past—Abandon ideas, practices, and attitudes that could inhibit innovation
- Box 3: The future—Convert breakthrough ideas into new products and businesses

The three-box framework makes leading innovation easier because it gives leaders a simple vocabulary and set of tools for managing and measuring these different sets of behaviors and activities across all levels of the organization. Supported with rich company examples—GE, Mahindra & Mahindra, Hasbro, IBM, United Rentals, and Tata Consultancy Services—and testimonies of leaders who have successfully used this framework, this book solves once and for all the practical dilemma of how to align an organization on the critical but competing demands of innovation. The bold and innovative McGraw-Hill Taxation series is now the most widely adopted code-based Tax title across the country. It's apparent why the clear, organized, and engaging delivery of content, paired with the most current and robust tax code updates, is used by more than 600 schools. The breadth of the topical coverage, the storyline approach to presenting the material, the emphasis on the tax and non-tax consequences of multiple parties involved in transactions, and the integration of financial and tax accounting topics make this book ideal for the modern tax curriculum. Story line Approach: Each chapter begins with a story line that introduces a set of characters or a business entity facing specific tax-related situations. Examples related to the story line allow

students to learn the code in context. Integrated Examples: In addition to providing examples in-context, we provide "What if" scenarios within many examples to illustrate how variations in the facts might or might not change the answers. More than 100 Videos: Guided Example hint videos provide students with on-demand walk-throughs of key Tax topics, offering narrated, animated, step-by-step solutions to algorithmic variants for select exercises similar to those assigned. Conversational Writing Style, Superior Organization, and Real-World Focus Currently doing double duty when it comes to financial reporting, accounting and information technology professionals have the unique opportunity to improve efficiency by downsizing into one department. Event-Driven Systems explains why this is an important cost-saving measure and shows how to put this revolutionary idea into practice. The authors challenge traditional thinking about accounting and information technology processes and the roles of the professionals who work in these specialized environments. Can an employee-owned company succeed? Here is the inside story of one that thrived and grew to become a significant force in the nation's scientific and technical markets. In 1969, Dr. J. Robert Beyster founded Science Applications International Corporation (SAIC) with a unique vision of creating an employee-owned organization run according to 12 principles of success that encourage entrepreneurship and accountability. Today, SAIC has grown from a handful of scientists to over 43,000 employees—most of whom hold company equity—and more than \$8 billion in annual revenue, a steadily rising stock price, and top rankings as a contractor to government and business organizations. In this book, Dr. Beyster tells the story of SAIC, and offers valuable lessons to entrepreneurs and managers on how to build a company in which loyalty to values goes hand in hand with success. Dr. J. Robert Beyster (La Jolla, CA) is the founder of Science Applications International Corp. (SAIC). He served as CEO and chairman of the company for 35 years. Beyster continues to promote innovation and employee ownership through his Foundation for Enterprise Development and the Beyster Institute at the Rady School of Management at the University of California, San Diego. Peter Economy (La Jolla, CA) is Associate Editor of Leader to Leader, the award-winning publication for the Leader to Leader Institute, and a bestselling author of titles such as *The Management Bible* (0-471-70545-4) and *Enterprising Nonprofits: A Toolkit for Social Entrepreneurs* (0-471-39735-0). *Government Alone Can't Solve Society's Biggest Problems* World hunger. Climate change. Crumbling infrastructure. It's clear that in today's era of fiscal constraints and political gridlock, we can no longer turn to government alone to tackle these and other towering social problems. What's required is a new, more collaborative and productive economic system. *The Solution Revolution* brings hope—revealing just such a burgeoning new economy where players from across the spectrum of business, government, philanthropy, and social enterprise converge to solve big problems and create public value. By erasing public-private sector boundaries, the solution economy is unlocking trillions of dollars in social benefit and commercial value. Where tough societal problems persist, new problem solvers are crowdfunding, ridesharing, app-developing, or impact-investing to design innovative new solutions for seemingly intractable problems. Providing low-cost health care, fighting poverty, creating renewable energy, and preventing obesity are just a few of the tough challenges that also represent tremendous opportunities for those at the vanguard of this movement. They create markets for social good and trade solutions instead of dollars to fill the gap between what government can provide and what citizens need. So what drives the solution economy? Who are these new players and how are their roles changing? How can we grow the movement? And how can we participate? Deloitte's William D. Eggers and Paul Macmillan answer these questions and more, and they introduce us to the people and organizations driving the revolution—from edgy social enterprises growing at a clip of 15 percent a year, to megafoundations, to Fortune 500 companies delivering social good on the path to profit. Recyclebank, RelayRides, and LivingGoods are just a few of the innovative organizations you'll read about in this book. Government cannot handle alone the huge challenges facing our

global society—and it shouldn't. We need a different economic paradigm that can flexibly draw on resources, combine efforts, and create value, while improving the lives of citizens. The Solution Revolution shows the way. Consists of 11 modules: Business entities 6 v. What people are saying about The New How "How are you going to get rid of your Air Sandwich if you don't even know what it is? Provocative and practical at the same time." --Seth Godin, author of Linchpin "The New How is informative and provides exciting insights because the suggestions are practical and doable. Merchant gets the new reality--leadership fails not so much from flawed strategy as it does from failed processes of engagement from those responsible for implementing the strategy. In high-performing organizations, everyone acts like a leader, and they own the strategy and take actions to ensure its success. If you care about making a difference, read this book." --Barry Posner, author of The Leadership Challenge "Collaboration is a powerful, competitive weapon: this book shows you how to use it to win markets." --Mark Interrante, VP Content Products, Yahoo, Inc. "In a world in which the pace of change is ever quickening, collaboration, not control, is the route to a successful organization. This book tells you how to make your

organization collaborative. And Nilofer Merchant's writing is a model of clarity." --Barry Schwartz, author of *The Paradox of Choice: Why More Is Less* "Want to transform your organization into a collaborative enterprise? Nilofer Merchant provides insightful and practical strategies in *The New How*." --Padmasree Warrior, CTO, Cisco Systems, Inc. "Merchant's book is a practical guide for the journey from strategy to implementation. The collaborative tools described here can help companies reach strategic success--and avoid pitfalls along the way." --Tom Kelley, General Manager, IDEO, and author of *Ten Faces of Innovation* Once in a generation, a book comes along that transforms the business landscape. For today's business leaders, *The New How* redefines the way companies create strategies and win new markets. Management gurus have always said "people matter." But those same gurus still relegate strategy to an elite set of executives who focus on frameworks, long presentations, and hierarchical approaches. Business strategy typically has been planned by corporate chiefs in annual meetings, and then dictated to managers to carry out. *The New How* turns that notion on its head. After many years of working with Apple, Adobe, HP, and many other companies, Nilofer Merchant discovered the secret sauce: the best way to create a winning strategy is to include employees at all levels, helping to create strategy they not only believe in, but are also equipped to implement. In *The New How*, Nilofer shows today's corporate directors, executives, and managers how they can transform their traditional, top-down approach to strategy planning and execution into collaborative "stratecution" that has proven to be significantly more effective. Enhance performance and outcomes by deflating the "air sandwich" between executives in the boardroom and employees Recognize that strategy and execution are thoroughly intertwined Understand how successful strategy is founded in effective idea selection-a pile of good ideas doesn't necessarily build good strategy Create company strategy and link it to targeted execution, using the practical models and techniques provided This book provides business developers and architects the information they need to successfully implement business intelligence solutions using Information Bridge Framework and Visual Studio .NET. What if the distinction between business and doing good vanished? What if all those who engaged in business were committed to a deeper purpose, and all those committed to doing good were entrepreneurial and enterprising? What would it take for a world of seven billion such people to solve all the world's problems? More and more people are looking for meaning and purpose in their lives as employees, as consumers, and as investors. More and more people have more than enough material goods and are more interested in the qualities of the goods they buy; in the experiences associated with the services they provide and buy; in the way the companies they buy from act as citizens; and in self-actualization—rising up Maslow's hierarchy. As an increasing percentage of the population reaches the point at which they no longer need more stuff, what will they do, how will they live their lives? If you are one of these people, wondering where to go from here, how to "be the solution" in the twenty-first century, *Be the Solution* provides an original perspective on how to create a better world. Focused entirely on entrepreneurial and Conscious Capitalist solutions to the challenges and opportunities facing humanity, *Be the Solution* shows how the entrepreneurial passion to create a better world, in combination with Conscious Capitalist business practices, can solve far more of the world's problems than any other approach. In combination with leading Conscious Capitalists such as John Mackey writing on "Conscious Capitalism," leading social entrepreneurs such as Muhammad Yunus writing on "Social Business," and leading legal reform experts such as Hernando de Soto writing on "Is Economic Freedom for Everyone?," entrepreneurial educator Michael Strong lays out a philosophical, social, and legal framework for a FLOW vision through which all problems may be solved entrepreneurially. FLOW, Inc., is an organization cofounded by John Mackey and Michael Strong to promote Mihaly Csikszentmihalyi's concept of flow as optimal experience—the state in which we are so immersed in challenging, creative activity that we forget that time is passing. To be engaged in

flow activities is happiness itself. Whether we are creators of enterprises or entrepreneurially creative within our life as employees, we can embody the entrepreneurial spirit and, in the words of Michelangelo, "criticize by creating." In addition, FLOW refers to the global flow of goods, services, capital, humans, ideas, and culture, in a positive win-win-win world based on love rather than fear. Combining the best of the positive psychology and human potential movements with the best of free market thinking, FLOW offers a unique perspective on how to Be the Solution in the twenty-first century. This book is about IT architecture set against the background of the practical insights gained at HP (Hewlett-Packard) since 1986 and formalized in the HP methodology for IT Strategy and Architecture (ITSA). The important message is that architecture is used to solve problems or exploit opportunities and is not used for the sake of architecture. Core to this is the concept of a seamless chain of justification that unites stakeholders in defining, reinforcing, and supporting the single best fitting IT business solution. This book teaches the IT architecture practitioner how to align the different views and interests of these stakeholders into coherent IT architecture artifacts by permeating the business, functional, technical, and implementation perspectives. World leaders have given the reduction of global poverty top priority. And yet it persists. Indeed, in many countries whose governments lack either the desire or the ability to act, poverty has worsened. This book, a joint venture of a Harvard professor and an economist with the International Finance Corporation, argues that the solution lies in the creation of a new institution, the World

Development Corporation (WDC), a partnership of multinational corporations (MNCs), international development agencies, and nongovernmental organizations (NGOs). In *A Corporate Solution to Global Poverty*, George Lodge and Craig Wilson assert that MNCs have the critical combination of capabilities required to build investment, grow economies, and create jobs in poor countries, and thus to reduce poverty. Furthermore, they can do so profitably and thus sustainably. But they lack legitimacy and risk can be high, and so a collective approach is better than one in which an individual company proceeds alone. Thus a UN-sponsored WDC, owned and managed by a dozen or so MNCs with NGO support, will make a marked difference. At a time when big business has been demonized for destroying the environment, enjoying one-sided benefits from globalization, and deceiving investors, the book argues, MNCs have much to gain from becoming more effective in reducing global poverty. This is not a call for philanthropy. Lodge and Wilson believe that corporate support for the World Development Corporation will benefit not only the world's poor but also company shareholders as a result of improved MNC legitimacy and stronger markets and profitability.
