It is strongly recommended that you follow these step-by-step numbered instructions to set up and quickly begin using your new C-4000 Zoom digital camera.

START HERE

For more detailed instructions on advanced features, please refer to the printed Basic Manual included on your package, or the Reference Manual on the CD-ROM.

1 UNPACKING THE BOX CONTENTS

Gather your C-4000 Zoom and all of the parts as shown in the illustrations. You'll need these to complete the steps for the camera setup procedures that follow.

The following items are also included in the C-4000 Zoom package: Video cable, SmartMedia card converters, Basic Manual, warranty card, registration card, safety precautions booklet, and SmartMedia write-protect adhesive caps.

2 PREPARE THE CAMERA FOR USE

Before you begin using your Olympus C-4000 Zoom Digital Camera...

a. Load the batteries

The CR-V3 lithium batteries included with your C-4000 Zoom are much more powerful than standard AA alkaline batteries. Please make sure they are not rechargable.

Load the two CR-V3 lithium batteries. Make sure they can only be inserted with the indentations facing each other. The contact terminals must be inserted first, as shown at right. Heavier force battery insertion. When loading CR-V3 batteries ignore the illustration on the camera body.

If you are loading four AA type batteries into the compartment, load them as indicated in the illustration on the camera body. Close the cover and lock the battery compartment door.

NOTE: For best results, Olympus strongly recommends using two AA nickel metal hydride (NiMH) rechargeable batteries. An optional Olympus AC adapter also is available, and is recommended when shooting long to ensure a constant power supply. See the C-4000 Zoom Basic Manual for more information on battery use.

b. Insert the SmartMedia™ Card

The SmartMedia™ card is where the camera stores your pictures. The pictures you take remain on the SmartMedia card even when the camera is turned off and/or the batteries are removed.

First, make sure the camera is OFF. Open the card cover door. Note the diagram on the inside of the door for the orientation of the SmartMedia card in the diagram, and slide the card into the spring-loaded slot as far as it will go. Close the cover until it locks into place; you will feel it snap closed.

WARNING: Avoid opening the card cover, removing the SmartMedia card, or removing the batteries while the camera is ON. Doing so could damage all pictures stored on the SmartMedia card.

To remove a SmartMedia card, push it into the camera, and then release it. The card partially ejects and can now be removed.

c. Attach the carrying strap and lens cap retainer string (optional)

We recommend that you attach the strap and lens cap retainer string at this time to make the camera easier to handle and prevent loss of the lens cap. Attach the strap as illustrated.

3 TURNING ON THE CAMERA

The camera Power/Mode dial is used to select the various operation modes.

a. Turn the camera ON

- Squeeze the tabs on the sides of the lens cap to remove it.
- Turn the Power/Mode dial counter-clockwise to the "P" position. The monitor will activate briefly, and then turn off.

NOTE: To maximize battery life, the C-4000 Zoom features a power saving mode in which the camera enters a sleep mode after approximately three (3) minutes of inactivity. Press the shutter button or power button to wake up the camera.

b. Set the Date and Time (optional)

Although this is not required, it is recommended that you set the date and time. This affects the way image files are named, and each picture will be recorded with this information.

- Set the mode dial to "P" and press \square . The monitor turns on and the top menu appears.
- Press \square on the screen panel to select [DATE/TIME].
- To access the Date/Time menu, press \square three (3) times to scroll to the SET sub. Then press \square .
- Use the \leftarrow and \rightarrow keys to select \square , and then press \square .
- Press the \uparrow and \downarrow keys to select the desired date format (usually MM, DD, YY).
- Press \square to proceed to the next field. Adjust the date and time on the appropriate fields using the \uparrow and \downarrow keys. Repeat the process until all date/time fields have been set.
- Press \square twice to set the date and time and exit the menu.

c. Camera Diagram and Controls

Now take a moment to familiarize yourself with the key areas of camera controls by reviewing the illustrations.
