The Public Bank Solution Ellen Hodgson Brown,2013-06-01 WHAT WALL STREET DOESN T WANT YOU TO KNOW Shock waves from one Wall Street scandal after another have completely disillusioned us with our banking system yet we cannot do without banks Nearly all money today is simply bank credit Economies run on it and it is created when banks make loans The main flaw in the current model is that private profiteers have acquired control of the credit spigots They can cut off the flow direct it to their cronies and manipulate it for personal gain at the expense of the producing economy The benefits of bank credit can be maintained while eliminating these flaws through a system of banks operated as public utilities serving the public interest and returning their profits to the public This book looks at the public bank alternative and shows with examples from around the world and through history that it works admirably well providing the key to sustained high performance for the economy and well being for the people **The Global Findex Database 2017** Asli Demirguc-Kunt,Leora Klapper,Dorothe Singer,Saniya Ansar,2018-04-19 In 2011 the World Bank with funding from the Bill and Melinda Gates Foundation launched the Global Findex database the world s most comprehensive data set on how adults save borrow make payments and manage risk Drawing on survey data collected in collaboration with Gallup Inc the Global Findex database covers more than 140 economies around the world The initial survey round was followed by a second one in 2014 and by a third in 2017 Compiled using nationally representative surveys of more than 150 000 adults age 15 and above in over 140 economies The Global Findex Database 2017 Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services It has additional data on the use of financial technology or fintech including the use of mobile phones and the Internet to conduct financial transactions The data reveal opportunities to expand access to financial services among people who do not have an account the unbanked as well as to promote greater use of digital financial services among those who do have an account The Global Findex database has become a mainstay of global efforts to promote financial inclusion In addition to being widely cited by scholars and development practitioners Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals The database the full text of the report and the underlying country level data for all figures along with the questionnaire the survey methodology and other relevant materials are available at www.worldbank.org/globalfindex E-Banking Management: Issues, Solutions, and Strategies Shah, Mahmood,Clarke, Steve,2009-05-31 This book focuses on human operational managerial and strategic organizational issues in e banking Provided by publisher CORE BANKING SOLUTION M.
