Meet Malik Sykes, an African-American Muslim whose life is at a crossroads. With his illustrious career in the U.S. Marines cut short due to an injury, Malik retires honorably but feels lost. Until his friend and former Commander Lincoln Thomas becomes the U.S. Ambassador to Indonesia, and makes him Chief of Security at the U.S. Embassy in Jakarta. While in this new world, Malik meets and falls for Zarah Suryani, a young Indonesian Muslim woman who's studying Law at Trisakti University while working as caretaker for the local mosque. Sparks fly between these wounded souls. Malik still misses his military life, and Zarah is caught between tradition and pursuing her own path. They are passionate lovers and devout Muslims from different nations and lifestyles. Can they make their fledgling relationship work ? This text is designed to present a comprehensive and state-of-the-art approach to robotic female pelvic reconstructive surgery. Written by experts in both urology and urogynecology, each of these sections address patient selection, pre-operative considerations, surgical technique, and management of intra and post –operative complications. Furthermore, each chapter includes the most current evidence in the literature that supports specific techniques. Extensive illustrations make this an interactive text. Emphasis is placed on sacrocolpopexy, the mostly commonly performed robotic procedure performed in female pelvic medicine. The set up of this operation, surgical technique, and tips and tricks are discussed. In addition, the management of the uterus is also be addressed in detail, including supracervical and total hysterectomy, as well as uterine-sparing techniques. The appropriate preoperative evaluation, including decisions to be made in addressing concomitant surgical conditions such as stress urinary incontinence, is addressed so that the reader can provide comprehensive management for all surgical pelvic floor disorders. Other reconstructive procedures covered include controversial topics such as power morcellation of the uterus and placement of vaginal mesh. The text will also include elements that pertain to male and female patients, such as ureteral reimplantation and sigmoid resection. The Use of Robotic Technology in Female Pelvic Floor Reconstruction will be invaluable to both urologists and gynecologists in the field.

Ini adalah satu kisah dari sang waktu tentang mereka yang menunggu. Cerita seorang perempuan yang bersembunyi di balik halaman buku dan seorang lelaki yang siluetnya membentuk mimpi di liku tidur sang perempuan. Ditemani krat-krat berisi botol vintage wine yang berdebu, aroma rasa yang menguar dari cairan anggur di dalam gelas, derit kayu di rumah usang, dan lembar kenangan akan masa kecil di dalam ingatan. Pertemuan pertama telah menyeret keduanya masuk ke pusaran yang tak bisa dikendalikan. Menggugah sesuatu yang telah lama terkubur oleh waktu di dalam diri perempuan itu. Membuat ia kehilangan semua kata yang ia tahu untuk mendefinisikan dan hanya menjelma satu nama: lelaki itu. Sekali lagi, ini adalah sepotong kisah dari sang waktu tentang menunggu. Kisah mereka yang pernah hidup dalam penantian dan kemudian bertemu cinta. -GagasMedia- #PromoBulanCinta #PromoBulanCintaGagasmedia Well over 4,000 pages ... Developed by I Corps Foreign Language Training Center Fort Lewis, WA For the Special Operations Forces Language Office United States Special Operations Command LANGUAGE TRAINING The ability to speak a foreign language is a core unconventional warfare skill and is being incorporated throughout all phases of the qualification course. The students will receive their language assignment after the selection phase where they will receive a language starter kit that allows them to begin language training while waiting to return to Fort Bragg for Phase II. The 3rd Bn, 1st SWTG (A) is responsible for all language training at the USAJFKSWCS. The Special Operations Language Training (SOLT) is primarily a performance-oriented language course. Students are trained in one of ten core languages with enduring regional application and must show proficiency in speaking, listening and reading. A student receives language training throughout the Pipeline. In Phase IV, students attend an 8 or 14 week language blitz depending upon the language they are slotted in. The general purpose of the course is to provide each student with the ability to communicate in a foreign language. For successful completion of the course, the student must achieve at least a 1/1/1 or higher on the Defense Language Proficiency Test in two of the three graded areas; speaking, listening and reading. Table of Contents Introduction Introduction Lesson 1 People and Geography Lesson 2 Living and Working Lesson 3 Numbers, Dates, and Time Lesson 4 Daily Activities Lesson 5 Meeting the Family Lesson 6 Around Town Lesson 7 Shopping Lesson 8 Eating Out Lesson 9 Customs, and Courtesies in the Home Lesson 10 Around the House Lesson 11 Weather and Climate Lesson 12 Personal Appearance Lesson 13 Transportation Lesson 14 Travel Lesson 15 At School Lesson 16 Recreation and Leisure Lesson 17 Health and the Human Body Lesson 18 Political and International Topics in the News Lesson 19 The Military Lesson 20 Holidays and Traditions This book tries to help university students to possess necessary communicative English proficiency. The materials and exercises are designed to allow students to have a lot of practices through interactions and collaborations. The book with ten units are meant to provide learning experiences for sixteen meetings in one semester. In the first meeting, lecturers are expected to provide necessary orientation of the book, discuss the classroom rules and deliver necessary assessment for initial information of the existing proficiency of the students. Two meetings are usually devoted for mid-term and final-term formal assessments. Ten meetings are for the ten units covered in this book. One meeting is for performance-based assessment after learning the first five units. One other meeting is for performance-based assessment after learning the second half of the book. Finally, one meeting is for reviewing all the lessons prior to the final-term assessment. Ini cinta yang sulit. Kau dan aku ditakdirkan tak saling memiliki. Aku tak bisa mencintaimu seperti yang aku mau. Namun, ketika dia hadir dalam hidupmu—di antara kita—aku pun sadar kebahagiaanku pelan-pelan akan memudar. Betapa tidak, dia bisa memberimu cinta dan perhatian. Menggenggam tanganmu hingga akhirnya kau terlelap di sisinya. Dia melakukan semua yang ingin aku berikan kepadamu. Dan hari ini, aku memandangi senja pertama yang kunikmati tanpa dirimu. Aku belajar berbahagia untukmu. Dia yang paling tepat. Aku tahu itu—tapi..., bagaimana denganku? Bagaimana caraku bahagia tanpa dirimu? -GagasMedia- #PromoBulanCinta #PromoBulanCintaGagasmedia Diamond is an extreme material among possible atomic aggregations in nature, and as such has many extreme properties. This unique position makes it a fascinating subject both for science and for

applications. This has been particularly true in recent years, since the surprising discovery at Union Carbide (1953) of the possibility of chemical vapour deposition of diamond films at low pressures, where diamond is metastable with respect to graphite. This discovery cleared the way to the development of economical deposition techniques that have been obtaining progressively better-quality diamond, both pure and doped, in a controlled way and for a variety of applications. The remarkable properties and applications range from mechanical (the extreme hardness, tensile and compressive strength, wear performance) to thermal (the highest conductivity), optical (wide range of transparency), chemical (inertness to most chemicals), biological (biocompatibility) and electronic (high electronic carrier mobility, large band gap and dielectric breakdown strength, negative electron affinity), with the simultaneous presence of so many extraordinary qualities often resulting in added value for a given application. We are presently at a turning point in the development of diamond physics and applications. While some achievements can be considered well established, on the other hand, new opportunities and challenges are facing the scientific community, particularly with regard to novel exciting deposition processes and techniques or new properties and applications in electronics. This Enrico Fermi Course on "The Physics of Diamond" is particularly focused on the new developments and prospects, which may well constitute a reference point for a new generation of scientists at what may possibly be the beginning of a new age in diamond. The course attracted several of the most distinguished experts in the field as lecturers and an audience of almost as distinguished students and observers from 19 countries. Participation and discussions were lively to the very last day, ranging from traditional diamond physics to new diamond physics, and from well-known applications to the new exciting opportunities. The material in this volume is organized in the following way: the first part (13 lectures) is essentially devoted to growth and structure, the second part to properties and applications, with a closing lecture exploring new exotic diamonds in the distant future. The earlier lectures extensively cover the many processes of plasma chemical vapour deposition, including advanced contributions in theoretical modelling of these processes. Novel deposition mechanisms are considered: low-temperature CVD and laser-activated processes, including the so-called QQC experiments. This first part closes with a discussion of amorphous phases. In the second part, particular emphasis is placed on electronic properties and applications. This includes an extensive discussion of doping and, in addition, the promising perspectives of diamond as an electron emitter. Its newly discovered remarkable electron affinity properties lead to a new dimension in research and development, of great strategical importance for an increasing role of diamond in electronics. Vols. for 1963- include as pt. 2 of the Jan. issue: Medical subject headings. Issues in Genitourinary Medicine / 2011 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Genitourinary Medicine. The editors have built Issues in Genitourinary Medicine: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Genitourinary Medicine in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Genitourinary Medicine: 2011 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>. Minimally Invasive Therapy for Urinary Incontinence and Pelvic Organ Prolapse provides a detailed insight into "when, why, what and how" of various minimally invasive surgical procedures for surgical management of SUI, OAB & POP. The volume provides detailed diagrammatic and pictorial step-by-step descriptions of the techniques and management of complications related to these procedures. This book also presents an up to date, one-stop reference for anything pertaining to MIT of these pelvic disorders. Written by experts in the field, Minimally Invasive Therapy for Urinary Incontinence and Pelvic Organ Prolapse is a comprehensive resource designed for both the urologist and urogynecologist

treating patients with urinary disorders and pelvic organ prolapsed, as well as for residents in training. This book covers issues of men's health, including screening, diagnosis and management of common disorders and opportunities for prevention and health maintenance. Each chapter pertains to a component of the physical exam and/or organ system. Examples include appropriate survey and screening of the integument, the significance of buccal/dental integrity, tailoring cardiovascular remedies and balancing prostate cancer screening with quality of life. The book follows the methodical approach of a comprehensive wellness visit, including inventory of psychosocial factors, which significantly impact physical well-being. Justification for often overlooked topics in the review of systems, such as sexual history and satisfaction, relationship issues, and vocational fulfillment are provided. This book is written in the spirit of the rich bedside acumen and the art of healing, we must strive to protect. While informative and stimulating, this text serves to remind us of the specialized diagnostic tools we carry between our ears, and the power of healing we possess in our hands as well as the counsel and education we provide to our patients. Men's Health: A Head to Toe Guide for Clinicians serves as an important and readily accessible resource for primary care physicians, internists and family doctors, physician's assistants and nurse practitioners who care for adult males. The most comprehensive textbook in the field edited by the founding father of endourology returns for a new edition. In full colour throughout and packed with surgical teaching videos, this is an essential purchase for all urologists wishing to master their skills. Issues in Cardiovascular Medicine / 2011 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Cardiovascular Medicine. The editors have built Issues in Cardiovascular Medicine: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Cardiovascular Medicine in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Cardiovascular Medicine: 2011 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>. Building on the foundation laid down by the first edition, the 1998 winner of the Royal Society's award for the Multi-author Textbook of the Year, Imaging in Oncology, Second Edition presents an extensively referenced, evidence-based analysis of the role of imaging in planning treatment. Emphasizing image interpretation for tumor staging and follow This book introduce neurourology as an emerging interdisciplinary area that covers the basic and clinical studies of the neural control on the normal lower urinary tract and the lower/upper urinary tract dysfunction due to neuropathy disorders. It systematically describes all aspects of neurourology from the epidemiology of the neurogenic bladder; to the pathology and pathophysiology of the lower urinary tract; to the diagnosis and treatment of the neurogenic bladder by conservative therapies or surgeries. This book provides a useful resource for medical doctors, nurses and students in the field of neurourological conditions. All the topics are written by internationally recognized specialists in their field. What is bioengineering all about? How will it impact the future? Can it find the cure for diabetes and other chronic diseases? A long-awaited continuation of the 2004 book, Understanding the Human Machine: A Primer for Bioengineering, this volume intends to address these questions and more. Written together with 18 scientists active in the field, Max E. Valentinuzzi brings his decades of teaching bioengineering and physiology at the undergraduate and graduate levels to readers, giving a profound, and sometimes philosophical, insight into the realm of bioengineering. Urethral injury may be of secondary importance when the patient comes into the emergency room, but devastating urological complications, such as sexual dysfunction, incontinence, and stricture, may drastically impair quality of life in the long term. This book provides a comprehensive review of adult urethral reconstructive surgery. It evaluates complex urethral problems and includes practical aspects of wound healing and applicable plastic surgical

techniques. A book full of mixed feelings between past love and heart breaks, gratitude for the present moments and excitement for the future. Past is over, present is here, and future awaits. You will find the emotions, loves and hopes every time you read every chapter of this book. Love gives us so many questions sometimes and most of the time the answer is already there within us, we have it all already. Find out more here in PROMISES..

Pediatric Urology: Evidence for Optimal Patient Management provides pediatric urologists the information needed for state-of-the-art patient care. Chapters are organized around pertinent clinical questions within major areas of pediatric urology, answered using the best available data while also reporting areas for which there is poor evidence. The text includes randomized controlled trials and prospective observational studies, tables that summarize important studies, and figures that illustrate algorithms with best options for management and their expected results. With an easy to use format not found in other volumes, **Pediatric Urology: Evidence for Optimal Patient Management** is an indispensable and unique resource for experienced pediatric urologists, pediatric surgeons, general urologists with an interest in pediatric urology, as well as fellows and residents in training.

Since the invention of pen and paper, four books have been studied and analyzed more than all others: the Torah, the Gospel, the Qur'an, and Sahih Al-Bukhari. While there have been numerous translations of the first three, there has never been a complete translation of Sahih Al-Bukhari—due to its immense size and utter complexity—until now. After more than ten years of continuous research and translation by multiple layers of linguists, the Arabic Virtual Translation Center is pleased to announce the publication of the first-ever complete English translation of Sahih Al-Bukhari with full sanad and commentary. This is a full and accurate translation of Sahih Al-Bukhari from cover to cover with the addition of explanatory notes, a glossary of every term, and biographies of all characters. Sahih Al-Bukhari is the biggest collection of authentic hadiths. It lays the foundation of Islam and encompasses all the sharia laws. It details the building blocks of the religion and those who constructed them from the Prophet to the Sahabah to the Tabi`un and everyone who influenced them. It is a well-organized labyrinth of Islamic history that describes every precept and explains it thoroughly. Virtually all books about Islam, from those taught in kindergarten to the ones lectured at Azhar University, are interpretations of Sahih Al-Bukhari. Now, with this encyclopedia in hand, we have the opportunity not to rely solely on the works of shady characters, revisionists, or those with ulterior motives. We can retrieve information from its original source in raw format, connect all the dots, and draw our own conclusions. The entire encyclopedia is in full color and is easy to read and understand. It is recommended that it be viewed on a color monitor to easily distinguish between the different features. It is highly advised to peruse the extensive introduction to hadith by the translators before studying Sahih Al-Bukhari. This digital version has links to every entry and similar hadiths to facilitate the comprehension of each story in full. The encyclopedia is under constant review and is continuously revised and updated. Each update is assigned a distinct version number. It is only once in a generation that a must-read encyclopedia of this magnitude comes to life, and all of us can benefit from it. Benefit from it in this life and the life to come.

Advanced Urologic Surgery is a stimulating operative atlas which includes the latest innovations, modifications, and improvements in the field, edited by a distinguished international team. The text is divided into sections; kidney and ureter bladder prostate external genitalia female urology urinary diversion special techniques. It is further divided into sub-sections, each devoted to a specific urologic operative procedure, graded according to its standardisation and acceptance by the wider surgical community. The text is descriptive and is complimented by over 800 clear operative line illustrations providing a step-by-step approach. The end result is an exciting survey of the practical applications of the latest techniques. Joining Professor Hohenfellner as Editor is Professor John Fitzpatrick, one of the most prominent figures on the world urology scene and the editor of leading urology journal, BJU International. In addition to John Fitzpatrick, the book will feature Professor Jack McAninch from the USA as an editor. Jack McAninch based at San Francisco General Hospital, is one of the true giants of American urology, current President of the Societe Internationale d'Urologie, and past President of

the American Urological Association. All chapters include a list of key references explaining the practical application of the latest techniques in urologic surgery - essential reading for urologists in both practice and training. This book is an easily accessible reference guide for any practitioner encountering urologic symptoms or disease. It uses the famous two-page layout and outline format of The 5-Minute Consult Series. The book provides instant access to clinically-oriented, must-have information on all urogenital problems in adults and in pediatric patients. It also includes a section of algorithms for the most common or problematic diagnoses. This book introduces neurourology as an emerging interdisciplinary area that covers the basic and clinical studies of the neural control on the normal lower urinary tract and the lower/upper urinary tract dysfunction due to neuropathy disorders. It systematically describes all aspects of neurourology from the epidemiology of the neurogenic bladder; to the pathology and pathophysiology of the lower urinary tract; to the diagnosis and treatment of the neurogenic bladder by conservative therapies or surgeries. This book provides a useful resource for medical doctors, nurses and students in the field of neurourological conditions. In this 2nd edition, 15 chapters are added, e.g. on urodynamic practice, psychogenic reasons of LUTDs, standard of care, physiotherapy, upper urinary tract rehabilitation to enable self-catheterization, pediatric neurourology, new surgical procedures. The editors have invited an impressive number of renowned contributors, including 98 internationally recognized specialists in this field from 25 countries in Europe, Asia, North America, and South America. This handbook provides a useful resource for medical doctors, nurses and students in the field of neurourological conditions. Thirty years ago, Alan, Patrick, and Guinevere-"the Trio"-became the best of friends while stealing from Checker's Casual Cafe, the busiest restaurant in town. But the trio didn't just take money-what happened in '91 was no less than diabolical. Cicadas attacked customers, out-of-hand pranks collapsed the kitchen ceiling, and the Phantom of the Restaurant brought havoc to the dining room-all against a background of blaring eighties music. Sharon Donovan, the restaurant's general manager, was literally ready to kill someone when police were finally called. Fifteen years later, Guinevere is mortally wounded in a horrific car accident. As Alan and Patrick rush to her side, her deathbed confession is chilling: "The worst thing about my depression is that it has a sense of humor." In her dying breath, Gwen asks Alan to take care of Stephanie, her teenage daughter-"As you once took care of me, when we all worked together at Checker's." And as Steph brings back memories of the best time in his life, Alan makes a very bad decision... But karma is a bitch, and Patrick's arrest on returning to his Nevada home makes national news. His frantic cry for help sends Alan and Stephanie on a cross-country trip-where evidence reveals a disturbing connection between the Trio that began years before Checker's. It's eerie how current events mirror those from decades ago, and past-and-present stories play out side by side. Without Alan's help, Patrick will go to prison...but as Sharon Donovan learned the hard way, it's often those you trust the most who blindside you with their behaviors... No matter how far you run, the past will always catch up with you. And once it does, it will serve a dish best cold. The basic anatomy and physiology of the urinary tract, the validity of animal models and other methodological considerations as well as a range of potential therapeutic targets are comprehensively reviewed by leading international experts, making this a unique reference source for basic scientists and research-minded clinicians alike. Spanning a wide range of medical specialties and practice settings, Diagnostic Ultrasound, 6th Edition, provides complete, detailed information on the latest techniques for ultrasound imaging of the whole body; image-guided procedures; fetal, obstetric, and pediatric imaging; and much more. This thoroughly revised, two-volume set, edited by Drs. Carol M. Rumack and Deborah Levine, remains the most comprehensive and authoritative ultrasound resource available. Up-to-date guidance from experts in the field keep you abreast of expanding applications of this versatile imaging modality and help you understand the "how" and "why" of ultrasound use and interpretation. Covers all aspects of diagnostic ultrasound with sections for Physics; Abdominal, Pelvic, Small Parts, Vascular, Obstetric, and Pediatric Sonography. Contains 5,000 images throughout, including 2D and 3D imaging as well as the use of contrast agents and elastography. Includes a new

section on setting up a contrast lab for clinical practice and a new chapter on hemodialysis. Features new coverage of the parotid, salivary, and submandibular glands, as well as the retroperitoneum, which now includes a section on endoleaks with ultrasound contrast. Uses a straightforward writing style and extensive image panels with correlative findings. Includes 400 video clips showing real-time scanning of anatomy and pathology. Examines both mined and synthetic diamonds and diamond films. The text offers coverage on the use of diamond as an engineering material, integrating original research on the science, technology and applications of diamond. It discusses the use of chemical vapour deposition grown diamonds in electronics, cutting tools, wear resistant coatings, thermal management, optics and acoustics, as well as in new products. This book discusses all aspects of sexuality in women and in particular explores sexual function and dysfunction in a variety of settings, including the different stages of life and a wide range of major diseases and local conditions. The aim is to refocus attention on the needs and sexual realities of women, providing a fresh point of view that will assist gynecologists, sexual medicine physicians, and urologists in delivery of high-quality care and help women themselves to understand and address sexual problems relating to desire, arousal, orgasm, and sexual pain. Psychological aspects of female sexuality and the impacts of the aging process, pregnancy, and childbirth are carefully examined. Extensive consideration is then given to the effects on sexual function of such conditions as cardiovascular disease, cancer, diabetes, neurological disease, endometriosis, pelvic organ prolapse, urinary incontinence, reproductive disorders, sexual abuse, and drug abuse. Issues of sexual identity and female dysmorphophobias are also considered. The authors are all experts in the field and have a deep understanding of the complexities of female sexuality.
