The Wintu & Their Neighbors May 28 2021 On the cutting edge of world-systems theory comes The Wintu and Their Neighbors, the first case study to compare and contrast systematically an indigenous Native American society with the modern world at large. Using an interdisciplinary approach that combines sociology, anthropology, political science, geography, and history, Christopher Chase-Dunn and Kelly M. Mann have scoured the archaeological record of the Wintu, an aboriginal people without agriculture, metallurgy, or class structure who lived in the wooded valleys and hills of

northern California. By studying the household composition, kinship, and trade relations of the Wintu, they call into question some of the basic assumptions of prior sociological theory and analysis. Chase-Dunn and Mann argue that Immanuel Wallerstein's world-systems perspective, originally applied only to the study of modern capitalistic societies, can also be applied to the study of the social, economic, and political relationships in small stateless societies. They contend that, despite the fact that the Wintu appear on the surface to have been a household-based society, this indigenous group was in fact involved in a myriad of networks of interaction, which resulted in intermarriage and which extended for many miles around the region. These networks, which were not based on the economic dominance of one society over another—a concept fundamental to Wallerstein's world-systems theory—led to the eventual expansion of the Wintu as a cultural group. Thus, despite the fact that the Wintu did not behave like a modern society—lacking wealth accumulation, class distinctions, and cultural dominance—Chase-Dunn and Mann insist that the Wintu were involved in a world-system and argue, therefore, that the concept of the "minisystem" should be discarded. They urge other scholars to employ this comparative world-systems perspective in their research on stateless societies.

Birds of Northern California Oct 02 2021 Designed for beginning and experienced birders. David Quady and his nationally acclaimed fellow authors have written text for the over 390 species of birds that are found from Monterey County to the northern border of California in our best-selling format: Description, Similar Species, Seasonal Abundance, Where to Find, Habitat, Diet and Behavior, Voice and Did You Know. More than 500 photographs illustrate species, often in different plumages. The photos have been selected and reviewed by the team of authors for regional accuracy. Two maps illustrate key birding spots and the northern California habitats. A ten page habitat section introduces the sixteen unique geographic regions that support the bird diversity of northern California and highlight the importance of habitat conservation. A Quick Guide to Local Birds, at the front of the book, provides an easy reference to the pages that provide a complete description of the different birds.

Northern California's Lost Coast Dec 16 2022 "The Lost Coast is one of the last undeveloped stretches of the California coastline, with mountains that rise thousands of feet from the sea. Located approximately 200 miles north of San Francisco, this remote area of pristine beauty is comprised of jagged cliffs, rocky shorelines, and black sand beaches. It is the only significant

stretch of California without a highway. Rich in natural resources, the area was once a haven for Native Americans such as the Coast Yuki, Sinkyone, Mattole, and the Wiyot. Now it is a secluded landscape with a few isolated towns surrounded by conservation areas. The famed Lost Coast Trail begins in northern Mendocino County in the Sinkyone Wilderness and continues up into Humboldt County and the King Range National Conservation Area. During the 1800s, the Lost Coast bustled with logging settlements and mill towns. After logging wound down, those towns disappeared, and only remnants of their existence remain. From Westport north to Ferndale, this book showcases historical photographs from libraries, historical societies, and residents." -- From cover

100 Classic Hikes: Northern California                      Apr 07 2022  
Completely revised and updated Every trail rehiked, with 13 new hikes and 80 new photos GPS driving directions to every trailhead No one knows this premier hiking region better than author John Soares, who now offers his fourth and fully updated edition of 100 Classic Hikes: Northern California. And while he's still in love with many of the old trails, some of them have become unsafe or less accessible. The good news is that this gave him the chance to fall for some new trails, which are happily now included in this new edition. The old-growth forests and multiple mountain ranges of Northern California beckon the 10 million urban inhabitants of the Bay Area—who need outdoor experiences BADLY! This new edition not only gets them to the best of nature not far from their door, but looks tremendous on an urban coffee table, too. New hikes in this edition include: 2 in the Bay Area, including the Coastal Trail in San Francisco 5 in the Redwoods and along the coast north of the Bay Area 4 in the Sierra Nevada, including two summits: Ellis Peak and Sierra Buttes 2 in the Russian Wilderness in the Klamath Mountains

19 2023 California's geology makes headlines when faults shift, volcanoes puff steam, and coastal bluffs fall

into the sea. This book explores the state's recent rumblings and tremulous past with the aid of full color illustrations. Photographs showcase multihued rock, from red chert and green serpentinite to blue schist and gray granite. The geologic information, particularly for the Klamath Mountains, Modoc Plateau, and northern Sierra Nevada, has been updated to reflect new geologic understanding of these complex areas. Features detailed, easy to read color geologic road maps based on the 2010 Geologic Map of California.

It Happened in Northern California Nov 02 2021 It Happened in Northern California takes readers on a rollicking, behind the scene look at some of the characters and episodes from the state's storied past. Including famous tales, famous names as well as little known heroes, heroines, and happenings. Northern California is well known for its towering redwoods, Spanish missions, and gold mines, but few know about the two-year-long Native American occupation of Alcatraz, efforts by some northern Californians to establish the US's fifty-first state, or that John Sutter never capitalized on the gold rush that began on his land. It Happened in Northern California goes behind the scenes to tell these stories and many more, in short episodes that reveal the intriguing people and events that have shaped the Golden State.

"Who Could That Be at This Hour?"

Jul 23 2023 Before

the Baudelaires became orphans, before he encountered A Series of Unfortunate Events, even before the invention of Netflix, Lemony Snicket was a boy discovering the

mysteries of the world. In a fading town, far from anyone he knew or trusted, a young Lemony Snicket began his apprenticeship in an organization nobody knows about. He started by asking questions that shouldn't have been on his mind. Now he has written an account that should not be published, in four volumes that shouldn't be read. This is the first volume.

NorCalMod Feb 28 2024 Many people think modernist architecture never flowered in California north of the San Fernando Valley. NorCalMod dispels that notion in a copiously illustrated history showcasing extraordinary examples of its proud contribution to the Bay Area and environs. As a style, modernist architecture was hotly debated in its day (why create modern structures where such distinctive Victorian and Arts and Crafts buildings already existed?) pulling heavyweights such as Frank Lloyd Wright, Lewis Mumford, and Walter Gropius into the fray. Ultimately, that existing "Bay Region Style" would remain the area's architectural hallmark, but not before

hundreds of important modernist projects, many still standing yet unjustly neglected today, had been established. The remarkable photos in this book open our eyes to a long-lost chapter in the history of California architecture and make NorCalMod a volume to be enjoyed by those interested in California history and style as well as by architecture students and professionals.
