**Children's Literature in Translation** Jan Van Coillie, Walter P. Verschueren, 2014-07-16 Children's classics from Alice in Wonderland to the works of Astrid Lindgren, Roald Dahl, J. K. Rowling and Philip Pullman are now generally recognized as literary achievements that from a translator's point of view are no less demanding than serious adult literature. This volume attempts to explore the various challenges posed by the translation of children's literature and at the same time highlight some of the strategies that translators can and do follow when facing these challenges. A variety of translation theories and concepts are put to critical use, including Even-Zohar's polysystem theory, Toury's concept of norms, Venuti's views on foreignizing and domesticating translations, and on the translator's invisibility and Chesterman's prototypical approach. Topics include the ethics of translating for children, the importance of childhood images, the revelation of the translator in prefaces, the role of translated children's books in the establishment of literary canons, the status of translations in the former East Germany, questions of taboo and censorship in the translation of adolescent novels, the collision of norms in different translations of a Swedish children's classic, the handling of cultural intertextuality in the Spanish translations of contemporary British fantasy books, strategies for translating cultural markers such as juvenile expressions, functional shifts caused by different translation strategies, dealing with character names, and complex translation strategies used in dealing with the dual audience in Hans Christian Andersen's fairy tales and in Salman Rushdie's *Haroun and the Sea of Stories*.

**Is That a Fish in Your Ear?** David Bellos, 2011-10-11 A New York Times Notable Book for 2011, One of The Economist's 2011 Books of the Year. People speak different languages and always have. The Ancient Greeks took no notice of anything unless it was said in Greek; the Romans made everyone speak Latin; and in India, people learned their neighbors' languages as did many ordinary Europeans in times past. Christopher Columbus knew Italian, Portuguese, and Castilian Spanish as well as the classical languages. But today we all use translation to cope with the diversity of languages. Without translation, there would be no world news, not much of a reading list in any subject at college, no repair manuals for cars or planes, we wouldn't even be able to put together flat-pack furniture. *Is That a Fish in Your Ear?* ranges across the whole of human experience, from foreign films to philosophy, to show why translation is at the heart of what we do and who we are. Among many other things, David Bellos asks: What's the difference between translating unprepared natural speech and translating *Madame Bovary*? How do you translate a joke? What's the difference between a native tongue and a learned one? Can you translate between any pair of languages, or only between some? What really goes on when world leaders speak at the UN? Can machines ever replace human translators, and if not, why? But the biggest question Bellos asks is this: How do we ever really know that we've understood what anybody else says in our own language or in another? Surprising, witty, and written with great joie de vivre, this book is all about how we comprehend other people and shows us how, ultimately, translation is another name for the human condition.
