is recovered or when bullets are too small or mangled to observe striations Forensic Analysis Weighing Bullet Lead Evidence assesses the scientific validity of CABL finding that the FBI should use a different statistical analysis for the technique and that given variations in bullet manufacturing processes expert witnesses should make clear the very limited conclusions that CABL results can support The report also recommends that the FBI take additional measures to ensure the validity of CABL results which include improving documentation publishing details and improving on training and oversight Mississippi Digest Annotated ,1920 Mayor's Message and Annual Reports of the Several Departments ... ,1919 The Pension Answer Book Stephen J.
