Challenges of Constructing Legitimacy in Peacebuilding Apr 11 2021 Peacebuilding is a critical issue in world politics. Surprisingly, however, there has not been a full examination of concrete policies and implementation strategies to generate legitimacy in "host states" by either international relations (IR) theorists or practitioners. The objective of this book is to develop an understanding of the mechanisms for constructing—or eroding—the legitimacy of newly created governments in post-conflict peacebuilding environments. The book argues that although existing accounts in the literature contend that compliance with key political programs, and constructing legitimacy in peacebuilding, largely depend on the levels of force (guns) and resource distribution (money) aimed at people who are governed, there are other significant factors, such as inclusive governments reconciling with old

enemies, and the substantial role of international organizations (IOs) as credible third parties to establish fairness and impartiality within the political process. Hashi focuses on an in-depth analysis of the challenges involved in creating a legitimate government in Afghanistan, focusing on disarmament programs with powerful warlords, and the reconciliation efforts with the insurgency, especially the Taliban. In the conclusion the book also examines three complimentary cases—Iraq, East Timor, and Sierra Leone—which consistently support the argument presented earlier. This work will be of interest to students and scholars of peacebuilding and conflict resolution as well as international relations more broadly.

Law's Virtues Sep 28 2022 Can the law promote moral values even in pluralistic societies such as the United States? Drawing upon important federal legislation such as the Americans with Disabilities Act, legal scholar and moral theologian Cathleen Kaveny argues that it can. In conversation with thinkers as diverse as Thomas Aquinas, Pope John Paul II, and Joseph Raz, she argues that the law rightly promotes the values of autonomy and solidarity. At the same time, she cautions that wise lawmakers will not enact mandates that are too far out of step with the lived moral values of the actual community. According to Kaveny, the law is best understood as a moral teacher encouraging people to act virtuously, rather than a police officer requiring them to do so. In *Law's Virtues* Kaveny expertly applies this theoretical framework to the controversial moral-legal issues of

abortion, genetics, and euthanasia. In addition, she proposes a moral analysis of the act of voting, in dialogue with the election guides issued by the US bishops. Moving beyond the culture wars, this bold and provocative volume proposes a vision of the relationship of law and morality that is realistic without being relativistic and optimistic without being utopian.

The Oxford Handbook of European Islam Jun 13 2021 For centuries, Muslim countries and Europe have engaged one another through theological dialogues, diplomatic missions, political rivalries, and power struggles. In the last thirty years, due in large part to globalization and migration from Islamic countries to the West, what was previously an engagement across national and cultural boundaries has increasingly become an internalized encounter within Europe itself. Questions of the Hijab in schools, freedom of expression in the wake of the Danish Cartoon crisis, and the role of Shari'a have come to the forefront of contemporary European discourse. The Oxford Handbook of European Islam is the first collection to present a comprehensive approach to the multiple and changing ways Islam has been studied across European countries. Parts one to three address the state of knowledge of Islam and Muslims within a selection of European countries, while presenting a critical view of the most up-to-date data specific to each country. These chapters analyze the immigration cycles and policies related to the presence of Muslims, tackling issues such

as discrimination, post-colonial identity, adaptation, and assimilation. The thematic chapters, in parts four and five, examine secularism, radicalization, Shari'a, Hijab, and Islamophobia with the goal of synthesizing different national discussion into a more comparative theoretical framework. The Handbook attempts to balance cutting edge assessment with the knowledge that the content itself will eventually be superseded by events. Featuring eighteen newly-commissioned essays by noted scholars in the field, this volume will provide an excellent resource for students and scholars interested in European Studies, immigration, Islamic studies, and the sociology of religion.
