Amid today's proliferating instant-communication channels, one form has emerged as the most effective way to communicate—a brief, polished, live-audience video talk. Taking over TED in the early 2000s, Chris Anderson has tapped the world's most brilliant minds to share their expertise on myriad subjects. Anderson discovered that the keys to getting an audience to sit up and pay attention are to condense a presentation into 18 minutes or less and to heighten its impact with a powerful, compelling narrative: in other words, to tell a terrific story. TED Talks is chock full of personal presentation suggestions from such TED notables as Sir Ken Robinson, Mary Roach, Amy Cuddy, Bill Gates, Elizabeth Gilbert, Dan Gilbert, Matt Ridley and dozens more—everything from how to focus your speech's content to what you should avoid onstage. This is a lively, fun read with great practical value, from the man who knows what goes into a great speech. A holistic veterinarian and scientist, Dr. Gary Richter helps dog and cat owners to navigate the thicket of treatment options and separate the fact from the fiction. He wants us to use what actually works, not just what Western science or alternative medicine say "should" work. This multifaceted approach to health is known as integrative medicine. Dr. Richter examines traditional medicine from many cultures alongside modern medical techniques, describing the best of complementary care and the best of conventional veterinary medicine. Every treatment he recommends has the backing of scientific research or years of successful outcomes in his clinical practice. After explaining the treatment, he offers specific recommendations for an integrative

approach to common diseases, including allergies, skin conditions, diabetes, heart disease, and cancer. A holistic approach to health includes nutrition, as it sets the foundation for your pet's health. Dr. Richter cuts through the hype in the pet-food world and explains how to choose the best commercial foods and supplements, even includes both raw and cooked dog- and cat-food recipes for general diet as well as to treat specific needs. He also explains how we can use the right foods and supplements to "hack" the body's processes, including the immune system. Local food and drink play an essential role in building and reinforcing a sense of local character and distinctiveness in the historic environment, as part of the wider range of design and planning. They enable the significance of any building or site on the list (in its own right as a contributor to the local planning authority's wider strategic planning objectives) to be better taken into account in planning applications affecting the building or site or its setting. The advice supports local authorities and communities to introduce a local list in their area or make changes to an existing list, through the preparation of selection criteria, thereby encouraging a more consistent approach to the identification and management of local heritage assets across England. A local list can celebrate the breadth of the historic environment of a local area by encompassing the full range of heritage assets that make up the historic environment and ensure the proper valuation and recording of local heritage assets. They also provide a consistent and accountable way of identifying local heritage assets, to the benefit of owners and developers who need to understand local development opportunities and constraints.
