Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new

"Beautiful and heartrending" fiction set in Vietnam and America from the Pulitzer Prize-winning author of *The Sympathizer* (Joyce Carol Oates, *The New Yorker*) In these powerful stories, written over a period of twenty years and set in both Vietnam and America, Viet Thanh Nguyen paints a vivid portrait of the experiences of people leading lives between two worlds, the adopted homeland and the country of birth. This incisive collection by the National Book Award finalist and celebrated author of *The Committed* gives voice to the hopes and expectations of people making life-changing decisions to leave one country for another, and the rifts in identity, loyalties, romantic relationships, and family that accompany relocation. From a young Vietnamese refugee who suffers profound culture shock when he comes to live with two gay men in San Francisco, to a woman whose husband is suffering from dementia and starts to confuse her with a former lover, to a girl living in Ho Chi Minh City whose older half-sister comes back from America having seemingly accomplished everything she never will, the stories are a captivating testament to the dreams and hardships of migration. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—thorough, yet riveting—famine, plague and war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from bingeing at McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? *Homo Deus* explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is *Homo Deus*. With the same insight and clarity that made *Sapiens* an international hit and a *New York Times* bestseller, Harari maps out our future. The inspirational bestseller that ignited a movement and asked us to find our WHY Discover the book that is captivating millions on TikTok and that served as the basis for one of the most popular TED Talks of all time—with more than 56 million views and counting. Over a decade ago, Simon Sinek started a movement that inspired millions to demand purpose at work, to ask what was the WHY of their organization. Since then, millions have been touched by the power of his ideas, and these ideas remain as relevant and timely as ever. *START WITH WHY* asks (and answers) the questions: why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with WHY. They realized that people won't truly buy into a product, service, movement, or idea until they understand the WHY behind it. *START WITH WHY* shows that the leaders who have had the greatest influence in the world all think, act and communicate the same way—and it's the opposite of what everyone else does. Sinek calls this powerful idea *The Golden Circle*, and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY. On the Trail of Robert Pirsig's Zen and the Art of Motorcycle Maintenance, Zen and Now is the story of a story that will appeal to the 5 million readers of the original and serve as an initiation to a whole new generation. Since its original publication in 1968, Zen and the Art of Motorcycle Maintenance: An Inquiry into Values has touched whole generations of readers with its serious attempt to define "quality" in a world that seems indifferent to the responsibilities that quality brings. Mark Richardson expands that journey with an investigation of his own - to find the enigmatic author of Zen and the Art, ask him a few questions, and place his classic book in context. The result manages to be a biography of Pirsig himself - in the discovery of an unknown life of madness, murder and eventual resolution - and a splendid meditation on creativity and problem-solving, sanity and insanity.
