Chemistry seeks to provide qualitative and quantitative explanations for the observed behaviour of elements and their compounds. Doing so involves making use of three types of representation: the macro (the empirical properties of substances); the sub-micro (the natures of the entities giving rise to those properties); and the symbolic (the number of entities involved in any changes that take place). Although understanding this triplet relationship is a key aspect of chemical education, there is considerable evidence that students find great difficulty in achieving mastery of the ideas involved. In bringing together the work of leading chemistry educators who are researching the triplet relationship at the secondary and university levels, the book discusses the learning involved, the problems that students encounter, and successful approaches to teaching. Based on the reported research, the editors argue for a coherent model for understanding the triplet relationship in chemical education.

In *The Chinese Atlantic*, Sean Metzger charts processes of global circulation across and beyond the Atlantic, exploring how seascapes generate new understandings of Chinese migration, financial networks and artistic production. Moving across film, painting, performance, and installation art, Metzger traces flows of money, culture, and aesthetics to reveal the ways in which routes of commerce stretching back to the Dutch Golden Age have molded and continue to influence the social reproduction of Chineseness. With a particular focus on the Caribbean, Metzger investigates the expressive culture of Chinese migrants and the communities that received these waves of people. He

interrogates central issues in the study of similar case studies from South Africa and England to demonstrate how Chinese Atlantic seascapes frame globalization as we experience it today. Frequently focusing on art that interacts directly with the sites in which it is located, Metzger explores how Chinese migrant laborers and entrepreneurs did the same to shape—both physically and culturally—the new spaces in which they found themselves. In this manner, Metzger encourages us to see how artistic imagination and practice interact with migration to produce a new way of framing the global. Arthurian legend in this subversive, “delightfully original and whimsical” (Kirkus Reviews) young adult fantasy about what happens after the chosen one wins the kingdom and has to get married to keep it...and to stay alive. Arek hadn't thought much about what would happen after he completed the prophecy that said he was destined to save the Kingdom of Ere from its evil ruler. So now that he's finally managed to (somewhat clumsily) behead the evil king (turns out magical swords yanked from bogs don't come pre-sharpened), he and his rag-tag group of quest companions are at a bit of a loss for what to do next. As a temporary safeguard, Arek's best friend and mage, Matt, convinces him to assume the throne until the true heir can be rescued from her tower. Except that she's dead. Now Arek is stuck as king, a role that comes with a magical catch: choose a spouse by your eighteenth birthday, or wither away into nothing. With his eighteenth birthday only three months away, and only Matt in on the secret, Arek embarks on a desperate bid to find a spouse to save his life—starting with his quest companions. But his attempts at wooing his friends go painfully and hilariously wrong...until he discovers that love might have been in front of him all along. The fourth volume of The Cambridge History of America and the World examines the heights of American global power in the mid-twentieth century and how challenges from at home and abroad altered the United States and its role in the world. The second half of the twentieth century marked the pinnacle of American global power in economic, political, and cultural terms, but even as it reached such heights, the United States quickly faced new challenges to its power, originating both domestically and internationally. Highlighting cutting-edge ideas from scholars from all over the world, this volume anatomizes American power as well as the counters and alternatives to 'the American empire.' Topics include US economic and military power, American culture overseas, human rights and humanitarianism, third-world internationalism, immigration, communications technology, and the Anthropocene. THE MILLION COPY INTERNATIONAL BESTSELLER 'If power is your ultimate goal, this is the book you need' The Times Amoral, cunning, ruthless, and instructive, this piercing work distils three thousand years of the history of power into forty-eight well-explicated laws. Illustrated through the tactics of Queen Elizabeth I, Henry Kissinger, P T Barnum, and other famous figures who have wielded - or been victimised by - power, these laws will fascinate any reader interested in gaining, observing or defending against ultimate control. In conjunction with its second movie sequel to be released this summer, Steve Harvey has updated his classic with new advice and insights. Whether it's why women should enforce a "90-Day Probation Period" before they give their men sexual "benefits"—the way Ford motor company withholds medical and dental benefits until an employee has been on the job for 3 months—or explaining to women why men would rather "fix it" than talk about it, Steve Harvey's advice is always spot-on and laden with warmth and humor. But behind the laughter is his sincere desire to help women understand men. Now, Steve shares even more relationship wisdom. Does it feel like your man's friends are against you? What should you know about being a wife, before you say "I Do"? An ocelot. A slave. An angel thief. Multiple perspectives spanning across time are united through themes of freedom, hope, and faith in a most unusual and epic novel from Newbery Honor-winning author and National Book Award finalist Kathi Appelt. Sixteen-year-old Cade Curtis is an angel thief. After his mother's family rejected him for being born out of wedlock, he and his dad moved to the apartment above a local antique shop. The only payment the owner Mrs. Walker requests: marble angels, stolen from graveyards, for her to sell for thousands of dollars to collectors. But there's one angel that would be the last they'd ever need to steal; an angel, carved by a slave, with one hand open and one hand closed. If only Cade could find it... Zorra, a young ocelot, watches the bayou rush past her yearningly. The poacher who captured and caged her has long since lost her, and Zorra is getting hungrier and thirstier by the day. Trapped, she only has the sounds of the bayou for comfort—but it tells her help will come soon. Before Zorra, Achsah, a slave, watched the very same bayou with her two young daughters. After the death of her master, Achsah is free, but she'll be damned if her daughters aren't freed with her. All they need to do is find the church with an angel with one hand open

and one hand closed... In a masterful feat, National Book Award Honoree Kathi Appelt weaves together stories across time, connected by the bayou, an angel, and the universal desire to be free.
