*NCLEX-RN (r) - Pharmacology Study Guide* Marnie Kramer-Kile, 2016-04 The purpose of this pharmacology study guide is to help nursing graduates work through the vast amount of pharmacological knowledge required for the NCLEX RN R in a systematic and purposeful way. The breadth and detail of the knowledge required of pharmacological concepts often overwhelms new graduates when they are beginning their exam preparation. This guide organizes content using the current NCLEX RN R Test Plan 2016 2019 and provides specific strategies to address pharmacological areas of review which may challenge new graduates in their exam preparation. The guide was created by an experienced undergraduate nurse educator specializing in critical thinking development and application for high stakes exam writing. Many candidates while studying for the NCLEX RN R often forgo studying pharmacological concepts in the detail required for the exam. Unique to this Pharmacology Guide is a five step algorithm created by the author to help graduates approach drug to drug interaction questions. This algorithm is designed to help uncover correct answers by using pharmacological principles rather than memorizing drugs that interact with one another. The purpose of the modules in this Pharmacology study guide series are to Provide in depth review of the major drug classes from a systems approach e.g respiratory nervous system etc to help increase retention of key concepts and encourage application of pharmacological therapy in the context of disease management. The modules will contain summary tables review questions and exercises for key concepts. Direct the reader to important areas for client assessment during drug therapy.
