*Single-case Research Designs* Alan E. Kazdin, 2011 Kazdin's text is a notable contrast to the quantitative methodology approach that pervades the biological and social sciences. The methodology in *Single Case Research Designs* focuses on a widely applicable methodology for evaluating interventions such as treatment or psychotherapy using applied behavior analysis. However, this revision aims to encompass a broader range of research areas that utilize single case designs. The text will convey the pertinence of this research methodology to disciplines ranging from psychology and medicine to business and industry. The first edition of this book, which was published in 1982, still sells a steady amount of copies today. The fact that professors continue to use the first edition of this book more than twenty years after it was published is a testament to the quality of information organization and narrative throughout the text. The possibility of a revision has professors excited that they can expose their students to a well-written, clear, and updated text that will reflect the current status of single case research.

*Single Case Research Methodology* Jennifer R. Ledford, David L. Gast, 2014-03-26 In this anticipated new edition of *Single Case Research Methodology*, David L. Gast and Jennifer R. Using numerous and varied examples, they demonstrate how single case research can be used for research in behavioral and school psychology, special education, speech and communication sciences, language and literacy, occupational therapy, and social work. This thoroughly updated new edition features two entirely new chapters on measurement systems and controversial issues in single subject research, in addition to sample data sheets, graphic displays, and detailed guidelines for conducting visual analysis of graphic data. This book will be an important resource to student researchers, practitioners, and university faculty who are interested in answering applied research questions and objectively evaluating educational and clinical practices.
