political and economic partnership that represents a unique form of cooperation among sovereign countries The EU is the  
latest stage in a process of integration begun after World War II initially by six Western European countries to foster  
interdependence and make another war in Europe unthinkable The EU currently consists of 28 member states including most  
of the countries of Central and Eastern Europe and has helped to promote peace stability and economic prosperity  
throughout the European continent The EU has been built through a series of binding treaties Over the years EU member  
states have sought to harmonize laws and adopt common policies on an increasing number of economic social and political

issues EU member states share a customs union a single market in which capital goods services and people move freely a common trade policy and a common agricultural policy Nineteen EU member states use a common currency the euro and 22 member states participate in the Schengen area of free movement in which internal border controls have been eliminated In addition the EU has been developing a Common Foreign and Security Policy CFSP which includes a Common Security and Defense Policy CSDP and pursuing cooperation in the area of Justice and Home Affairs JHA to forge common internal security measures Member states work together through several EU institutions to set policy and to promote their collective interests In recent years however the EU has faced a number of internal and external crises Most notably in a June 2016 public referendum voters in the United Kingdom UK backed leaving the EU The pending British exit from the EU dubbed Brexit comes amid multiple other challenges including the rise of populist and to some extent anti EU political parties concerns about democratic backsliding in some member states including Poland and Hungary ongoing pressures related to migration a heightened terrorism threat and a resurgent Russia The United States has supported the European integration project since its inception in the 1950s as a means to prevent another catastrophic conflict on the European continent and foster democratic allies and strong trading partners Today the United States and the EU have a dynamic political partnership and share a huge trade and investment relationship Despite periodic tensions in U S EU relations over the years U S and EU policymakers alike have viewed the partnership as serving both sides overall strategic and economic interests EU leaders are anxious about the Trump Administration s commitment to the EU project the transatlantic partnership and an open international trading system especially amid the Administration s imposition of tariffs on EU steel and aluminum products since 2018 and the prospects of future auto tariffs In July 2018 President Trump reportedly called the EU a foe on trade but the Administration subsequently sought to de escalate U S EU tensions and signaled its intention to launch new U S EU trade negotiations Concerns also linger in Brussels about the implications of the Trump Administration s America First foreign policy and its positions on a range of international issues including Russia Iran the Israeli Palestinian conflict climate change and the role of multilateral institutions This report serves as a primer on the EU Despite the UK s vote to leave the EU the UK remains a full member of the bloc until it officially exits the EU which is scheduled to occur by October 31 2019 but may be further delayed As such this report largely addresses the EU and its institutions as they currently exist It also briefly describes U S EU political and economic relations that may be of interest

*Economics for Beginners & Dummies* Giovanni Rigters, Economics for Beginners is a quick and simple explanation of basic economic ideas and principles A common misconception about economics is that the study is all about money Money is only one aspect of the economy Economics is the study of the choices people companies or governments make when allocating their resources to create products and services Those choices made are based on the scarcity of the resources needs of the people and the economic style of the community creating traditional command market or mixed economies Additionally this text offers a common language an easily understandable discussion of the law of supply and demand and the intersection of both known as equilibrium Finally this ebook explains the cause and effect relationship between the economy and taxes interest rates and other governmental influences that lead to inflation and deflation or the growth and contraction of the economy

*Saving Capitalism* Robert B. Reich, 2015-09-29 From the author of Aftershock and The Work of Nations his most important book to date a myth shattering breakdown of how the economic system that helped make America so strong is now failing us and what it will take to fix it Perhaps no one is better acquainted with the intersection of economics and politics than Robert B Reich and now he reveals how power and influence have created a new American oligarchy a shrinking middle class and the greatest income inequality and wealth disparity in eighty years He makes clear how centrally problematic our veneration of the free market is and how it has masked the power of moneyed interests to tilt the market to their benefit Reich exposes the falsehoods that have been bolstered by the corruption of our democracy by huge corporations and the revolving door between Washington and Wall Street that all workers are paid what they re worth that a higher minimum wage equals fewer jobs and that corporations must serve shareholders before employees He shows that the critical choices ahead are not about the size of government but about who government is for that we must choose not between a free market and big government but between a market organized for broadly based prosperity and one designed to deliver the most gains to the top Ever the pragmatist ever the optimist Reich sees hope for reversing our slide toward inequality and diminished opportunity when we shore up the countervailing power of everyone else Passionate yet practical sweeping yet exactly argued Saving Capitalism is a revelatory indictment of our economic status quo and an empowering call to civic action

*No Citizen Left Behind* Meira Levinson,2012-04-23 While teaching at an all Black middle school in Atlanta Meira Levinson realized that students individual self improvement would not necessarily enable them to overcome their profound marginalization within American society This is because of a civic empowerment gap that is as shameful and antidemocratic as the academic achievement gap targeted by No Child Left Behind No Citizen Left Behind argues that students must be taught how to upend and reshape power relationships directly through political and civic action Drawing on political theory empirical research and her own on the ground experience Levinson shows how de facto segregated urban schools can and must be at the center of this struggle Recovering the civic purposes of public schools will take more than tweaking the curriculum Levinson calls on schools to remake civic education Schools should teach collective action openly discuss the racialized dimensions of citizenship and provoke students by engaging their passions against contemporary injustices Students must also have frequent opportunities to take civic and political action including within the school itself To build a truly egalitarian society we must reject myths of civic sameness and empower all young people to raise their diverse voices Levinson s account challenges not just educators but all who care about justice diversity or democracy
