The Fat Studies Reader Esther Rothblum, Sondra Solovay, 2009-11-01 Winner of the 2010 Distinguished Publication Award from the Association for Women in Psychology Winner of the 2010 Susan Koppelman Award for the Best Edited Volume in Women's Studies from the Popular Culture Association A milestone anthology of fifty three voices on the burgeoning scholarly movement fat studies We have all seen the segments on television news shows A fat person walking on the sidewalk her face out of frame so she can't be identified as some disconcerting findings about the obesity epidemic stalking the nation are read by a disembodied voice And we have seen the movies their obvious lack of large leading actors silently speaking volumes From the government health industry diet industry news media and popular culture we hear that we should all be focused on our weight But is this national obsession with weight and thinness good for us Or is it just another form of prejudice one with especially dire consequences for many already disenfranchised groups For decades a growing cadre of scholars has been examining the role of body weight in society critiquing the underlying assumptions prejudices and effects of how people perceive and relate to fatness This burgeoning movement known as fat studies includes scholars from every field as well as activists artists and intellectuals The Fat Studies Reader is a milestone achievement bringing together fifty three diverse voices to explore a wide range of topics related to body weight From the historical construction of fatness to public health policy from job discrimination to social class disparities from chick lit to airline seats this collection covers it all Edited by two leaders in the field The Fat Studies Reader is an invaluable resource that provides a historical overview of fat studies an in depth examination of the movement's fundamental concerns and an up to date look at its innovative research

**What We Don't Talk About When We Talk About Fat** Aubrey Gordon, 2020-11-17 From the creator of Your Fat Friend and co host of the Maintenance Phase podcast an explosive indictment of the systemic and cultural bias facing plus size people Anti fatness is everywhere In What We Don't Talk About When We Talk About Fat Aubrey Gordon unearths the cultural attitudes and social systems that have led to people being denied basic needs because they are fat and calls for social justice movements to be inclusive of plus sized people's experiences Unlike the recent wave of memoirs and quasi self help books that encourage readers to love and accept themselves Gordon pushes the discussion further towards authentic fat activism which includes ending legal weight discrimination giving equal access to health care for large people increased access to public spaces and ending anti fat violence As she argues I did not come to body positivity for self esteem I came to it for social justice By sharing her experiences as well as those of others from smaller fat to very fat people she concludes that to be fat in our society is to be seen as an undeniable failure unlovable unforgivable and morally condemnable Fatness is an open invitation for others to express disgust fear and insidious concern To be fat is to be denied humanity and empathy Studies show that fat survivors of sexual assault are less likely to be believed and less likely than their thin counterparts to report various crimes 27% of very fat women and 13% of very fat men attempt suicide over 50% of doctors describe their fat patients as awkward unattractive ugly and noncompliant and in 48 states it's legal even routine to deny employment because of an applicant's size Advancing fat justice and changing prejudicial structures and attitudes will require work from all people What We Don't Talk About When We Talk About Fat is a crucial tool to create a tectonic shift in the way we see talk about and treat our bodies fat and thin alike

**Fat Politics** J. Eric Oliver, 2005-11-15 It seems almost daily we read newspaper articles and watch news reports exposing the growing epidemic of obesity in America Our government tells us we are experiencing a major health crisis with sixty percent of Americans classified as overweight and one in four as obese But how valid are these claims In *Fat Politics* J Eric Oliver shows how a handful of doctors government bureaucrats and health researchers with financial backing from the drug and weight loss industries have campaigned to create standards that mislead the public They mislabel more than sixty million Americans as overweight inflate the health risks of being fat and promote the idea that obesity is a killer disease In reviewing the scientific evidence Oliver shows there is little proof that obesity causes so much disease and death or that losing weight is what makes people healthier Our concern with obesity he writes is fueled more by social prejudice bureaucratic politics and industry profit than by scientific fact Misinformation pushes millions of Americans towards dangerous surgeries crash diets and harmful diet drugs while we ignore other more real health problems Oliver goes on to examine why it is that Americans despise fatness and explores why despite this revulsion we continue to gain weight *Fat Politics* will topple your most basic assumptions about obesity and health It is essential reading for anyone with a stake in the nation s or their own good health

**Kids These Days** Karen Sternheimer, 2006 Kids These Days critically examines the hottest news stories of the past few years to assess whether the news is really as bad as it sounds Is kidnapping by strangers really a bigger threat now than in the past Are disputes at school now settled with guns instead of fists And are kids especially girls becoming bigger bullies than ever before This book dissects the stories that made headlines and explores overall trends and statistics to compare the hype to the reality The truth is that kids today do face unique obstacles and challenges but their situation isn't nearly as dire as the compelling news accounts would have us believe Rather the author proposes that our nation's youth have been targeted as a problem population to absolve adult responsibility for creating the often dangerous and difficult conditions many young people must deal with

**Supersizing Urban America** Chin Jou, 2017-03-15 More than one third of adults in the United States are obese The Centers for Disease Control and Prevention estimates that there are over 112 000 obesity related deaths annually and for many years the government has waged a very public war on the problem Former Surgeon General Richard Carmona warned in 2006 that obesity is the terror within going so far as to call it a threat that will dwarf 9 11 What doesn't get mentioned in all this The fact that the federal government helped create the obesity crisis in the first place especially where it is strikingly acute among urban African American communities *Supersizing Urban America* reveals the little known story of how the U S government got into the business of encouraging fast food in inner cities with unforeseen consequences we are only beginning to understand Chin Jou begins her story in the late 1960s when predominantly African American neighborhoods went from having no fast food chain restaurants to being littered with them She uncovers the federal policies that have helped to subsidize that expansion including loan guarantees to fast food franchisees programs intended to promote minority entrepreneurship and urban revitalization initiatives During this time fast food companies also began to relentlessly market to urban African American consumers An unintended consequence of these developments was that low income minority communities were disproportionately affected by the obesity epidemic In the first book about the U S government's problematic role in promoting fast food in inner city America Jou tells a riveting story of the food industry obesity and race relations in America that is essential to understanding health and obesity in contemporary urban America

**Infrahumanisms** Megan H. Glick, 2018-12-14 In *Infrahumanisms* Megan H Glick considers how conversations surrounding nonhuman life have impacted a broad range of attitudes toward forms of human difference such as race sexuality and health She examines the history of human and nonhuman subjectivity as told through twentieth century scientific and cultural discourses that include pediatrics primatology eugenics exobiology and obesity research Outlining how the category of the human is continuously redefined in relation to the infrahuman a liminal position of speciation existing between the human and the nonhuman Glick reads a number of phenomena from early twentieth century efforts to define children and higher order primates as liminally human and the postwar cultural fascination with extraterrestrial life to anxieties over AIDS SARS and other cross species diseases In these cases the efforts to define a universal humanity create the means with which to reinforce notions of human difference and maintain human nonhuman hierarchies In foregrounding how evolving definitions of the human reflect shifting attitudes about social inequality Glick shows how the consideration of nonhuman subjectivities demands a rethinking of long held truths about biological meaning and difference
