Data Structures and Algorithms in Java Michael T. Goodrich, Roberto Tamassia, Michael H. Goldwasser, 2014-01-28 The design and analysis of efficient data structures has long been recognized as a key component of the Computer Science curriculum Goodrich Tomassia and Goldwasser s approach to this classic topic is based on the object oriented paradigm as the framework of choice for the design of data structures For each ADT presented in the text the authors provide an associated Java interface Concrete data structures realizing the ADTs are provided as Java classes implementing the interfaces The Java code implementing fundamental data structures in this book is organized in a single Java package net datastructures This package forms a coherent library of data structures and algorithms in Java specifically designed for educational purposes in a way that is complimentary with the Java Collections Framework

TIP 35: Enhancing Motivation for Change in Substance Use Disorder Treatment (Updated 2019) U.S.

Department of Health and Human Services,2019-11-19 Motivation is key to substance use behavior change Counselors can support clients movement toward positive changes in their substance use by identifying and enhancing motivation that already exists Motivational approaches are based on the principles of person centered counseling Counselors use of empathy not authority and power is key to enhancing clients motivation to change Clients are experts in their own recovery from SUDs Counselors should engage them in collaborative partnerships Ambivalence about change is normal Resistance to change is an expression of ambivalence about change not a client trait or characteristic Confrontational approaches increase client resistance and discord in the counseling relationship Motivational approaches explore ambivalence in a nonjudgmental and compassionate way Are Prisons Obsolete? Angela Y. Davis,2011-01-04 With her characteristic brilliance grace and radical audacity Angela Y Davis has put the case for the latest abolition movement in American life the abolition of the prison As she quite correctly notes American life is replete with abolition movements and when they were engaged in these struggles their chances of success seemed almost unthinkable For generations of Americans the abolition of slavery was sheerest illusion Similarly the entrenched system of racial segregation seemed to last forever and generations lived in the midst of the practice with few predicting its passage from custom The brutal exploitative dare one say lucrative convict lease system that succeeded formal slavery reaped millions to southern jurisdictions and untold miseries for tens of thousands of men and women Few predicted its passing from the American penal landscape Davis expertly argues how social movements transformed these social political and cultural institutions and made such practices untenable In Are Prisons Obsolete Professor Davis seeks to illustrate that the time for the prison is approaching an end She argues forthrightly for

decarceration and argues for the transformation of the society as a whole

Principles of Food Sanitation Norman G. Marriott, 2013-03-09 Large volume food processing and preparation operations have increased the need for improved sanitary practices from processing to consumption This trend presents a challenge to every employee in the food processing and food preparation industry Sanitation is an applied science for the attainment of hygienic conditions Because of increased emphasis on food safety sanitation is receiving increased attention from those in the food industry Traditionally inexperienced employees with few skills who have received little or no training have been delegated sanitation duties Yet sanitation employees require intensive training In the past these employees including sanitation program managers have had only limited access to material on this subject Technical information has been confined primarily to a limited number of training manuals provided by regulatory agencies industry and association manuals and recommendations from equipment and cleaning compound firms Most of this material lacks specific information related to the selection of appropriate cleaning methods equipment compounds and sanitizers for maintaining hygienic conditions in food processing and preparation facilities The purpose of this text is to provide sanitation information needed to ensure hygienic practices Sanitation is a broad subject thus principles related to contamination cleaning compounds sanitizers and cleaning equipment and specific directions for applying these principles to attain hygienic conditions in food processing and food preparation are discussed The discussion starts with the importance of sanitation and also includes regulatory requirements and voluntary sanitation programs including additional and updated information on Hazard Analysis Critical Control Points HACCP
