Life's Solution Simon Conway Morris, 2003-09-04 The assassin's bullet misses the Archduke's carriage moves forward and a catastrophic war is avoided So too with the history of life Re run the tape of life as Stephen J Gould claimed and the outcome must be entirely different an alien world without humans and maybe not even intelligence The history of life is littered with accidents any twist or turn may lead to a completely different world Now this view is being challenged Simon Conway Morris explores the evidence demonstrating life's almost eerie ability to navigate to a single solution repeatedly Eyes brains tools even culture all are very much on the cards So if these are all evolutionary inevitabilities where are our counterparts across the galaxy The tape of life can only run on a suitable planet and it seems that such Earth like planets may be much rarer than hoped Inevitable humans yes but in a lonely Universe

Stars, Life and Intelligence Terry Kelly, 2009-12-31 This book is divided into two parts The first part deals with the current understanding of evolution The second part brings together the scientific picture with various responses to the God question Science is a powerful discourse it has unravelled for us the workings of nature and technology has enabled us to apply the findings in many ways to further knowledge to perform complex tasks to further communication and to make life easier and more exciting But there are boundaries and limits to science First the final models of how nature is working are never the final word they are always awaiting falsification never blessed with certain verification Second the deeper one goes towards hoped for truth the more one is confronted with counter intuitive models such as quantum theory spooky action at a distance the dark energy of the vacuum the Big Bang etc Third science cannot advance beyond the questions accessible by scientific experiment questions about purpose and God right and wrong good and evil are not accessible to science Scientific conclusions however can then be subjected to reasonable analysis philosophical reflection aided perhaps by religious beliefs Today a dilemma is often offered for consideration either evolution by natural selection or God and purpose Is this dilemma a false one Can purposeful creation and natural selection both be true Such are the features of evolution one can argue strongly the case for a purpose One can at least say belief in God sits well with evolutionary theory To come to this conclusion we need to extend and improve our image of the God of Abraham Moses and Jesus God is intelligent subtle powerful respectful of the freedom with which the divine will has endowed creation itself and homosapiens
