Do you know what you want to be or do in the future? With these questions providing the building blocks for your essay, Sawyer guides you through the rest of the process, from choosing a structure to revising your essay, and answers the big questions that have probably been keeping you up at night: How do I brag in a way that doesn't sound like bragging? and How do I make my essay, like, deep? First You Write a Sentence Feb 21 2022 “Do you want to write clearer, livelier prose? This witty primer will help.” —The New York Times Book Review An exploration of how the most ordinary words can be turned into verbal constellations of extraordinary grace through the art of building sentences The sentence is the common ground where every writer walks. A good sentence can be written (and read) by anyone if we simply give it the gift of our time, and it is as close as most of us will get to making something truly beautiful. Using minimal technical terms and sources ranging from the Bible and Shakespeare to George Orwell and Maggie Nelson, as well as scientific studies of what can best fire the reader's mind, author Joe Moran shows how we can all write in a way that is clear, compelling and alive. Whether dealing with finding the ideal word, building a sentence, or constructing a paragraph, First You Write a Sentence informs by light example: much richer than a style guide, it can be read not only for instruction but for pleasure and delight. And along the way, it shows how good writing can help us notice the world, make ourselves known to others, and live more meaningful lives. It's an elegant gem in praise of the English sentence.

Why I Write May 19 2024 George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature - his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While *1984* and *Animal Farm* are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In *Why I Write*, the first in the *Orwell's Essays* series, Orwell describes his journey to becoming a writer, and his movement from writing poems to short stories to the essays, fiction and non-fiction we remember him for. He also discusses what he sees as the 'four great motives for writing' - 'sheer egoism', 'aesthetic enthusiasm', 'historical impulse' and 'political purpose' - and considers the importance of keeping these in balance. *Why I Write* is a unique opportunity to look into Orwell's mind, and it grants the reader an entirely different vantage point from which to consider the rest of the great writer's oeuvre. 'A writer who can - and must - be rediscovered with every age.' — Irish Times

Improving Writing and Thinking Through Assessment Feb 04 2023 *Improving Writing and Thinking through Assessment* is designed to help individual faculty and administrators select assessment approaches and measures to maximize their students' writing and thinking. The book offers useful guidance, through presentation of recommended assessment guidelines and measurement principles in Part 1 and applications from a variety of contributors in Part 2. It addresses a wide range of audiences, including instructors who want to assess and thus foster writing and thinking in their courses, administrators and instructors planning to assess writing and thinking at the program or institutional level, and graduate students interested in improving students' writing and critical thinking. This book is more guide than a "cookbook." By providing comprehensive standards and criteria that help individuals or teams develop plans and measures to improve writing and thinking, the book should be helpful for academic and Student Affairs administrators and faculty - as the principles apply equally to all engaged in assessment. Contributors, representing a wide range of educators, illustrate many of the approaches and methods described in the theoretical section of the book using a variety of assessment strategies at both classroom and program levels. Readers will see how different types of institutions, both private and public as well as undergraduate and graduate, have designed assessment strategies and plans to gauge and enhance writing and thinking growth in the classroom and across programs. They candidly describe challenges encountered and solutions they adopted or suggest. These chapters reflect approaches and perspectives from various discourse communities - including writing program administrators, composition faculty, assessment professionals, and individual faculty representing several disciplines. The author argues the urgent need to develop strong writers and thinkers. She discusses challenges and obstacles, but underscores the necessity for more faculty involvement and institutional commitment. This book will help institutions and individual faculty design and implement sound, meaningful assessment strategies to foster effective writing and thinking that will both advance the goals of the institutional mission and meet faculty's disciplinary objectives and scholarly concerns.

Crow Call Sep 11 2023 The two-time Newbery medalist has crafted "a loving representation of a relationship between parent and child" in post-WWII America (Publishers Weekly, starred review). This is the story of young Liz, her father, and their strained relationship. Dad has been away at WWII for longer than she can remember, and they begin their journey of reconnection through a hunting shirt, cherry pie, tender conversation, and the crow call. This allegorical story shows how, like the birds gathering above, the relationship between the girl and her father is graced with the chance to fly. "The memory of a treasured day spent with a special person will resonate with readers everywhere." —School Library Journal (starred review) "Beautifully written, the piece reads much like a traditional short story . . . the details of [Ibatouline's] renderings gracefully capture a moment in time that was lost. Relevant for families whose parents are returning from war, the text is also ripe for classroom discussion and for advanced readers." —Kirkus Reviews

Discovering the Brain May 27 2022 The brain ... There is no other part of the human anatomy that is so intriguing. How does it develop and function and why does it sometimes, tragically, degenerate? The answers are complex. In *Discovering the Brain*, science writer Sandra Ackerman cuts through the complexity to bring this vital topic to the public. The 1990s were declared the "Decade of the Brain" by former President Bush, and the neuroscience community responded with a host of new investigations and conferences. *Discovering the Brain* is based on the Institute of Medicine conference, Decade of the Brain: Frontiers in Neuroscience and Brain Research. *Discovering the Brain* is a "field guide" to the brain—an easy-to-read discussion of the brain's physical structure and where functions such as language and music appreciation lie. Ackerman examines: How electrical and chemical signals are conveyed in the brain. The mechanisms by which we see, hear, think, and pay attention—and how a "gut feeling" actually originates in the brain. Learning and memory retention, including parallels to computer memory and what they might tell us about our own mental capacity. Development of the brain throughout the life span, with a look at the aging brain. Ackerman provides an enlightening chapter on the connection between the brain's physical condition and various mental disorders and notes what progress can realistically be made toward the prevention and treatment of stroke and other ailments. Finally, she explores the potential for major advances during the "Decade of the Brain," with a look at medical imaging techniques—what various technologies can and cannot tell us—and how the public and private sectors can contribute to continued advances in neuroscience. This highly readable volume will provide the public and policymakers—and many scientists as well—with a helpful guide to understanding the many discoveries that are sure to be announced throughout the "Decade of the Brain."

Contagion of Violence Jun 15 2021 The past 25 years have seen a major paradigm shift in the field of violence prevention, from the assumption that violence is inevitable to the recognition that violence is preventable. Part of this shift has occurred in thinking about why violence occurs, and where intervention points might lie. In exploring the occurrence of violence, researchers have recognized the tendency for violent acts to cluster, to spread from place to place, and to mutate from one type to another. Furthermore, violent acts are often preceded or followed by other violent acts. In the field of public health, such a process has also been seen in the infectious disease model, in which an agent or vector initiates a specific biological pathway leading to symptoms of disease and infectivity. The agent transmits from individual to individual, and levels of the disease in the population above the baseline constitute an epidemic. Although violence does not have a readily observable biological agent as an initiator, it can follow similar epidemiological pathways. On April 30-May 1, 2012, the Institute of Medicine (IOM) Forum on Global Violence Prevention convened a workshop to explore the contagious nature of violence. Part of the Forum's mandate is to engage in multisectoral, multidirectional dialogue that explores crosscutting, evidence-based approaches to violence prevention, and the Forum has convened four workshops to this point exploring various elements of violence prevention. The workshops are designed to examine such approaches from multiple perspectives and at multiple levels of society. In particular, the workshop on the contagion of violence focused on exploring the epidemiology of the contagion, describing possible processes and mechanisms by which violence is transmitted, examining how contextual factors mitigate or exacerbate the issue. *Contagion of Violence: Workshop Summary* covers the major topics that arose during the 2-day workshop. It is organized by important elements of the infectious disease model so as to present the contagion of violence in a larger context and in a more compelling and comprehensive way.

Some Thoughts Concerning Education Aug 30 2022 A work by John Locke about education.

Thinking on Paper Jun 20 2024 Most books on writing assume that the sole purpose of writing is communication. These manuals seldom go beyond teaching how to avoid the problems of punctuation, grammar, and style that at one time or another ensnare the best of writers. Few, if any, of these books explore writing as a way of shaping thought. V.A. Howard and J.H. Barton, two Harvard researchers in education, take a radically different approach. While they agree with their predecessors that an important function of writing is the clear, direct expression of thought, they point out that many of our thoughts first come into being only when put to paper. By failing to recognize the link between thinking and writing, we fall into the deadlock inappropriately named writer's block. *Thinking on Paper* shows how writer's block as well as many other writing problems are engendered by the tendency, supported by traditional approaches, to separate thinking from writing. Drawing on the developing field of symbol theory, Howard and Barton explain why this separation is unsound and demonstrate how to improve dramatically our ability to generate and express ideas. For everyone who writes, this is a readable, accessible manual of immense educational and practical value.

Thinking and Literacy Nov 20 2021 This volume explores higher level, critical, and creative thinking, as well as reflective decision making and problem solving -- what teachers should emphasize when teaching literacy across the curriculum. Focusing on how to encourage learners to become independent thinking, learning, and communicating participants in home, school, and community environments, this book is concerned with integrated learning in a curriculum of inclusion. It emphasizes how to provide a curriculum for students where they are socially interactive, personally reflective, and academically informed. Contributors are authorities on such topics as cognition and learning, classroom climates, knowledge bases of the curriculum, the use of technology, strategic reading and learning, imagery and analogy as a source of creative thinking, the nature of motivation, the affective domain in learning, cognitive apprenticeships, conceptual development across the disciplines, thinking through the use of literature, the impact of the media on thinking, the nature of the new classroom, developing the ability to read words, the bilingual, multicultural learner, crosscultural literacy, and reaching the special learner. The applications of higher level thought to classroom contexts and materials are provided, so that experienced teacher educators, and psychologists are able to implement some of the abstractions that are frequently dealt with in texts on cognition. Theoretical constructs are grounded in educational experience, giving the volume a practical dimension. Finally, appropriate concerns regarding the new media, hypertext, bilingualism, and multiculturalism as they reflect variation in cognitive experience within the contexts of learning are presented.
