Head First Algebra Tracey Pilone, Dan Pilone, 2009 Using the latest research in cognitive science and learning theory to craft a multi sensory learning experience the book uses a visually rich format designed for the way your brain works not a text heavy approach that puts you to sleep Publisher s note **Algebra and Trigonometry** Jay P. Abramson, Valeree Falduto, Rachael Gross (Mathematics teacher), David Lippman, Rick Norwood, Melonie Rasmussen, Nicholas Belloit, Jean-Marie Magnier, Harold Whipple, Christina Fernandez, 2015-02-13 The text is suitable for a typical introductory algebra course and was developed to be used flexibly While the breadth of topics may go beyond what an instructor would cover the modular approach and the richness of content ensures that the book meets the needs of a variety of programs Page 1 [Beginning and Intermediate Algebra](#) Tyler Wallace, 2018-02-13 Get Better Results with high quality content exercise sets and step by step pedagogy Tyler Wallace continues to offer an enlightened approach grounded in the fundamentals of classroom experience in Beginning and Intermediate Algebra The text reflects the compassion and insight of its experienced author with features developed to address the specific needs of developmental level students Throughout the text the author communicates to students the very points their instructors are likely to make during lecture and this helps to reinforce the concepts and provide instruction that leads students to mastery and success The exercises along with the number of practice problems and group activities available permit instructors to choose from a wealth of problems allowing ample opportunity for students to practice what they learn in lecture to hone their skills In this way the book perfectly complements any learning platform whether traditional lecture or distance learning its instruction is so reflective of what comes from lecture that students will feel as comfortable outside of class as they do inside class with their instructor *Programming for Computations - MATLAB/Octave* Svein Linge, Hans Petter Langtangen, 2016-08-01 This book presents computer programming

as a key method for solving mathematical problems There are two versions of the book one for MATLAB and one for Python The book was inspired by the Springer book TCSE 6 A Primer on Scientific Programming with Python by Langtangen but the style is more accessible and concise in keeping with the needs of engineering students The book outlines the shortest possible path from no previous experience with programming to a set of skills that allows the students to write simple programs for solving common mathematical problems with numerical methods in engineering and science courses The emphasis is on generic algorithms clean design of programs use of functions and automatic tests for verification
