benefits of market orientation and how they can achieve behavioral fit among their activities The second paper presents the empirical work focusing on the qualitative case study performed and the themes of proactiveness that emerged from it These papers are then synthesized into a holistic view of proactive market strategies in the thesis The thesis finds that proactiveness at the firm level in a marketing context means a firm is future oriented initiative taking change inducing and creative With a basis in this definition and the extensive literature on market orientation the thesis presents conceptual developments that are important for understanding proactiveness in market strategy such as a framework for understanding market strategies through firm activities and one for identifying and categorizing different types of proactive activities Furthermore the thesis gives more detailed descriptions of the case firms and how their proactive activities help them achieve success This results in a thorough exploration of proactive market strategies which contributes to the marketing and strategic management literatures by clearly defining proactiveness conceptualizing and describing proactive market strategies and delineating proactive firm activities to better understand how firms are being proactive In doing so the thesis provides interesting directions for future research and presents interesting implications for managerial practice
