Elements of MECHANICAL ENGINEERING Mar 21 2022 This book provides a comprehensive and wide-ranging introduction to the fundamental principles of mechanical engineering in a distinct and clear manner. The book is intended for a core introductory course in the area of foundations and applications of mechanical engineering, prescribed for the first-year students of all disciplines of engineering. The book develops an intuitive understanding of the basic principles of thermodynamics as well as of the principles governing the conversion of heat into energy. Numerous illustrative examples are provided to fortify these concepts throughout. The book gives

the students a feel for how thermodynamics is applied in engineering practice in the areas of heat engines, steam boilers, internal combustion engines, refrigeration and air conditioning, and to devices such as turbines, pumps and compressors. The book also provides a basic understanding of mechanical design, illustrating the principles through a discussion of devices designed for the transmission of motion and power such as couplings, clutches and brakes. No book on basic mechanical engineering is complete without an introduction to materials science. The text covers the treatment of the common engineering materials, highlighting their properties and applications. Finally, the role of lubrication and lubricants in reducing the wear and tear of parts in mechanical systems, is lucidly explained in the concluding chapter. The text features several fully worked-out examples, a fairly large number of numerical problems with answers, end-of-chapter review questions and multiple choice questions, which all enhance the value of the text to the students. Besides the students studying for an engineering degree, this book is also suitable for study by the students of AMIE and the students of diploma level courses.

Transactions of the International Astronomical Union Sep 26 2022 IAU Transactions XXII B summarizes the work of the XXIInd General Assembly. The discourses given during the Inaugural and Closing Ceremonies are reproduced in Chapters I and III, respectively. The proceedings of the two sessions of the General Assembly will be found in Chapter II, which includes the Resolutions and the report of the Finance Committee. The Statutes, Bye-Laws and a few working rules of the Union are published in Chapter IV. The Accounts and other aspects of the administration of the Union are recorded in Chapter V, together with the report of the Executive Committee for this last triennium, and provide the permanent record for the Union in the period 1991-1994. This volume also contains the Commission reports from The Hague compiled by the Presidents of the Commissions (Chapter VI). Finally, Chapter VII contains the list of countries adhering to the Union and the alphabetical, geographical and commission membership lists of about 8000 individual members. The IAU still appears to be unique among the scientific Unions in maintaining this category of individual membership which contributes in a crucial way to the spirit and the aims of the Union.

Energy Developments: New Forms, Renewables, Conservation Nov 16 2021 Energy Developments: New Forms, Renewables, Conservation is a collection of papers that discusses alternative energy sources. In discussing these energy sources, the text considers factors such as technical, economic, and human dimensions. The first part of the text presents articles that cover forms of energy, such as the feasibility of coal gasification and electric power from salinity gradients by reverse electrodialysis. Next, the book reviews materials about renewable forms of energy that include genetically improved hardwoods as a potential energy source and heat pump investigations for northern climate applications. In the last part, the text provides studies that deal with energy conservation, such as shared savings financing for energy efficiency and consumer information, and government energy conservation incentive programs. The book will be of use to scientists, engineers, and technicians involved in the research, development, and implementation of alternative energy technology.

Recovery Management in Business-to-Business Markets Jan 31 2023 The book is related to the handling of product and service failures in business-to-business markets. The concept of “recovery management” embraces all activities of seller firms to effectively handle failure situations in order to restore customer satisfaction and attain customer retention. Since prior research on recovery management has been mostly related to business-to-consumer (B2C) markets and business-to-business markets (B2B) reflect significantly different characteristics, a context-specific approach to handle product or service failures in B2B markets is required by researchers and practitioners alike. Based on a profound qualitative and quantitative investigation, Kristian Döschner derives the fundamental conceptual dimensions and discloses the relational consequences as well as the financial contributions of recovery management in B2B markets.

Astronomy in India: A Historical Perspective Aug 26 2022 India has a strong and ancient tradition of astronomy, which seamlessly merges with the current activities in Astronomy and Astrophysics in the country. While the younger generation of astronomers and students are reasonably familiar with the current facilities and the astronomical research, they might not have an equally good knowledge of the rich history of Indian astronomy. This particular volume, brought out as a part of the Platinum Jubilee Celebrations of Indian National Science Academy, concentrates on selected aspects of historical development of Indian astronomy in the form of six invited chapters. Two of the chapters – by Balachandra Rao and M.S. Sriram – cover ancient astronomy and the development of calculus in the ancient Kerala text Yuktibhasa. The other four chapters by B.V. Sreekantan, Siraj Hasan, Govind Swarup and Jayant Narlikar deal with the contemporary history of Indian astronomy covering space astronomy, optical astronomy, radio astronomy and developments in relativistic astrophysics. These chapters, written by experts in the field, provide an in-depth study of the subject and make this volume quite unique.

Culture Management Jul 25 2022 "Dr Lukasz Wroblewski's book Culture Management: Strategy and Marketing Aspects clearly recognises that the pressures on the cultural sector in the 21st Century are greater than ever before. Based on robust academic research within a practical industry context, this book addresses all the key issues related to marketing strategy and planning for the cultural industries. It will be an invaluable tool for managers, policy-makers and all those working in the creative and cultural world, and will help them to develop sound strategies for the future." Dr Kim Lehman Tasmanian School of Business and Economics, University of Tasmania "Dr Wroblewski's book explains clearly what has changed to make the use of business models necessary, even in organizations which might have resisted in the past. Globalization has resulted in a population which understands and appreciates art and culture created in other countries. While it might be agreed that this is beneficial for society, it means that cultural arbitrators within a country no longer have the authority to dictate what is accepted as culture. Managers now understand that to gain the support of the public they must explain the benefits of consuming their cultural product." Dr Bonita M. Kolb Professor Emeritus of Lycoming College in Pennsylvania "A thoughtful and penetrating analysis of culture management addressing marketing strategies and cultural institutions. An important 'must read' book for those involved in this exciting sector." Prof Adrian Payne University of UNSW Business School, University of New South Wales
