

UNIT V: Worksheet 4

1. Suppose a hanging 1.0 kg lab mass is attached to a 4.0 kg block on the table.

$$F_{\text{net}} = ma$$

$$a = \frac{F_{\text{net}}}{m}$$

- a. If the coefficient of kinetic friction, μ_k , is 0.20., what is the acceleration of the block?

$$F_n = +40\text{N} \quad F_{g\text{-block}} = -40\text{N} \quad F_{\text{applied}} = F_{g\text{-mass}} = 10\text{N}$$

$$F_f = 0.20(+40\text{N}) = 8\text{N}$$

$$F_{\text{net}} = F_f + F_{\text{applied}} = -8\text{N} + 10\text{N} = +2\text{N} = 5.0\text{kg}(a)$$

$$a = +0.2\text{m/s}^2$$

- b. What would be the minimum value of the coefficient of static friction, μ_s , in order for the block to remain motionless?

$$F_{\text{net}} = F_f + F_{\text{applied}} = -10\text{N} + 10\text{N} = 0\text{N} \text{ so } 10\text{N} = \mu_s 40\text{N} \quad \mu_s = 0.25$$

2. A block weighing 300. N is moved *at constant speed* over a horizontal surface by a force of 50. N applied parallel to the surface.

- a. Construct a force diagram for the block.

Curriculum Models for the 21st Century Maree Gosper, Dirk Ifenthaler, 2013-08-28 Changing student profiles and the increasing availability of mainstream and specialized learning technologies are stretching the traditional face to face models of teaching and learning in higher education Institutions too are facing far reaching systemic changes which are placing strains on existing resources and physical infrastructure and calling into question traditional ways of teaching through lectures and tutorials And with an ever increasing scrutiny on teaching and teachers accountability for positive educational outcomes the call for closer attention to learning teaching and most especially to the design and delivery of the curriculum is given increasing relevance and importance Research provides strong evidence of the potential for technologies to facilitate not only cognition and learning but also to become integral components in the redesign of current curriculum models Some Universities and individual academics have moved along this pathway developing new and innovative curriculum blending pedagogies and technologies to suit their circumstances Yet there are others unsure of the possibilities the opportunities and constraints in these changing times Curriculum Models for the 21st Century gives insights into how teaching and learning can be done differently The focus is on a whole of curriculum approach looking at theoretical models and examples of practice which capitalize on the potential of technologies to deliver variations and alternatives to the more traditional lecture based model of University teaching

Making a Difference: Volume I and II Sasha A. Barab, Kenneth E. Hay, Nancy Butler Songer, Daniel T. Hickey, 2017-09-05 William Wordsworth 1770-1850 needs little introduction as the central figure in Romantic poetry and a crucial influence in the development of poetry generally. This broad-ranging survey redefines the variety of his writing by showing how it incorporates contemporary concepts of language difference and the ways in which popular and serious literature were compared and distinguished during this period. It discusses many of Wordsworth's later poems, comparing his work with that of his regional contemporaries as well as major writers such as Scott. The key theme of relationship both between characters within poems and between poet and reader is explored through Wordsworth's construction of community and his use of power relationships. A serious discussion of the place of sexual feeling in his writing is also included.
