The Link Uncovering Our Earliest Ancestor Colin Tudge

The Link Colin Tudge, 2009-05-20 For more than a century scientists have raced to unravel the human family tree and have grappled with its complications Now with an astonishing new discovery everything we thought we knew about primate origins could change Lying inside a high security vault deep within the heart of one of the world's leading natural history museums is the scientific find of a lifetime a perfectly fossilized early primate older than the previously most famous primate fossil Lucy by forty four million years A secret until now the fossil Ida to the researchers who have painstakingly verified her provenance is the most complete primate fossil ever found Forty seven million years old Ida rewrites what we've assumed about the earliest primate origins Her completeness is unparalleled so much of what we understand about evolution comes from partial fossils and even single bones but Ida's fossilization offers much more than that from a haunting skin shadow to her stomach contents And remarkably knowledge of her discovery and existence almost never saw the light of day With exclusive access to the first scientist to study her the award winning science writer Colin Tudge tells the history of Ida and her place in the world A magnificent cutting edge scientific detective story followed her discovery and **The Link** offers a wide ranging investigation into Ida and our earliest origins At the same time it opens a stunningly evocative window into our past and changes what we know about primate evolution and ultimately our own **The Link** Tudge Colin Young

Pure Imagination Mel Stuart, 2001-01-01 From the director of *Willy Wonka* and the *Chocolate Factory* comes a dazzling retrospective celebrating the legacy of this beloved film 100 photos many in color **The Bird** Colin Tudge, 2010-09-07 How are birds so good at flying and navigating Why are birds so like mammals and yet so very different Did birds descend from dinosaurs and if so does that mean birds are dinosaurs How do they court each other and fend off rivals What's being communicated in birdsong Can we ever know how birds think In this fascinating exploration of the avian class Colin Tudge considers the creatures of the air From their evolutionary roots to their flying feeding fighting mating nesting and communicating Tudge provocatively ponders what birds actually do as well as why they do it and how With the same curiosity passion and insight he brought to *Redwoods Pines and Palm Trees* in his widely acclaimed book *The Tree* Tudge here studies sparrows parrots and even the Monkey eating Eagle to better understand their world and our own There is far more to a bird's existence than gliding gracefully on air currents or chirping sweetly from fence posts the stakes are life and death By observing and explaining the complex strategy that comes into play with everything from migration to social interaction to the timing of giving birth to young Tudge reveals how birds are uniquely equipped biologically to succeed and survive And he

offers an impassioned plea for humans to learn to coexist with birds without continuing to endanger their survival Complete with an annotated cast list of all the known birds in the world plus gorgeous illustrations The Bird is a comprehensive and delightfully accessible guide for everyone from dedicated birders to casual birdwatchers that celebrates and illuminates the remarkable lives of birds *The Tree* Colin Tudge,2007-10-23 A blend of history science philosophy and environmentalism The Tree is an engaging and elegant look at the life of the tree and what modern research tells us about their future There are redwoods in California that were ancient by the time Columbus first landed and pines still alive that germinated around the time humans invented writing There are Douglas firs as tall as skyscrapers and a banyan tree in Calcutta as big as a football field From the tallest to the smallest trees inspire wonder in all of us and in The Tree Colin Tudge travels around the world throughout the United States the Costa Rican rain forest Panama and Brazil India New Zealand China and most of Europe bringing to life stories and facts about the trees around us how they grow old how they eat and reproduce how they talk to one another and they do and why they came to exist in the first place He considers the pitfalls of being tall the things that trees produce from nuts and rubber to wood and even the complicated debt that we as humans owe them Tudge takes us to the Amazon in flood when the water is deep enough to submerge the forest entirely and fish feed on fruit while river dolphins race through the canopy He explains the memory of a tree how those that have been shaken by wind grow thicker and sturdier while those attacked by pests grow smaller leaves the following year and reveals how it is that the same trees found in the United States are also native to China but not Europe From tiny saplings to centuries old redwoods and desert palms from the backyards of the American heartland to the rain forests of the Amazon and the bamboo forests Colin Tudge takes the reader on a journey through history and illuminates our ever present but often ignored companions *Creation and Evolution* Lenn E. Goodman,2010-04-05 Can religion survive Darwinism Do scientists entering the lab or heading for the field have to bracket or reject outright all religious commitments and convictions Trenchantly laying out the evidence for natural selection and carefully following and underscoring the themes and theses of Genesis L E Goodman traces the historical and conceptual backgrounds of today s evolution controversies revealing the deep complementarities of religion and the life sciences Solidly researched and replete with scientific case studies vignettes from intellectual history and thoughtful argument Creation and Evolution forthrightly exposes the strengths and weaknesses of today s polarized battle camps Religious and scientific fundamentalisms Goodman shows obscure the real biblical message and distort the deepest insights and richest findings of Darwinian science **David Attenborough's First Life: A Journey Back in Time with Matt Kaplan** Matt Kaplan,2010-11-29 The epic story of the beginning of life on Earth from the much loved and respected naturalist writer and broadcaster Sir David Attenborough [The Horse](#) Wendy Williams,2015-10-27 The New York Times bestseller Lifelong equestrian enthusiast Williams takes on the topic at full gallop a lively fascinating read Discover A Best Book of 2015 The Wall Street Journal A New York Times Book Review Editors Choice Journalist and equestrienne Wendy

Williams chronicles the 56 million year journey of horses as she visits with experts around the world exploring what our biological affinities and differences can tell us about the bond between horses and humans and what our longtime companion might think and feel. Indeed, recent scientific breakthroughs regarding the social and cognitive capacities of the horse and its ability to adapt to changing ecosystems indicate that this animal is a major evolutionary triumph. Williams charts the course that leads to our modern Equus from the protohorse to the Dutch Warmbloods, Thoroughbreds, and cow ponies of the twenty-first century. She observes magnificent ancient cave art in France and Spain that signals a deep respect and admiration for horses well before they were domesticated; visits the mountains of Wyoming with experts in equine behavior to understand the dynamics of free-roaming mustangs; witnesses the fluid gracefulness of the famous Lipizzans of Vienna; contemplates what life is like for the sure-footed mustachioed Garrano horses who thrive on the rugged terrain of Galicia; meets a family devoted to rehabilitating abandoned mustangs on their New Hampshire farm; celebrates the Takhi horses of Mongolia; and more. She blends profound scientific insights with remarkable stories to create a unique biography of the horse as a sentient being with a fascinating past and a finely nuanced mind.

Perspectives on Science and Culture Kris Rutten, Stefaan Blancke, Ronald Soetaert, 2018-02-15 Edited by Kris Rutten, Stefaan Blancke, and Ronald Soetaert. *Perspectives on Science and Culture* explores the intersection between scientific understanding and cultural representation from an interdisciplinary perspective. Contributors to the volume analyze representations of science and scientific discourse from the perspectives of rhetorical criticism, comparative cultural studies, narratology, educational studies, discourse analysis, naturalized epistemology, and the cognitive sciences. The main objective of the volume is to explore how particular cognitive predispositions and cultural representations both shape and distort the public debate about scientific controversies, the teaching and learning of science, and the development of science itself. The theoretical background of the articles in the volume integrates C. P. Snow's concept of the two cultures (science and the humanities) and Jerome Bruner's confrontation between narrative and logico-scientific modes of thinking, i.e., the cognitive and the evolutionary approaches to human cognition.

History's Mysteries Brian Haughton, 2010-04-20 *History's Mysteries* is an absorbing and meticulously researched exploration of the archaeology, history, and mysteries of 35 ancient places worldwide. Haughton's book takes the reader on an unforgettable journey from the 8,000-year-old stone circle of Nabta Playa to India's magical Taj Mahal; from Rhode Island's controversial Newport Tower to the enigmatic Royston Cave in the UK; from the strange medieval castle village of Rennes-le-Château to the massive ancient-walled city of Great Zimbabwe. Using the latest archaeological evidence, *History's Mysteries* explores the incredible archaeological discoveries at the 11,000-year-old sanctuary of Göbekli Tepe in Turkey; the heated debate over the 47-million-year-old Ida Fossil; could it be the missing link in our evolutionary history? The reality behind controversial ancient artifacts such as the Iron Pillar of Delhi, the Oak Island Treasure, and Egypt's Dendera Lamps. What really happened to the Neanderthals? With 36 photographs and illustrations, this is the perfect reference work for those fascinated by the great
