Report of the Presidential Commission on the Space Shuttle Challenger Accident DIANE Publishing Company, Southgate Publishers,1995-07

Statistics and Probability for Engineering Applications William DeCoursey,2003-05-14 Statistics and Probability for Engineering Applications provides a complete discussion of all the major topics typically covered in a college engineering statistics course This textbook minimizes the derivations and mathematical theory focusing instead on the information and techniques most needed and used in engineering applications It is filled with practical techniques directly applicable on the job Written by an experienced industry engineer and statistics professor this book makes learning statistical methods easier for today s student This book can be read sequentially like a normal textbook but it is designed to be used as a handbook pointing the reader to the topics and sections pertinent to a particular type of statistical problem Each new concept is clearly and briefly described whenever possible by relating it to previous topics Then the student is given carefully chosen examples to deepen understanding of the basic ideas and how they are applied in engineering The examples and case studies are taken from real world engineering problems and use real data A number of practice problems are provided for each section with answers in the back for selected problems This book will appeal to engineers in the entire engineering spectrum electronics electrical mechanical chemical and civil engineering engineering students and students taking computer science computer engineering graduate courses scientists needing to use applied statistical methods and engineering technicians and technologists Filled with practical techniques directly applicable on the job Contains hundreds of solved problems and case studies using real data sets Avoids unnecessary theory

Advanced Techniques for Surface Engineering W. Gissler,H.A. Jehn,2013-04-17 Today s shortages of resources make the search for wear and corrosion resistant materials one of the most important tasks of the next century Since the surface of a material is the location where any interaction occurs it is that there the hardest requirements on the material are imposed to be wear resistant for tools and bearings to be corrosion resistant for turbine blades and tubes in the petrochemical industry to be antireflecting for solar cells to be decorative for architectural panels and to combine several of these properties in other applications Surface engineering is the general term that incorporates all

the techniques by which a surface modification can be accomplished These techniques include both coating and modification of the surface by ion implantation and laser beam melting In recent years a continuously growing number of these techniques were developed to the extent that it became more and more difficult to maintain an overlook and to understand which of these highly differentiated techniques might be applied to resolve a given surface engineering problem A similar development is also occurring for surface characterization techniques This volume contains contributions from renowned scientists and engineers to the Eurocourse the aim of which was to inform about the various techniques and to give a comprehensive survey of the latest development on this subject
