The Pesticide Detox Jules N. Pretty,2012-07-26 Since the 1960s the world s population has more than doubled and agricultural production per person has increased by a third Yet this growth in production has masked enormous hidden costs arising from widespread pesticide use massive ecological damage and high incidences of farmer poisoning and chronic health effects Whereas once the risks involved with pesticide use were judged to be outweighed by the potential benefits increasingly the external costs of pesticides to environments and human health are being seen as unacceptable In response to this trend recent years have seen millions of farmers in communities around the world reduce their use of harmful pesticides and develop cheaper and safer alternatives The Pesticide Detox explores the potential for the phasing out of hazardous pesticides and the phasing in of cost effective alternatives already available on the market This book makes clear that it is time to start the pesticide detox and to move towards a more sustainable agriculture

The Ecology of Urban Habitats Oliver Gilbert,2012-12-06 This book is about the plants and animals of urban areas not the urban fringe not encapsulated countryside but those parts of towns where man s impact is greatest The powerful anthropogenic influences that operate in cities have until recently rendered them unattractive to ecologists who find the high proportion of exotics and mixtures of planted and spontaneous vegetation bewildering They are also unused to considering fashion taste mowing machines and the behaviour of dog owners as habitat factors I have always maintained however and I hope this book demonstrates that there are as many interrelationships to be uncovered in a flower bed as in a field in a cemetery as on a sand dune and due to the well documented history of urban sites together with the strong effects of management they are frequently easier to interpret than those operating in more natural areas The potential of these communities as rewarding areas for study is revealed in the literature on the pests of stored products urban foxes and birds The journals of local natural history societies have also provided a rich source of material as amateurs have never been averse to following the fortunes of their favourite groups into the heart of our cities It is predictable that among the few professionals to specialize in this discipline have been those enclosed in West Berlin who must be regarded as among the leading exponents of urban ecology
