"MCQs in Gynaecology and Obstetrics will help medical students prepare for exams during clinical attachments and medical finals. This comprehensive self-assessment text accompanies the well-known volumes, Gynaecology by Ten Teachers and Obstetrics by Ten Teachers. Questions and answers are referenced to appropriate chapters in these texts."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved This text comprises some 360 multiple-choice questions divided into four practice papers of 90 questions, each designed to assess the understanding of concepts and problems in obstetrics and gynaecology. Brief answers and cross-references to the parent-volume, Key Topics in Obstetrics and Gynaecology, are included for the detailed background to the question and its answers. This book has been written for medical students preparing for the final MBBS examination and for postgraduate students preparing for the Doctor of Medicine in Obstetrics and Gynaecology Part 2 and MRCOG Part 3 examinations. With over 300 images, the questions have been included from almost every practical procedure which is carried out in the antenatal and gynaecology wards, clinics and the labour ward. History taking, communication skills, surgical skills and teaching modules have been included. Basic Sciences for Obstetrics and Gynaecology - MCQs presents sample multiple choice questions and answers dealing with the basic sciences in obstetrics and gynaecology. The aim of the volume is to give those candidates studying for examinations such as the MRCOG Part 1 a flavour of the examination itself. - book cover. The book is targeted at the candidates appearing for the MRCOG Part 2, which is a

compulsory examination for postgraduate trainees in the UK who aspire to pursue a career in obstetrics and gynaecology. Apart from the UK postgraduates, MRCOG examination is taken by postgraduates all across the globe to obtain this prestigious degree. The examination is carried out twice a year, and the venues are London, Manchester, Glasgow and Belfast in the UK. The examination also takes place in Bangladesh, Egypt, Hong Kong, India (2 centres), Iraq, Jordan, Malaysia, Pakistan, Saudi Arabia, Sudan, Dubai and Jamaica. At each centre, the number of candidates participating varies between 5 and 200. Apart from the candidates appearing for this examination, this book would be helpful for the assessment of knowledge in all postgraduate trainees in obstetrics and gynaecology worldwide. Therefore, this book has a wide target group. A unique characteristic of this book is that it produces a comprehensive set of both types of questions covering all the modules of the MRCOG Part 2 syllabus (www.rcog.org.uk). A broad range of reading material has been used to develop the EMQs and SBAs including RCOG Greentop Guidelines, Scientific Impact Papers, Clinical Governance Papers and RCOG Consent Advice. In addition to the RCOG revision material, the authors have included questions from The Obstetrician & Gynaecologist (TOG), NICE Guidelines, StratOG and recommended textbooks. The authors have experience in MRCOG examination question writing, and Sharmistha Guha has been a co-lead for the London SBA Writing Group for the RCOG. The questions have been written to the same standard as the RCOG question bank. Mr. Gregory Ward, who is the Head of London Specialty School of Obstetrics and Gynaecology, wrote the foreword of the book. He is a senior clinician, a RCOG examiner and member of the RCOG SBA committee. He has provided guidance continually to ensure the quality of the questions is up to the standard of RCOG. It is important to recognize that this book is not a textbook and should not be used as the sole reading material for the examination. However, the questions will be especially useful in gaining valuable examination practice. An explanation has been provided for all of the questions along with references to aid in the preparation. A reading guide has been provided for assistance. The authors hope that this will be a useful tool in preparation for this crucial examination. Obstetrics and Gynecology at a Glance is the perfect guide for medical students, junior doctors and midwives, and is ideal for those embarking on clinical rotations and the clerkship. This is an obstetrics and gynecology question book designed to help medical students do well on the USMLE/COMLEX, shelf exams, and rotations. It is also a good preparation for those students who want to enter into an obstetrics and gynecology residency

program. This book is a supplement to Medical School Companion Obstetrics and Gynecology book. It contains numerous medical diagrams, sonogram, and images which make it easier for students to learn. This book is also useful for PA students, NP students, CNM students, and nonmedical professionals. This book is a compact question-based review of the most critical topics an obstetrician will come across in practice. Each chapter includes 10-30 multiple-choice questions designed to test the readers' understanding surrounding one obstetric topic. Based on all 45 obstetric based practice bulletins by ACOG, this text is designed to keep practitioners up-to-date with the latest evidence based medicine. Sample topics include: anemia in pregnancy, screening for fetal chromosomal abnormalities, and vaginal birth after previous cesarean delivery. This is an ideal tool for attendings and clerkship directors who frequently test residents and medical students during rounds and in the classroom. This review also proves useful for practicing physicians and physicians-in-training who want to self-evaluate their comprehension and study for board examinations. The ultimate case-based review of OB/GYN-ideal for exam prep and clinical reference

4 STAR DOODY'S REVIEW! "In a busy field like obstetrics/gynecology, this book provides a useful review of relevant topics in vignette fashion. It offers excellent references at the end of each vignette to more critically review topics as well. Excellent for CREOGs or board review."--Doody's Review Service

Using a unique "vignette & question" format at the core of a case conference, this one-of-a-kind resource expertly explains clinical and educational concepts--each selected for their relevance for clinical practice and preparation for any test you may face. After a brief, illustrated clinical presentation (one or two figures per vignette), the authors "work through" the diagnosis and management of a particular case, answering questions as they go. Supporting this real-world, bedside perspective are appropriate references for all of the evidence-based answers, plus brief explanations that call attention to key concepts and information. Obstetrics & Gynecology features: 150 clinical vignettes in one convenient volume, covering the full spectrum of OB/GYN, from postpartum mastitis and fetal heart rate monitoring... to elective abortion... to breast and cervical cancer 1000 questions and answers relating to each clinical vignette--an easy-to-read, evidence-based study tool for review Study-enhancing complete references that conveniently accompany answers to the clinical vignette questions A streamlined, easy-access organization that includes sections on office management (including general health and screening), obstetrics, gynecology, reproductive endocrine and infertility, gynecologic oncology, and urogynecology And much more

Ask Your Gynecologist was written for all of the women who cannot find the information they need to answer their questions about their bodies. Drs. Thornton and Schramm examine the most commonly asked questions and give valuable insight and advice about everything related to gynecology, including pap smears, the menstrual cycle, family planning, infections and disorders, pregnancy, and surgery. Each chapter is divided into questions so readers can look up specific issues quickly. Examples inspired by real women's situations are also included so readers can see that all of their questions are valid and worth asking. Advice on how to choose a gynecologist, when to make an appointment, and how to ensure that daughters visit a doctor is also included, as well as a full glossary and index. The Part 1 MRCOG covers basic science knowledge as it applies to obstetrics and gynaecology. There are two papers, both of which contain a mixture of single best answer questions (SBAs) and multiple choice questions (MCQs). This book provides a verbatim transcript for the MCQ element of each of the 10 papers set between 1997 and 2001, giving candidates the opportunity to test their knowledge and preparedness for the examination against real questions. This new review guide contains approximately 500 multiple choice questions on obstetrics and gynecology. Each question is followed by the correct answer and an explanation of the answer. A PC disk accompanies the book, enabling the reader to take several practice tests under exam conditions. This book, based on non-interactive question-and-answer format, offers an essential guide for medical students who need to prepare for oral exams or clinical visits. Starting from specific clinical situations the volume provides clear questions on the theory related to the cases. Each question is followed by correct answers that summarize the main information. Suggested reading are included to deepen the topics and enhance the readers' knowledge. Accordingly, this

practical guide will help students get ready for their oral exams, and help prepare young residents for their first clinical cases. This new text includes 50 cases representing obstetric and gynecologic problems commonly encountered in the hospital clinic setting. The reader is taken through all aspects of the cases in a step-by-step manner. Each chapter concludes with a differential diagnosis cross-linked to questions in the case material. A unique and informative reference. Eranthi Samarakoon understands the difficulties faced by students ever since the single best answer (SBA) questions were introduced in medical curricula in many countries around the world. She realises that the successful preparation for a professional examination requires understanding the style of the questions asked and the process of the examination. With these goals in mind, she has produced this set of two books containing a large number of questions in obstetrics (214) and gynaecology (214) to help the students in facing the examination with confidence. We have all heard of Single Best Answers (SBA), Multiple Choice Questions (MCQ), Extended Match Questions (EMQ) and True and False Questions. However we have not heard of Multiple Statement Questions (MSQ). Well maybe because they were not there! To the best of my knowledge, this is the first time this question format is introduced into a medical book form. In MSQ there are four questions and no option is given for the answers. What happens is that in MSQ all the statements are intended to have the same answer response. The difference is that the students have options of questions as opposed to SBA where they have options of answers. Therefore, if students cannot find a correct answer from the first statement maybe they can in the second, third or even the fourth statement. As the statements are fact based on a particular topic, they will also be able to learn in the process of answering. Therefore this is an opportunity for students to explore the MSQ and enhance their knowledge.
