

**SECTION 12.2** *Weather Systems*

In your textbook, read about global winds and how Earth's rotation affects their movement. Use each of the terms below just once to complete the passage.

intertropical convergence zone      rotation      North America      jet streams  
 trade winds      southwest      polar jet streams      Coriolis effect  
 low pressure      prevailing westerlies      polar easterlies      northeast

The **(1)** \_\_\_\_\_ deflects moving air to the right in the northern hemisphere and to the left in the southern hemisphere. The cause of this is Earth's **(2)** \_\_\_\_\_.

Each hemisphere has three basic wind systems. The first, at 30° latitude north and south, is known as the **(3)** \_\_\_\_\_. There, air sinks, warms, and moves toward the equator from northeast to southwest in the northern hemisphere and from southeast to northwest in the southern hemisphere. When the air reaches the equator, it rises, then moves back toward 30° to start the cycle again. These winds from both hemispheres converge at the equator. They are forced upward, creating an area of **(4)** \_\_\_\_\_. This area near the equator is called the **(5)** \_\_\_\_\_.

The second wind system, called the **(6)** \_\_\_\_\_, flows between 30° and 60° latitude north and south of the equator. Its circulation pattern is opposite that of the wind system discussed above. These winds are responsible for the movement of many weather systems across much of **(7)** \_\_\_\_\_.

The third wind system, the **(8)** \_\_\_\_\_, lies between the poles and 60° latitude. In the northern hemisphere, these winds flow from the **(9)** \_\_\_\_\_ to the **(10)** \_\_\_\_\_. They flow in the opposite direction in the southern hemisphere.

Narrow bands of fast, high-altitude, westerly winds called **(11)** \_\_\_\_\_ flow at the boundaries between wind zones in the middle latitudes. These bands of wind steer weather systems in the middle latitudes. The most important one, the **(12)** \_\_\_\_\_, separates the polar easterlies from the prevailing westerlies.
