

Research Paper Proposal Sample

A research proposal considers your overall topic ideas, your research question, your research process, and your sources and scaffolds what the next steps will be for the project. Many disciplines require written proposals before an experiment can be run, before a presentation can be made, before a seminar paper can be written. Research proposals can vary in length depending on the scale and scope of the project at hand. However, in general, all share certain conventions: framing of the project or contextualization or putting the project in context or conversation with other research; a tentative thesis or claim or hypothesis; an approach or methodology; target audience; tentative sources or references. Depending on the academic discipline, a research proposal may include other required features.

For example, the following is a one-page seminar paper proposal for a literature class:

Paper Proposal: 'You Looks Like Youse Yo' Own Daughter': Figuring (In)fertility and Maternity in *Their Eyes Were Watching God*

Although critical responses to Hurston's *Their Eyes Were Watching God* have focused extensively on both sexuality and images of fecundity in the text, analyses that fully address fertility and maternity in the novel are as strangely absent from the critical literature as the presumable fact of Janie's reproductive capacity is from the text itself. Unlike Nella Larsen's roughly contemporary novel *Quicksand*, Hurston not only seems to deny the notion that marriage is death for women, she also disrupts the traditional association of marriage with pregnancy/childbirth (McDowell xx). It is unclear whether Hurston took this non-approach to Janie's fertility in the novel as a means of disequating marriage and childbirth, or simply because pregnancy and maternity did not figure in the story she wanted to tell. However, the novel's emphasis on fertility in nature and sexuality renders this textual absence particularly problematic.

The proposed paper will begin with an examination of the ample fertility imagery in the novel. Janie's early conflation of fertility in nature, sexual desire, and marriage will be discussed, followed by the role that sexuality plays in each of her marriages. Then, the textual absence of Janie's reproductive fertility will be addressed, as well as a discussion of whether this textual absence is evidence of the novel's failed realism, as some critics have suggested, or a byproduct of the idealization of the world of the novel. A short discussion of the trope of textual absence or elision of conception and pregnancy in the works of several African American women writers will also be included.

Although I have not yet fully formulated the theoretical framework I will use to account for the problematic treatment of Janie's fertility in the novel, the textual elements that I am planning to discuss will be the extended mule metaphor/imagery (with its implications of sterility) and the depiction of other maternal relationships in the novel (particularly those of Nanny and Leafy to both each other and to Janie). Finally, I will relate the treatment of maternity and fertility in the novel with the overarching theme of Janie's quest for fulfillment/selfhood/voice/independence/embodiment.

Several extensive searches of the critical literature addressing *Their Eyes* have failed to reveal any full-length articles addressing the textual absence of Janie's fertility. The articles listed below address various aspects of sexuality and sexual autonomy, marriage, and fertility imagery in the novel.

Research Projects and Research Proposals Paul G. Chapin, 2004-07-19 Paul Chapin's guide to writing proposals for scientific research can be used by scientists in any discipline who submit papers to funding agencies to gain support for their research projects. A longtime program officer at the National Science Foundation, Chapin treats the proposal as one part of a larger process of planning a research project which makes it easier to write and more likely to be effective. The book differs from other guides by treating proposal writing in the larger context of project planning from an insider's perspective. Paul G. Chapin became the first director of the NSF Linguistics Program when it was established in October 1975. He continued as NSF's Program Director for Linguistics until 1999 with three interruptions: one year serving as Deputy Division Director for Behavioral and Neural Sciences, one year's detail as a staff associate to the head of the Office of Information Systems, and a year's sabbatical leave to study mathematics at George Washington University. From 1999 until his retirement in 2001, Chapin served as a senior program officer for cross-disciplinary activities at the NSF. On the occasion of his retirement, the NSF presented him with the Director's Superior Accomplishment Award, and the Linguistic Society of America awarded him the first annual Victoria A. Fromkin Award for Distinguished Service to the Profession.

How to Practice Academic Medicine and Publish from Developing Countries? Samiran Nundy, Atul Kakar, Zulfiqar A. Bhutta, 2021-10-23 This is an open access book. The book provides an overview of the state of research in developing countries: Africa, Latin America, and Asia, especially India, and why research and publications are important in these regions. It addresses budding but struggling academics in low and middle income countries. It is written mainly by senior colleagues who have experienced and recognized the challenges with design, documentation, and publication of health research in the developing world. The book includes short chapters providing insight into planning research at the undergraduate or postgraduate level, issues related to research ethics and conduct of clinical trials. It also serves as a guide towards establishing a research question and research methodology. It covers important concepts such as writing a paper, the submission process, dealing with rejection and revisions, and covers additional topics such as planning lectures and presentations. The book will be useful for graduates, postgraduates, teachers, as well as physicians and practitioners all over the developing world who are interested in academic medicine and wish to do medical research.
