The Liars of Nature and the Nature of Liars Jan 21 2021 A natural history of cheating from selfish genes to lying politicians Nature is rife with cheating. Possums play possum, feigning death to cheat predators. Crows cry wolf to scare off rivals. Amphibians and reptiles are inveterate impostors. Even genes and cells cheat. The Liars of Nature and the Nature of Liars explores the evolution of cheating in the natural world, revealing how dishonesty has given rise to wondrous diversity. Blending cutting-edge science with a wealth of illuminating examples—from microscopic organisms to highly intelligent birds and mammals—Lixing Sun shows how cheating in nature relies on two basic rules. One is lying, by which cheaters exploit honest messages in communication signals and use them to serve their own interests. The other is deceiving, by which cheaters exploit the biases and loopholes in the sensory systems of other creatures. Sun demonstrates that cheating serves as a potent catalyst in the evolutionary arms race between the cheating and the cheated, resulting in a biological world teeming with complexity and beauty. Brimming with insight and humor, The Liars of Nature and the Nature of Liars also looks at the prevalence of cheating in human society, identifying the kinds of cheating that spur innovation and cultural vitality and laying down a blueprint for combatting malicious cheating such as fake news and disinformation.

Playing the Lying Game Feb 22 2021 Whether it's in business or politics, between friends, inside a family, or within intimate relationships, lies abound. This book examines who lies and why, identifies six types of lies and liars, and suggests how to protect yourself from manipulation. Everyone lies, perhaps to protect the feelings of another, perhaps to secure a deal that will, in the end, benefit all parties. In Playing the Lying Game: Detecting and Dealing with Lies and Liars, from Occasional Fibbers to

Frequent Fabricators, accomplished author Gini Graham Scott shares psychological insights into lying that will help answer such questions—and many more. Scott examines every facet of lying, including its history, cultural connections, and motivations. She identifies six types of lies and liars and explains how to detect each type, whether one is confronted with the occasional fibber or a sociopathic, compulsive liar. The book covers lies told in business and politics, lies among friends, lies between dates, married couples, and family members, as well as lies we tell our ourselves. Finally, Scott offers a Lie-Q Test that will help us see how savvy we are—or are not—in detecting fibs, mistruths, and downright deceptions.

Born Liars Jun 20 2023 Lying is an intrinsic part of our social fabric, but it is also a deeply problematic and misunderstood aspect of what makes us human. Ian Leslie takes us on a fascinating journey that makes us question not only our own relationship to the truth, but also virtually every daily encounter we have. On the way he dissects the history of the lie detector, how parents affect their children's attitude to lying (and vice versa), Who Wants to Be a Millionaire?, the philosophical ambiguity of telling the truth, Bill Clinton's presentational prowess, Wonder Woman's lasso of truth, and why we should be wary of anyone with more than 150 Facebook friends. *Born Liars* is thought-provoking, anecdotally driven narrative nonfiction at its best. Ian Leslie's intoxicating blend of anthropology, biology, cultural history, philosophy, and popular psychology belies a serious central message: that humans have evolved and thrived in large part because of their ability to deceive.

Liars Apr 06 2022 "Liars are causing devastating problems. They are endangering public health. They are threatening self-government. They are destroying the reputation of good people - and inflating the reputation of people who are not so good. Nonetheless, falsehoods ought not to be censored or regulated, even if they are lies. Free societies allow them. Public officials should not be allowed to act as the truth police. A key reason is that we cannot trust officials to separate truth from falsehood; their own judgments are unreliable, and their own biases get in the way. If officials are licensed to punish falsehoods, they will end up punishing dissent. The best response to falsehoods is usually to correct them, rather than to punish or censor them. At the same time, governments should have the power to regulate the most harmful lies and falsehoods. In brief: False statements are not constitutionally protected if the government can show that they threaten to cause serious harm. Public officials should be able to restrict and punish lies and falsehoods that pose serious threats to public health and safety. To protect the democratic process, public officials should be able to restrict certain lies and falsehoods. They should be able to safeguard people's reputations. Private institutions, including television networks, magazines, and newspapers, and social media platforms such as Facebook and Twitter, should be doing much more to slow or stop the spread of lies and falsehoods"--
