through the fire having been used in mimeographed form in my classes for three years Indeed the first two thirds Of the volume has been completely reorganized several times I have followed the practice of making the revisions immediately following the class periods while the difficulties and problems suggested by the class discussions were fresh in mind It is of course a common experience that certain questions prove ambiguous that others carry the student too far afield or into problems that cannot be analyzed on the basis of material already covered and even more important that the arrangement of the questions is pedagogically poor or unsound I do not utter myself however that the revisions the book has undergone in actual use have resulted in a high degree of standardization even for my own use much less for the purposes of other teachers In fact I seriously doubt if any great amount of standardization is either possible or desirable for I am a strong believer in individuality in instruction Ideally every teacher Should have his own book of questions regardless Of the text used About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
