Privilege Michael S. Kimmel, Abby L. Ferber, 2003-02-06 In this new and timely anthology on the experience of privilege in America as it relates to holding the identity of the dominant gender class race and sexual preference sociologists Michael Kimmel and Abby Ferber along with a wide range of contributors challenge students to think more critically about the myriad inequalities in society and especially to become more aware of how the dynamics that create inequality for some also benefit others Designed to be used in both introductory sociology and race gender and class courses this exciting volume asks that privilege and students own role in it become more visible With both well known and previously published pieces as well as new contributions Privilege uses an intersectional approach to explore the ways in which race class gender and sexuality interact in the lives of those who are privileged by one or more of these identities Kimmel and Ferber have brought together leading thinkers and writers on all of these dimensions to examine both the parallels and the ruptures among these different but connected relationships Writing both personally and analytically these essays can bring students inside the experiences and enable us all to begin to theorize our own lives as well as to explore the ways in which these systems intersect in people s lives

Making Sense of Race, Class, and Gender Celine-Marie Pascale, 2013-02-01 Using arresting case studies of how ordinary people understand the concepts of race class and gender Celine Marie Pascale shows that the peculiarity of commonsense is that it imposes obviousness that which we cannot fail to recognize As a result how we negotiate the challenges of inequality in the twenty first century may depend less on what people consciously think about difference and more on what we inadvertently assume Through an analysis of commonsense knowledge Pascale expertly provides new insights into familiar topics In addition by analyzing local practices in the context of established cultural discourses Pascale shows how the weight of history bears on the present moment both enabling and constraining possibilities Pascale tests the boundaries of sociological knowledge and offers new avenues for conceptualizing social change In 2008 *Making Sense of Race Class and Gender* was the recipient of the Distinguished Contribution to Scholarship Book Award of the American Sociological Association Section on Race Gender and Class for distinguished and significant contribution to the development of the integrative field of race gender and class

Undoing Privilege Professor Bob Pease, 2013-04-04 For every group that is oppressed another group is privileged In *Undoing Privilege* Bob Pease argues that privilege as the other side of oppression has received insufficient attention in both critical theories and in the practices of social change As a result dominant groups have been allowed to reinforce their dominance *Undoing Privilege* explores the main sites of privilege from Western dominance class elitism and white and patriarchal privilege to the less examined sites of heterosexual and able bodied privilege Pease points out that while the vast majority of people may be oppressed on one level many are also privileged on another He also demonstrates how members of privileged groups can engage critically with their own dominant position and explores the potential and limitations of them becoming allies against oppression and their own unearned privilege This is an essential book for all who are concerned about developing theories and practices for a socially just world

Intersections of Privilege and Otherness in Counselling and Psychotherapy Dwight Turner, 2021-02-02 *Intersections of Privilege and Otherness in Counselling and Psychotherapy* presents an in depth understanding of the role of privilege and of the unconscious experience of privilege and difference within the world of counselling and psychotherapy To address the absence of the exploration of the unconscious experience of privilege within counselling and psychotherapy the book not only presents an exploration of intersectional difference but also discusses the deeper unconscious understanding of difference and how privilege plays a role in the construction of otherness It does so by utilising material from both within the world of psychotherapy and from the fields of post colonial theory feminist discourse and other theoretical areas of relevance The book also offers an exploration and understanding of intersectionality and how this impacts upon our conscious and unconscious exploration of privilege and otherness With theoretically underpinned and inherently practical psychotherapeutic case studies this book will serve as a guidebook for counsellors and psychotherapists

Stories of Inclusion? Deborah A. Piatelli, 2009-01-16 Why are some white middle class activists experiencing difficulty creating alliances across racial and class differences What are the obstacles and what is being done to overcome them What type of movement structures cultures and practices can best facilitate inter racial inter class solidarity *Stories of Inclusion* explores these questions through an ethnographic study of a predominately white middle class contemporary peace and justice network that is working to create a racially and class diverse community of activists Addressing a very significant and greatly under researched topic *Stories of Inclusion* raises important and critical questions for the peace movement as well as larger society In accessible prose this study bridges the literatures of social movement theory critical race studies and feminist theory and offers new insight into how power and privilege can affect the process of creating inclusive communities Drawing on data the author collected through in depth interviews interpretive focus groups and over two years of participant observation this study explores how white middle class privilege influences political analyses definitions of peace work and approaches to alliance building The findings are compelling and reveal that even those who have developed an oppositional political consciousness and have pledged to work across racial and class divides can still foster exclusive organizing practices This study also offers examples on how some activists are acknowledging privilege transforming their worldviews and beginning to establish fruitful relationships across differences This important work emphasizes the continuing importance of race for those collective actors attempting to construct inclusive movements across diverse groups while also offering important practical solutions on how to bridge differences The conclusion offers a framework for building a new agenda for the peace and justice movement
