Unclear Physics Målfrid Braut-Hegghammer, 2016-08 Many authoritarian leaders want nuclear weapons but few manage to acquire them Autocrats seeking nuclear weapons fail in different ways and to varying degrees Iraq almost managed it Libya did not come close In Unclear Physics M lfrid Braut Hegghammer compares the two failed nuclear weapons programs showing that state capacity played a crucial role in the trajectory and outcomes of both projects Braut Hegghammer draws on a rich set of new primary sources collected during years of research in archives fieldwork across the Middle East and interviews with scientists and decision makers from both states She gained access to documents and individuals that no other researcher has been able to consult Her book tells the story of the Iraqi and Libyan programs from their origins in the late 1950s and 1960s until their dismantling This book reveals contemporary perspectives from scientists and regime officials on the opportunities and challenges facing each project Many of the findings challenge the conventional wisdom about clandestine weapons programs in closed authoritarian states and their prospects of success or failure Braut Hegghammer suggests that scholars and analysts ought to pay closer attention to how state capacity affects nuclear weapons programs in other authoritarian regimes both in terms of questioning the actual control these leaders have over their nuclear weapons programs and the capability of their scientists to solve complex technical challenges

Science

for the Nation P. Morris, 2016-01-05 An engaging study of a great national institution Essays explore the changing roles of museums and the perceived public role of a museum of science and technology Illuminates the ways in which we think about the collecting and display of objects and the often difficult relations between the state business and industry and museum funding

Rising Above the Gathering Storm, Revisited Institute of Medicine, National Academy of Engineering, National Academy of Sciences, 2005 "Rising Above the Gathering Storm" Committee, 2010-10-23 In the face of so many daunting near term challenges U S government and industry are letting the crucial strategic issues of U S competitiveness slip below the surface Five years ago the National Academies prepared *Rising Above the Gathering Storm* a book that cautioned Without a renewed effort to bolster the foundations of our competitiveness we can expect to lose our privileged position Since that time we find ourselves in a country where much has changed and a great deal has not changed So where does America stand relative to its position of five years ago when the *Gathering Storm* book was prepared The unanimous view of the authors is that our nation s outlook has worsened The present volume *Rising Above the Gathering Storm Revisited* explores the tipping point America now faces Addressing America s competitiveness challenge will require many years if not decades however the requisite federal funding of much of that effort is about to terminate *Rising Above the Gathering Storm Revisited* provides a snapshot of the work of the government and the private sector in the past five years analyzing how the original recommendations have or have not been acted upon what consequences this may have on future competitiveness and priorities going forward In addition readers will find a series of thought and discussion provoking factoids many of them alarming about the state of science and innovation in America *Rising Above the Gathering Storm Revisited* is a wake up call To reverse the foreboding outlook will require a sustained commitment by both individual citizens and government officials at all levels This book together with the original *Gathering Storm* volume provides the roadmap to meet that goal While this book is essential for policy makers anyone concerned with the future of innovation competitiveness and the standard of living in the United States will find this book an ideal tool for engaging their government representatives peers and community about this momentous issue

Scientific and Technical Aerospace Reports, 1994 **Mathematical Modeling in Physical Sciences** Dimitrios Vlachos, *Recapturing a Future for Space Exploration* National Research Council, Division on Engineering and Physical Sciences, Aeronautics and Space Engineering Board, Space Studies Board, Committee for the Decadal Survey on Biological and Physical Sciences in Space, 2012-01-30 More than four decades have passed since a human first set foot on the Moon Great strides have been made in our understanding of what is required to support an enduring human presence in space as evidenced by progressively more advanced orbiting human outposts culminating in the current International Space Station ISS However of the more than 500 humans who have so far ventured into space most have gone only as far as near Earth orbit and none have traveled beyond the orbit of the Moon Achieving humans further progress into the solar system had proved far more difficult than imagined in the heady days of the Apollo

missions but the potential rewards remain substantial During its more than 50 year history NASA s success in human space exploration has depended on the agency s ability to effectively address a wide range of biomedical engineering physical science and related obstacles an achievement made possible by NASA s strong and productive commitments to life and physical sciences research for human space exploration and by its use of human space exploration infrastructures for scientific discovery The Committee for the Decadal Survey of Biological and Physical Sciences acknowledges the many achievements of NASA which are all the more remarkable given budgetary challenges and changing directions within the agency In the past decade however a consequence of those challenges has been a life and physical sciences research program that was dramatically reduced in both scale and scope with the result that the agency is poorly positioned to take full advantage of the scientific opportunities offered by the now fully equipped and staffed ISS laboratory or to effectively pursue the scientific research needed to support the development of advanced human exploration capabilities Although its review has left it deeply concerned about the current state of NASA s life and physical sciences research the Committee for the Decadal Survey on Biological and Physical Sciences in Space is nevertheless convinced that a focused science and engineering program can achieve successes that will bring the space community the U S public and policymakers to an understanding that we are ready for the next significant phase of human space exploration The goal of this report is to lay out steps and develop a forward looking portfolio of research that will provide the basis for recapturing the excitement and value of human spaceflight thereby enabling the U S space program to deliver on new exploration initiatives that serve the nation excite the public and place the United States again at the forefront of space exploration for the global good

Strategy for Environmental, Health, and Safety Aspects of Engineered Nanomaterials National Research Council, Division on Engineering and Physical Sciences, National Materials and Manufacturing Board, Division on Earth and Life Studies, Board on Chemical Sciences and Technology, Board on Environmental Studies and Toxicology, Committee to Develop a Research Strategy for Environmental, Health, and Safety Aspects of Engineered Nanomaterials, 2012-05-09 The nanotechnology sector which generated about 225 billion in product sales in 2009 is predicted to expand rapidly over the next decade with the development of new technologies that have new capabilities The increasing production and use of engineered nanomaterials ENMs may lead to greater exposures of workers consumers and the environment and the unique scale specific and novel properties of the materials raise questions about their potential effects on human health and the environment Over the last decade government agencies academic institutions industry and others have conducted many assessments of the environmental health and safety EHS aspects of nanotechnology The results of those efforts have helped to direct research on the EHS aspects of ENMs However despite the progress in assessing research needs and despite the research that has been funded and conducted developers regulators and consumers of nanotechnology enabled products remain uncertain about the types and quantities of nanomaterials in commerce or in development their possible applications and their associated risks A Research Strategy for Environmental Health and Safety Aspects of Engineered Nanomaterials presents a strategic approach for developing the science and research infrastructure needed to address uncertainties regarding the potential EHS risks of ENMs The report summarizes the current state of the science and high priority data gaps on the potential EHS risks posed by ENMs and describes the fundamental tools and approaches needed to pursue an EHS risk research strategy The report also presents a proposed research agenda short term and long term research priorities and estimates of needed resources and concludes by focusing on implementation of the research strategy and evaluation of its progress elements that the committee considered integral to its charge

The Routledge Handbook of European Integrations Thomas Hoerber, Gabriel Weber, Ignazio Cabras, 2022-02-27 The Routledge Handbook of European Integrations fills a significant gap in the European studies literature by providing crucial and groundbreaking coverage of several key areas that are usually neglected or excluded in European integration collections Whilst still examining the largest and most influential institutions bodies and highly funded policy areas as acknowledged dominant topics in European studies it crucially does so with much greater balance by devoting equal billing to areas such as culture in European integration or new technologies and their impact on the EU Organised around three main sections culture technology and tangibles the book offers an authoritative encyclopaedia to alternative areas in European integration from media football Erasmus and tourism to transport space AI and energy retains coverage of the dominant topics in European studies such as the Eurozone the Common Internal Market or European law but in balance with other areas of interest and provides an essential companion to existing scholarship in European studies The Routledge Handbook of European Integrations is essential reading and an

authoritative reference for scholars students researchers and practitioners involved in and actively concerned about research in the study of European integration studies The Open Access version of Chapter 14 in this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Unsaturated Soils, Two Volume Set Eduardo E. Alonso, Antonio Gens, 2010-09-02 In recent decades the development of unsaturated soil mechanics has been remarkable resulting in momentous advances in fundamental knowledge testing techniques computational procedures prediction methodologies and geotechnical practice The advances have spanned the full spectrum of theory and practice In addition unsaturated materials exhibiting complex behaviour such as residual soils swelling soils compacted soils collapsing soils tropical soils and solid wastes have been integrated in a common understanding of shared behaviour features It is also noteworthy that unsaturated soil mechanics has proved surprisingly fruitful in expanding to other neighbouring areas such as swelling rocks rockfill mechanics and freezing soils As a consequence geotechnical engineering involving unsaturated soils can be now approached from a more rational and systematic perspective leading towards an improved and more effective practice *Unsaturated Soils* contains the papers presented at the 5th International Conference on Unsaturated Soil Barcelona Spain 6-8 September 2010 They report significant advances in the areas of unsaturated soil behaviour testing techniques constitutive and numerical modelling and applications The areas of application include soil atmosphere interaction foundations slopes embankments pavements geoenviromental problems and emerging topics They are complemented by three keynote lectures and three general reports covering general issues of modelling testing and applications *Unsaturated Soils* is a comprehensive record of the state of the art in unsaturated soil mechanics and a sound basis for further progress in the future The two volumes will serve as an essential reference for academics researchers and practitioners interested in unsaturated soils
