Karan Ghelo Dec 18 2021 In the grip of lust, Raja Karan Vaghela abducts the beautiful Roopsundari, his prime minister Madhav's wife. Fuelled by a desire for revenge, Madhav escapes to Delhi and persuades Sultan Alauddin Khilji to invade Gujarat and destroy Patan fort. This unleashes a dramatic chain of events that forever ends Rajput rule in Gujarat, heralding the dawn of a new age. Rich in psychological insight and imbued with a poetic vision, Karan Ghelo tells the spellbinding tale of a man who tragically failed his land and its people.

Status of Computed Tomography Dosimetry for Wide Cone

Beam Scanners Apr 09 2021 This publication supports an interim solution to the dosimetric problems caused by modern computed tomography (CT) equipment, particular with respect to the wide X ray beam angles increasing seen in clinical practice. It reviews the development of current CT dose formalisms up to the current International Electrotechnical Commission (IEC) methodologies and presents practical measurement guidance in the implementation of new dosimetric methods needed with wide beam CT. Additional items of discussions are current approaches of the American Association of Physicists in Medicine in the USA to CT dosimetry as well as calibration aspects of CT dosimetric instrumentation. A summary describes the present status of CT dosimetry and provides recommendations for future action.

Value of Design Oct 28 2022 In the context of architecture and real estate, the value of design--be it financial or social value--remains largely unmeasured, overlooked, and inadequately researched. By failing to acknowledge the potential of design, we miss opportunities to address the wide-ranging social and

sustainability challenges at play today. This book acts as a platform to bridge the gap between design and finance, using empirical research to dissect design into measurable features through data-driven methodologies, with New York City serving as the experimental research site. Novel analytical tools such as AI, machine learning, and natural language processing, along with new forms of data like anonymized mobile phone data, social media data, and image data, unlock new dimensions for gauging the impact of previously immeasurable design elements of the built environment on human behaviors. These novel measurements, when integrated into real estate valuation models, establish a financial benchmark for design, catalyzing a shift in the industry's perspective on the intrinsic worth of design and ensuring that future projects properly account for the qualitative impact of design on economic value and social benefits. As we uncover and quantify the inherent value of design, it becomes possible to persuade key stakeholders--real estate developers, investors, and policy-makers--about the significant returns of thoughtful, sustainable, and human-centric design strategies. In essence, we aim to explore how the amalgamation of design and finance via empirical research and innovative data-driven methodologies can lead to a more integrated and holistic valuation practice.
