Whether you are upgrading from OBS or simply building the live streaming system of your dreams, this book can help. Survive and thrive in shared online work environments with the Online Meeting Survival Guide by author Paul Richards. This book will bring you up to speed on the latest online communication and collaboration technologies available to increase your personal and professional productivity capabilities. Familiarize yourself with the world's most popular online meeting technologies, and learn how to use the most effective features these solutions have to offer. From unified communications, to collaboration and online meeting solutions, this book is a welcomed tour of the world's best software solutions along with a guide on practical use. Part one of this book, looks at the online communication space from a high level to help you better understand modern communications and online workspaces. In part two, business leaders and managers alike can take a deep dive into the top online communication solutions such as Google Meet, Facebook Rooms, Skype, Microsoft Teams, and Zoom. Part three, is all about productivity and best practices for making the best use of online communications. Finally, you will be presented with a forward thinking perspective of where online communications are headed. When is a webinar better than a meeting? How does live streaming fit into your sales and marketing plan? When is collaboration counterproductive and how can your teams meet more effectively. Richards draws from Joseph Pine's Experience Economy, Jonah Berger's Invisible Influence, Morten Hansen's Collaboration!, and Malcolm Gladwell's Tipping Point to apply research of top authors to meeting productivity in a way that can make deploying online communications for any business more effective. What is the total cost related to deploying Live streaming, including any consulting or professional services? How much are sponsors, customers, partners, stakeholders involved in Live streaming? In other words, what are the risks, if Live streaming does not deliver successfully? How do we ensure that implementations of Live streaming products are done in a way that ensures safety? How does the Live streaming manager ensure against scope creep? What are the key elements of your Live streaming performance improvement system, including your evaluation, organizational learning, and innovation processes? Defining, designing, creating, and implementing a process to solve a challenge or meet an objective is the most valuable role... In EVERY group, company, organization and department. Unless you are talking a one-time, single-use project, there should be a process. Whether that process is managed and implemented by humans, AI, or a combination of the two, it needs to be designed by someone with a complex enough perspective to ask the right questions. Someone capable of asking the right questions and step back and say, 'What are we really trying to accomplish here? And is there a different way to look at it?' This Self-Assessment empowers people to do just that - whether their title is entrepreneur, manager, consultant, (Vice-)President, CxO etc... - they are the people who rule the future. They are the person who asks the right questions to make Live streaming investments work better. This Live streaming All-Inclusive Self-Assessment enables You to be that person. All the tools you need to an in-depth Live streaming Self-Assessment. Featuring 682 new and updated case-based questions, organized into seven core areas of process design, this Self-Assessment will help you identify areas in which Live streaming improvements can be made. In using the questions you will be better able to: - diagnose Live streaming projects, initiatives, organizations, businesses and processes using accepted diagnostic standards and practices - implement evidence-based best practice strategies aligned with overall goals - integrate recent advances in Live streaming and process design strategies into practice according to best practice guidelines Using a Self-Assessment tool known as the Live streaming Scorecard, you will develop a clear picture of which Live streaming areas need attention. Your purchase includes access details to the Live streaming self-assessment dashboard download which gives you your dynamically prioritized projects-ready tool and shows your organization exactly what to do next. You will receive the following contents with New and Updated specific criteria: - The latest quick edition of the book in PDF - The latest complete edition of the book in PDF, which criteria correspond to the criteria in... - The Self-Assessment Excel Dashboard, and... - Example pre-filled Self-Assessment Excel Dashboard to get familiar with results generation ...plus an extra, special, resource that helps you with project managing. INCLUDES LIFETIME SELF ASSESSMENT UPDATES Every self assessment comes with Lifetime Updates and Lifetime Free Updated Books. Lifetime Updates is an industry-first feature which allows you to receive verified self assessment updates, ensuring you always have the most accurate information at your fingertips. This book is full of detailed case studies from innovative event planners who are diversifying their revenue streams with virtual ticket sales. Whether you are a business, sports team, non-profit, event venue or a garage band, this book includes everything you need to know about planning live streams that provide audiences with experiences worth paying for. Adding a virtual ticket option for your next event does more than increase profits. Virtual tickets help expose events to global audiences by increasing convenience and accessibility with new broadcasting and translation tools that are now available. Author Paul Richards is the Chief Streaming Officer for the StreamGeeks, who detail effective strategies for transporting audiences into experiences that will keep them coming back for more. The author outlines from start to finish how conferences can add virtual ticket options to their marketing plans to help event managers budget for the new endeavor. In a fun and easy to understand manner, Richards explains how the multi-billion dollar digital experience economy has been growing year after year. Readers unfamiliar with influencer marketing, live streaming, and online community building will be encouraged to get involved to better understand modern consumer behaviors. A paradigm shift in event marketing will help readers understand how to position virtual tickets as exciting experiences worth sharing with their friends. Richards draws on innovative thinkers from books such as "Experience Economy", "Growth Hacker Marketing", and "Special Events" to craft a journey that is full of insights and actionable takeaways. If you want to sell virtual access to online experiences, this is the book for you. Mastering Twitch: A Comprehensive Guide to Live Streaming This book describes the steps for creating an on-demand and live streaming video in an all-in-one reference guide for new users and companies that need introduced to the technology. After reading this book, you will understand: - How the Internet works in relation to streaming media - Client/server technology, specifically related to streaming media - Strengths and limits of streaming media, including best uses for the technology - Choices of streaming media content creation tools. More gamers than ever are watching others play games rather than playing the games themselves. Gaming Live will provide a complete guide to live streaming and gaming, taking advantage of the huge audiences across all live streaming platforms. More gamers than ever

are watching others play games rather than playing the games themselves. Gaming Live provides a complete guide to live streaming. Features exclusive interviews directly from the biggest YouTube and Twitch stars in the world. Includes insights into their favourite games, what they're looking forward to in the gaming world, their most embarrassing secrets and their very own tips and tricks for becoming a global live streaming star. It's an essential guide for anyone and everyone who wants to get involved with the incredible world of live streaming! Streaming media has irreversibly revolutionised the ways in which media is transmitted and consumed. Most of us engage with streaming media on a daily basis via platforms that deliver our entertainment: Spotify, YouTube and Netflix are new brands which many of us engage with daily for our information and entertainment. It has created upheaval in the entire value chain and wiped out industries slow to adapt to it (like the video store rental chain). And it continues to evolve. Streaming media is transforming business communications in myriad ways, and it is becoming almost as crucial for project managers and marketers to understand streaming technology as it is for media professionals. The Streaming Media Guide demystifies the technology and features behind a successful streaming media service, especially in the context of how it is used by broadcasters and other media organisations. Common terms and systems being used in this space are presented and defined simply and clearly for non-technical readers. Best practice examples from Michael D'Oliveiro's experiences demonstrate how this technology can be successfully implemented. This book equips any media professional with the most basic of traditional media knowledge to enable confident conversations in the typical media organisation they work in. For technology-based graduates or dedicated broadcast professional seeking to refresh their understanding, this book provides enough information to form a solid foundation for day-to-day work. Finally, for leaders in cross-functional senior management matrices, information is provided to enable you to understand and exploit streaming media capabilities as a business. This will be the ultimate reference source, guaranteed to be bedside reading for anyone serious about using streaming media. Finally, a complete guide for your church to start live streaming with an included online course on UDEMY.com. Inside this book, you will find insights for ministry leaders who are considering the use of live streaming as an outreach tool for their church. This book will help church leaders understand how they can leverage the power of live streaming as a visual bridge connecting your church to the world. This book will provide perspective on best practices for live streaming church services and helpful reflections on real-life case studies from churches and pastors who are happily filling their pews with new members each week. Learn how to set up a digital donations strategy and enable your social media accounts to accept donations directly through YouTube and Facebook. This book will include actionable checklists for ministry leaders considering live streaming at their organization. It should become clear to you how your church can use live streaming and social media to reach new members and extend your reach to shut-ins. This book is accompanied by an online training course for technology directors and volunteers alike who may become the next "champions" of your live streaming program. Our online training course also includes a PowerPoint presentation template you can use to present the benefits of live streaming to your church leadership. At the end of this book, you will find a glossary of terms that will help you and your team familiarize yourselves with the type of technological vocabulary frequently used in live streaming. For many pastors, learning this type of information is like learning a new language. If you are interested in learning about church media and live streaming this book will be a walk in the park. Feel free to download the audio version of this book and literally take a walk in the park as you listen. Finally, this book was written to inspire readers to use modern tools to tell their organizations unique story about their faith. At the end of the day, live streaming is a storytelling tool helping organizations reach those who may need guidance, education, or simply a nudge in the right direction. Social media has become a medium for empowering individuals to like and share the things they believe in. We live in a world that is more connected than ever before. Understanding that everyone on earth is connected in some way, within six degrees of separation, will be an important stepping stone in our thinking about social media. Your church now has the power to reach people in large connected networks which include groups of family members and friends. These are the people that are most important and most influential in lives of your church's current members and their extended online network. One of the main reasons why western religion has succeeded so greatly to this day is because it has always taken advantage of emerging technologies... The medium isn't the message; it's the medium that you use to communicate the message. In the 1500s, we saw the printing press emerge, and bibles were being printed for the first time in history. We saw an explosion of what was being made available in written form, with new translations that were suddenly available all over the world... Over the past one hundred years, we have churches moving on to the radio with the early evangelical churches that have now moved into TV and televangelism... and now today we are moving into a new form of communication, where you can distribute your message on digital platforms using social media. The churches that are the most successful and most resonate with people are the ones delivering their message in the places that people are listening. Those who are producing content in a form that is consumable and makes sense in the day and age that we live in, we be to prosper from the fruits of new communication pathways. Even though Twitch is a livestream platform primarily for gamers, indie musicians are building real fanbases and making enough money for this to be a solid side hustle or even a full-time job. Artists on Twitch are supportive of each other. Viewers are looking for fun, new talent to hang out with online. The category is not over-saturated, so you can still get discovered. And the whole thing has monetization features that are fun for the viewers and lucrative for streamers. This book will teach artists how to get past the stiff learning curve involved with producing a stream, how to navigate the unspoken rules of the music community on Twitch, and how to grow an engaged fanbase that will generate an entirely new stream of revenue. First Published in 2005. Routledge is an imprint of Taylor & Francis, an informa company. Hey there! Ever wondered how some brands just *shine*? Don't worry; I've got the perfect guide for you: "The Livestream Blueprint: Starting and Scaling Your Business with Live Video." Imagine this book as your trusty map, guiding you through the exciting world of digital branding. We're talking about creating a brand that not only stands out but also captures hearts and minds. And guess what? You don't need to be a tech genius or a marketing expert to get it right! Think of live streaming as your secret weapon. In a world filled with static content, live video is the heartbeat of authentic connection. And guess what? You don't need a Hollywood studio or a blockbuster budget to make it work. We're diving headfirst into the electrifying world of live video branding. Picture this: you, in real-time, connecting with your audience like never before. We'll unravel the mysteries of crafting live streams that don't just capture attention but also hold it captive. Ever wondered how some live streams feel like a riveting movie, keeping you on the edge of your seat? We're going to decode that magic - from the initial idea to the final broadcast. And no, it's not just about technicalities; it's about creating an experience, a moment that your audience can't resist. But hey, we won't just stop at the 'whys' and 'hows.' We're delving into inspiring real-life stories of individuals and businesses that started with a simple live stream and ended up creating movements. So, buckle up and get ready for a journey where your brand transforms into a live, breathing entity. As you flip through these pages, consider me your trusted guide, here to unlock the thrilling world of live streaming for you. Whether you're a solo entrepreneur, a small business owner, or part of a big corporate world, this book equips you with the tools, tips, and confidence to make your brand super engaging and unforgettable. Happy streaming! This book describes the steps for creating an on-demand and live streaming video in an all-in-one reference guide for new users and companies that need introduced to the technology. After reading this book, you will understand: - How the Internet works in relation to streaming media - Client/server technology, specifically related to streaming media - Strengths and limits of streaming media, including best uses for the technology - Choices of streaming media content creation tools This book contains case studies that show how streaming audio is used on various sites. It begins by giving a comprehensive overview of the most up-to-date streaming technologies available and the process of preparing audio for streaming. Then, it walks readers through encoding for the various players and types of streaming (on-demand vs. live). In response to requests for instructional and training material from instructors, we prepared this laboratory training guide as a companion book to the Cloud Computing: A Hands-On Approach ("Cloud Book"). This book is designed to serve two purposes. First, it provides a tutorial for the laboratory training that can accompany traditional or online instruction using the Cloud Book. Second, it provides access to the complete source code used in the examples provided in the Cloud Book. The authors hope that this laboratory training guide will continue to prove useful to instructors and students using the Cloud Book. Hey, have you ever thought about going live? It's a great way to connect with your audience, share your passion, and even make some money. But where do you start? That's where my "Live Streaming Made Easy," comes in. In this book, I'll walk you through everything you need to know about live streaming, from choosing the right gear to creating engaging content. I'll also share my tips for handling those inevitable oops moments. So whether you're a complete beginner or a seasoned pro, "Live Streaming Made Easy" has something for you. Ready to rock the stream? Let's go! Every enterprise application creates data, whether it's log messages, metrics, user activity, outgoing messages, or something else. And how to move all of this data becomes nearly as important as the data itself. If you're an application architect, developer, or production engineer new to Apache Kafka, this practical guide shows you how to use this open source streaming platform to handle real-time data feeds. Engineers from Confluent and LinkedIn who are responsible for developing Kafka explain how to deploy production Kafka clusters, write reliable event-driven microservices, and build scalable stream-processing applications with this platform. Through detailed examples, you'll learn Kafka's design principles, reliability guarantees, key APIs, and architecture details, including the replication protocol, the controller, and the storage layer. Understand publish-subscribe messaging and how it fits in the big data ecosystem. Explore Kafka producers and consumers for writing and reading messages Understand Kafka patterns and use-case requirements to ensure reliable data delivery Get best practices for building data pipelines and applications with Kafka Manage Kafka in production, and learn to perform monitoring, tuning, and maintenance tasks Learn the most critical metrics among Kafka's operational measurements Explore how Kafka's stream delivery capabilities make it a perfect source for stream processing systems The official book on the Rust programming language, written by the Rust development team at the Mozilla Foundation, fully updated for Rust 2018. The Rust Programming Language is the official book on Rust: an open source systems programming language that helps you write faster, more reliable software. Rust offers control over low-level details (such as memory usage) in combination with high-level ergonomics, eliminating the hassle traditionally associated with low-level languages. The authors of The Rust Programming Language, members of the Rust Core Team, share their knowledge and experience to show you how to take full advantage of Rust's features--from installation to creating robust and scalable programs. You'll begin with basics like creating functions, choosing data types, and binding variables and then move on to more advanced concepts, such as: Ownership and borrowing, lifetimes, and traits Using Rust's memory safety guarantees to build fast, safe programs Testing, error handling, and effective refactoring Generics, smart pointers, multithreading, trait objects, and advanced pattern matching Using Cargo, Rust's built-in package manager, to build, test, and document your code and manage dependencies How best to use Rust's advanced compiler with compiler-led programming techniques You'll find plenty of code examples throughout the book, as well as three chapters dedicated to building complete projects to test your learning: a number guessing game, a Rust implementation of a command line tool, and a multithreaded server. New to this edition: An extended section on Rust macros, an expanded chapter on modules, and appendices on Rust development tools and editions. The Live-Streaming Handbook is an authoritative and accessible guide to the wide ranging creative possibilities offered by live streaming for producing online media content. Peter Stewart presents coverage of a comprehensive range of livestreaming platforms, including Facebook Live, Periscope and YouTube Connect, offering a step by step guide to planning, filming, posting and promoting of live streamed shows, productions and events. The book also provides case studies exploring other successful livestreaming practices, valuable insights into how traditional broadcasters are using

these technologies, and also security, safety and essential legal issues surrounding livestreaming. Welcome to the Internet Society beginners guide to Internet Video Streaming Kit. As a novice or a seasoned professional broadcaster you probably have a number of questions you might want to ask before you make the big decision for your chapter to venture in Internet Video Streaming. This guide will help you in every aspect of broadcasting your event. A set of videos compliment the ePublication It's your worst fear. Trying to live stream video... But you don't know where to start. Yes, it's overwhelming at first, but this short book is going to help. From the co-host of Live Streaming Tech on YouTube, comes a new guide on the best first steps to live streaming video. Most gamers and video influencers make live streaming look way too easy. In practice, it's much harder. After over two decades of learning and applying in computer technology, Walt Roberts shares his keen insights on what you need to do to start live streaming video immediately. Would you rather grind it out and hope for the best? Or, go into live streaming video with confidence? With dozens of platforms and tons of technology, discover exactly what you need including: · When is the right time for you to go live · What gear is the best to invest in & what to avoid · Why you don't have to wait to get paid as a live streamer & gamer · How to save your money when buying microphones, webcams or other peripherals · Where is the best live streaming platform: YouTube, Twitch, Facebook or Periscope · And, so much more! You'll love this short read, because it's going to get you live streaming with confidence right away. Get it now. The Unofficial Guide to NDI is the perfect book for anyone interested in the future of video production. NDI (Network Device Interface) is quickly changing the world of video. With the potential to eliminate the need for custom cabling, interfaces, capture cards, and other additional hardware, NDI provides a versatile solution for sharing, recording, displaying, and broadcasting video over standard ethernet networks. This book helps you take advantage of the latest video technology revolutionizing video. With the latest versions of the NDI-protocol, it is possible to create and operate an entire video production workflow using a LAN and sources connected by Wi-Fi, 4G, and 5G. Enjoy a thoughtfully planned-out introduction to NDI along with deep-dive chapters on the most important technologies and tools available for IP video production. Author Paul Richards has been involved with NDI since its release in 2015 and he shares over 10 years of video production experience in this book. Enjoy an online course that follows each chapter of the book to further explain complex ideas and demonstrate each topic with real-world examples. "Unleash the power of live streaming with 'THE LIVE SOCIAL MEDIA STREAMING BIBLE.' This comprehensive guide is your key to building a successful career in the digital age. From setting up your stream to engaging your audience, monetizing your content to navigating legal and ethical considerations, this book covers it all. With practical tips, expert insights, and real-life case studies, you'll learn how to create compelling content, grow your audience, and turn your passion into a profitable career. Whether you're a seasoned streamer or just starting, 'THE LIVE SOCIAL MEDIA STREAMING BIBLE' is your ultimate resource for success in the world of live streaming. Get your copy today and take your streaming game to the next level!" - [] Setting up your stream - [] Engaging your audience - [] Monetizing your content - [] Navigating legal and ethical considerations - [] Practical tips and expert insights - [] Real-life case studies - [] Creating compelling content - [] Growing your audience - [] Turning your passion into a profitable career - [] Ultimate resource for success in the world of live-streaming One hundred top creators, entrepreneurs and industry professionals to share their insights and predictions on livestreaming and digital media. They talk about what trends, products and platforms they're focused on. Build, Work & Play in Your Own LIVE Streaming Production Studio "I created this guide as a means to help others navigate the open waters of what is by far the fastest flowing, socially active medium available today...Real-Time LIVE Streaming Video! Whether you're tip-toeing the shore, not sure you want to get your feet wet, or one excited to dive in on camera, then you're in luck, because this guidebook is especially for you!" ~Leland Best Begin your Live Stream Video adventure by diving deep into the Who, What, Where, When, and Why of How it's done! Leland Best, CEO of BCBLive!(tm) will be your guide, as he shows you step-by-step how to build your very own in-home broadcasting studio from the ground up! This guidebook covers all. Printed in exquisite, not-too-techie detail with 12 Chapters, over 31,000 words sit upon 105, 8.5"x11" full-color HD pages! This guide is for the first-time video broadcaster or the seasoned podcaster new to streaming video! Packed with links to an untold number of other resources! NOTE: This guide does not cover mobile streaming. Primary focus is on building a live video studio w/Desktop PC and making a first run on Facebook LIVE. Upgrade an Old or Build a New Live Streaming PC Pick Out the Proper Equipment within Your Budget! Learn How to Succeed when Performing LIVE! Overview of the Top 14 Live Streaming Apps and Websites! Discover How to Simulcast/Syndicate Your Live Streams! Know What to Do if Your Live Stream Dries Up Midstream!
