**Controversial Statistical Issues in Clinical Trials** Shein-Chung Chow, 2016-04-19. In clinical trial practice, controversial statistical issues inevitably occur regardless of the compliance with good statistical practice and good clinical practice. But by identifying the causes of the issues and correcting them, the study objectives of clinical trials can be better achieved.

**Controversial Statistical Issues in Clinical Trials** cov **Studies in the History of Modern Pharmacology and Drug Therapy** John Parascandola, 2023-04-21. An acknowledged expert on the history of modern pharmacology and drug therapy, John Parascandola here brings together 19 of his most important papers on these subjects. The book is divided into three topical sections. In the first group of articles devoted to pharmacological theory, Dr. Parascandola sheds new light on our understanding of the history of such key pharmacological concepts as receptor theory, structure-activity relationships, and the role of stereochemistry in physiological action. The second section focuses on the discipline of pharmacology and offers insights into the pivotal role played by John J. Abel in the shaping of the field, the development of pharmacology in schools of pharmacy and in the Federal Government, and the national pharmacological society's membership ban on pharmacologists working in industry. The final section on drug therapy discusses various drugs from antibiotics to sulfones and their use in the treatment of diseases such as leprosy and syphilis.

It also details essential drug information such as benefits, risks, adverse reactions, dosage, interactions with other drugs, and responses. **Resource Focused Therapy** Bradford Keeney, Wendel A. Ray, 2018-03-26. For some time the family therapy field has been moving away from a problem-based approach to work with clients. Ideas such as creating a new family story focusing on strengths and solutions and making contracts with family members have all shifted interest toward a new approach to therapy. The authors have been in the forefront of this thinking for several years and they have been experimenting with their ideas by working together with clients in order to create their own coherent, effective model for therapy. *Resource Focused Therapy* is the result.
