

**GENERAL DESCRIPTION**

On machines fitted with this system all the loader actions are controlled by a single lever **A** which operates an electro - hydraulic, proportional control valve block **B**, mounted on the boom pivot plate.

As an extra option, the loader raise/lower and extend/retract movements (but not tilt) can also be controlled by remote levers **C** on a boom-mounted man platform. Machines with this option are also provided with a hand throttle **D**.

The speed of loader actions is proportional to the degree of lever movement (as well as engine speed). The auxiliary service, when provided, is operated by a rocker switch and does not have proportional control.

Machines with servo controls also have a modified Safe Load Indicator, which automatically prevents the loader being moved into an unstable condition. As a further safety measure, machines with the remote facility are also provided with an emergency stop button on the man platform. This cuts off all electrical power to the system and also de-energises a dump valve **E**. When the dump valve is de-energised, the hydraulic pressure in the valve block is reduced to a level which is insufficient to operate the system. In this condition, the loader can be manually retracted and lowered by means of levers on the valve block (provided the dump valve is manually held closed).

The system electrical relays are located in a terminal box **F** (530B - HL) or **G** (525B - HL).

The valves and terminal block **F** are protected by a cover assembly which incorporates access panels for the control valve hand levers and the dump valve.

**Shelley's Poetry** S. Haines, 1997-02-24 Shelley's detractors since Hazlitt have noticed a division in the self of his poems A central reasoning core fears the passions surrounding it and distrusts the language expressing it A few of his admirers offer an alternative view of the poems as symbolical pointers to a non linguistic reality transcending passion most miss the point justifying their admiration by referring to the poems systems of thought This reading of Shelley's major poems and critical prose finds the adverse case more convincing

**Agricultural Transformation in Ethiopia** Atakilte Beyene, 2018-10-15 For thousands

of years Ethiopia has depended on its smallholding farmers to provide the bulk of its food needs But now such farmers find themselves under threat from environmental degradation climate change and declining productivity As a result smallholder agriculture has increasingly become subsistence oriented with many of these farmers trapped in a cycle of poverty Smallholders have long been marginalised by mainstream development policies and only more recently has their crucial importance been recognised for addressing rural poverty through agricultural reform This collection written by leading Ethiopian scholars explores the scope and impact of Ethiopia s policy reforms over the past two decades on the smallholder sector Focusing on the Lake Tana basin in northwestern Ethiopia an area with untapped potential for growth the contributors argue that any effective policy will need to go beyond agriculture to consider the role of health nutrition and local food customs as well as including increased safeguards for smallholder s land rights They in turn show that smallholders represent a vitally overlooked component of development strategy not only in Ethiopia but across the global South
