China's Influence and American Interests Larry Diamond, Orville Schell, 2019-08-01 While Americans are generally aware of China's ambitions as a global economic and military superpower few understand just how deeply and assertively that country has already sought to influence American society As the authors of this volume write it is time for a wake up call In documenting the extent of Beijing's expanding influence operations inside the United States they aim to raise awareness of China's efforts to penetrate and sway a range of American institutions state and local governments academic institutions think tanks media and businesses And they highlight other aspects of the propagandistic discourse war waged by the Chinese government and Communist Party leaders that are less expected and more alarming such as their view of Chinese Americans as members of a worldwide Chinese diaspora that owes undefined allegiance to the so called Motherland Featuring ideas and policy proposals from leading China specialists **China's Influence and American Interests** argues that a successful future relationship requires a rebalancing toward greater transparency reciprocity and fairness Throughout the authors also strongly state the importance of avoiding casting aspersions on Chinese and on Chinese Americans who constitute a vital portion of American society But if the United States is to fare well in this increasingly adversarial relationship with China Americans must have a far better sense of that country's ambitions and methods than they do now **Toward Sustainable Agricultural Systems in the 21st Century** National Research Council, Division on Earth and Life Studies, Board on Agriculture and Natural Resources, Committee on Twenty-First Century Systems Agriculture, 2010-07-25 In the last 20 years there has been a remarkable emergence of innovations and technological advances that are generating promising changes and opportunities for sustainable agriculture yet at the same time the agricultural sector worldwide faces numerous daunting challenges Not only is the agricultural sector expected to produce adequate food fiber and feed and contribute to biofuels to meet the needs of a rising global population it is expected to do so under increasingly scarce natural resources and climate change Growing awareness of the unintended impacts associated with some agricultural production practices has led to heightened societal expectations for improved environmental community labor and animal welfare standards in agriculture **Toward Sustainable Agricultural Systems in the 21st Century** assesses the scientific evidence for the strengths and weaknesses of different production marketing and policy approaches for improving and reducing the costs and unintended consequences of agricultural production It discusses the principles underlying farming systems and practices that could improve the sustainability It also explores how those lessons learned could be applied to agriculture in different regional and international settings with an emphasis on sub-Saharan Africa By focusing on a systems approach to improving the sustainability of U.S. agriculture this book can have a profound impact on the development and implementation of sustainable farming systems **Toward Sustainable Agricultural Systems in the 21st Century** serves as a valuable resource for policy

Political Development in Hong Kong Ngok Ma,2007-01-01 This book reviews the political development of Hong Kong before and after 1997 in particular the evolution of state society relations in the last two decades to analyze the slow development of democracy and governance in Hong Kong after 1997 This book is a most comprehensive analysis of the multi faceted changes in Hong Kong in the last 20 years The scope of changes analyzed included state functions and institutions political changes such as party development and development of the Legislative Council and social changes such as social movements civil liberties etc It helps the reader understand the crisis of governance of Hong Kong after 1997 and the difficulty of democratic development in Hong Kong over the years The book covers changing state institutions in Hong Kong in the last few decades party development in Hong Kong the changing role and function of the legislature in Hong Kong the evolution of social movement and movement organizational forms media freedom civil liberties and the role of civil society and theoretical discussions concerning governance problems and state society relations in Hong Kong Special emphasis is placed on how these changes brought about a new state society relation which in turn brought governance difficulties after 1997

Redesigning Rice Photosynthesis to Increase Yield J. E. Sheehy,Bill Hardy,Peter L. Mitchell,2000

Nitrate Contamination Istvan Bogardi,Robert D. Kuzelka,Wilma G. Ennenga,2013-06-29 The nitrate content of drinking water is rising at an alarming rate in several regions of NATO countries and elsewhere in the world The

increase is due to lack of proper sewage treatment and primarily to excess fertilizer application Also eutrophication in several coastal areas is triggered by high nitrate concentrations The main purpose of this book is to integrate scientific knowledge related to exposure assessment health consequences and control of nitrate contamination in water The motivation is related to the magnitude the possible adverse health effects and the high cost of controlling nitrate contamination Future research tasks are defined by an interaction among hydrologists toxicologists and environmental engineers in an integrated framework for nitrate risk management The target readership of this book is a mix of university colleagues practitioners from both the private and public sectors and advanced graduate students working with the hydrological health science or environmental engineering aspects of nitrate contamination The main conclusions include 1 For risk assessment purposes knowledge and sufficiently accurate models are available to predict nitrate load and its fate in water under changes in land use 2 Once agricultural exposure controls are implemented the response times in ground water may be so long as to make controls unrealistic 3 It is still unknown whether agricultural best management practice is a compromise between nitrate risk reduction and agricultural revenue 4 The current drinking water guidelines of 10 mg L NO₃-N need not be changed
