

Chapter 1 Section 1 Notes:

How do geographers describe where things are?

- o **Geography**- study of where things are found on Earth's surface and the reasons for the locations
- o Where are people and activities found on Earth?
- o Why are they found there?

Maps:

- o **Map**- a two-dimensional or flat-scale model of Earth's surface, or a portion of it
- o Scale model of the real world that is made small enough to work with on a desk or computer
- o **Cartography**- the science or practice of drawing maps
- o **Reference Tool**- maps help us to find the shortest route between two places and to avoid getting lost along the way
- o **Communications Tool**- maps are often the best means for depicting the distribution of human activities or physical features

Early Map Making:

- o Early maps were navigation tools designed to show a traveler how to get to places
- o Eratosthenes was a Greek geographer who is known to produce the first map
- o Ptolemy produced maps based on details he heard from merchants and soldiers
- o Map making generally began in Europe and slowly spread to other continents
- o Early maps depicted Earth as a flat piece of land surrounded by monsters
- o Map making was accentuated in the fifteenth and sixteenth centuries during the Age of Exploration (by the end of the seventeenth century much of the world was outlined)

Contemporary Mapping:

- o Maps are geographers' most essential tool for displaying geographic information and for offering geographic explanation

Map Scale:

- o The first decision is how much of Earth's surface do we want to depict on a map
- o To make a scale model of the world, many details must be omitted because there is not enough space (smaller scale maps can provide more details)
- o **Map Scale**- the relationship (or ratio) between distance on a map and the corresponding distance on the ground
- o **Ratio or Fraction**- numerical ration between distances on the map and Earth's surface (units of measure on the map and the ground must be the same)
- o **Written Scale**- relationship between map and Earth distances in words (1 inch equals 1 mile)
