Integrative Bioinformatics Jan  
23 2022 This book provides an  
overview of the history of  
integrative bioinformatics and  
the actual situation and the  
relevant tools. Subjects cover  
the essential topics, basic  
introductions, and latest  
developments; biological data  
integration and manipulation;  
modeling and simulation of  
networks; as well as a number  
of applications of integrative  
bioinformatics. It aims to  
provide basic introduction of  
biological information systems  
and guidance for the  
computational analysis of  
systems biology. This book  
covers a range of issues and  
methods that unveil a  
multitude of omics data

integration and relevance that  
integrative bioinformatics has  
today. It contains a unique  
compilation of invited and  
selected articles from the  
Journal of Integrative  
Bioinformatics (JIB) and annual  
meetings of the International  
Symposium on Integrative  
Bioinformatics.

Kenya Aug 30 2022 Since  
independence from Great  
Britain in 1963, Kenya has  
survived five decades as a  
functioning nation-state,  
holding regular elections; its  
borders and political system  
intact and avoiding open war  
with its neighbours and  
military rule internally. It has  
been a favoured site for  
Western aid, trade, investment  
and tourism and has remained  
a close security partner for  
Western governments.  
However, Kenya's successive  
governments have failed to  
achieve adequate living  
conditions for most of its  
citizens; violence, corruption  
and tribalism have been ever-  
present, and its politics have  
failed to transcend its history.  
The decisions of the early years

of independence and the acts of its leaders in the decades since have changed the country's path in unpredictable ways, but key themes of conflicts remain: over land, money, power, economic policy, national autonomy and the distribution of resources between classes and communities. While the country's political institutions have remained stable, the nation has changed, its population increasing nearly five-fold in five decades. But the economic and political elite's struggle for state resources and the exploitation of ethnicity for political purposes still threaten the country's existence. Today, Kenyans are arguing over many of the issues that divided them 50 years ago. The new constitution promulgated in 2010 provides an opportunity for national renewal, but it must confront a heavy legacy of history. This book reveals that history.

*Advances in Plant Breeding Strategies: Vegetable Crops*  
Aug 18 2021 Plant breeders

and geneticists are under constant pressure to sustain and expand food production by using innovative breeding strategies and introducing minor crops, which are well adapted to marginal lands, provide a source of nutrition, and have abiotic and biotic stress tolerance, to feed an ever-increasing human population. The basic concept of this book is to examine the use of innovative methods, augmenting traditional plant breeding, towards the improvement and development of new crop varieties, under the increasingly limiting environmental and cultivation factors, to achieve sustainable agricultural production and enhanced food security. Three volumes of the book series *Advances in Plant Breeding Strategies* were published in 2015, 2016 and 2018, respectively: Volume 1. *Breeding, Biotechnology and Molecular Tools*; Volume 2. *Agronomic, Abiotic and Biotic Stress Traits* and Volume 3. *Fruits*. In 2019, the following four volumes were published:

Volume 4. Nut and Beverage Crops, Volume 5. Cereals, Volume 6. Industrial and Food Crops and Volume 7. Legumes. In 2021, three volumes are being concurrently published: Volume 8. Vegetable Crops: Bulbs, Roots and Tubers, Volume 9. Vegetable Crops: Fruits and Young Shoots and Volume 10. Vegetable Crops: Leaves, Flowerheads, Green Pods, Mushrooms and Truffles. This Volume 10, subtitled Vegetable Crops: Leaves, Flowerheads, Green Pods, Mushrooms and Truffles, consists of 14 chapters focusing on advances in breeding strategies using both traditional and modern approaches for the improvement of individual vegetable crops. Chapters are arranged in 4 parts according to the edible vegetable parts. Part I: Leaves - Chicory (*Cichorium intybus* L.), Chinese cabbage (*Brassica rapa* L. var. *pekinensis*), Rocket salad (*Eruca vesicaria* ssp. *sativa* Mill.), Spring onion (*Allium fistulosum* L.), Water spinach (*Ipomoea aquatica* Forsk.) and

Watercress (*Nasturtium officinale* R. Br.); Part II: Flowerheads and Green Pods - Cauliflower (*Brassica oleracea* var. *botrytis* L.), Globe artichoke (*Cynara cardunculus* var. *scolymus* L.), Garden pea (*Pisum sativum* L.) and Yardlong bean (*Vigna unguiculata* (L.) Walp. ssp. *sesquipedalis* (L.) Verdc.); Part III: Mushrooms - Enoki mushroom (*Flammulina velutipes* (Curtis) Singer) and Shiitake mushroom (*Lentinula edodes* (Berk.) Sing.); Part IV: Truffles - Desert truffles (*Terfezia* spp.) and White truffle (*Tuber magnatum* Picco and *T. borchii* Vittad.). Each chapter comprehensively reviews the contemporary literature on the subject and reflects the experiences of the authors. Chapters are written by internationally-reputable scientists and subjected to a review process to assure quality presentation and scientific accuracy. Each chapter begins with an introduction covering related backgrounds and provides in-depth discussion of the subject

supported with high-quality color photos, illustrations and relevant data. The chapter concludes with recommendations for future research directions, a comprehensive list of pertinent references to facilitate further reading, and appendixes of genetic resources and concerned research institutes. This book series is a valuable resource for advanced students, researchers, scientists, commercial producers and seed companies as well as consultants and policymakers interested in agriculture, particularly in modern breeding technologies.

Use of Barley and Wheat Reference Sequences: Downstream Applications in Breeding, Gene Isolation, GWAS and Evolution Nov 20 2021 This eBook is a collection of articles from a Frontiers Research Topic. Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series: they are collections of at least ten articles, all centered on a particular subject. With their

unique mix of varied contributions from Original Research to Review Articles, Frontiers Research Topics unify the most influential researchers, the latest key findings and historical advances in a hot research area! Find out more on how to host your own Frontiers Research Topic or contribute to one as an author by contacting the Frontiers Editorial Office: [frontiersin.org/about/contact](https://frontiersin.org/about/contact).

Advances in Applied Bioinformatics in Crops Nov 01 2022

**Statement of Disbursements of the House** May 19 2024

Christianity and Genocide in Rwanda Apr 18 2024 This book studies the role of Christian churches in the 1994 Rwandan genocide. Timothy Longman's research shows that Rwandan churches have consistently allied themselves with the state and engaged in ethnic politics, making them a center of struggle over power and resources. He argues that the genocide in Rwanda was a conservative response to progressive forces that were

attempting to democratize Christian churches.

*Horn, Sahel, and Rift* Oct 12 2023 The 1998 attacks against US embassies in Nairobi and Dar es Salaam attest to al-Qaeda's durable presence in Africa, yet Islamist-inspired radical organisations in the continent have gained much attention of late, the result of their campaigns of insurgent and terrorist violence directed against the state in Algeria, Somalia, Nigeria, Mali, Burkina Faso, Niger, Tanzania, Ethiopia, Uganda, Djibouti and Kenya. These groups include Al-Qaeda in the Islamic Maghreb, Harakat Al Shabaab, Boko Haram, the Movement for Oneness and Jihad in West Africa, and Ansar Dine. This book explains why the Idea of Jihad is alive and well in sub-Saharan Africa, even after more than thirty years of Western and global efforts to curtail it, and how most important organisations are formed by the interaction between the often underestimated local and global dynamics. Stig Jarle Hansen

has been researching African radical violent Islamism for more than fifteen years and is well placed to explain how and why such groups emerged, whether they manifest any specific traits compared with other violent Islamists, and what is likely to be their impact beyond the African continent. He also discusses the response of African and Western governments to this phenomenon cks against US embassies in Nairobi and Dar-es-Salaam attest to al-Qaeda's durable presence in Africa, yet Islamist-inspired radical organizations in the continent have gained much attention of late, the result of their campaigns of insurgent and terrorist violence directed against the state in Algeria, Somalia, Nigeria, Mali and Kenya. These groups include Al-Qaeda in the Islamic Maghreb, Harakat Al Shabaab, Boko Haram, the Movement for Oneness and Jihad in West Africa and Ansar Dine. Evidence has emerged to suggest that beyond shared political objectives they are

also collaborating in terms of finance, propaganda, arms transfers and training, while Western governments believe some of them maintain links with Al-Qaeda "central." Stig Jarle Hansen has been researching African radical violent Islamism for more than ten years and is well placed to explain how and why such groups emerged, whether they manifest any specific traits compared with other violent Islamists, and what is likely to be their impact beyond the African continent. He also discusses the response of African and Western governments to this phenomenon.

**Localising Power in Post-Authoritarian Indonesia** Jun 27 2022 This book is about how the design of institutional change results in unintended consequences. Many post-authoritarian societies have adopted decentralization—effectively localizing power—as part and parcel of democratization, but also in their efforts to entrench "good governance." Vedi Hadiz

shifts the attention to the accompanying tensions and contradictions that define the terms under which the localization of power actually takes place. In the process, he develops a compelling analysis that ties social and institutional change to the outcomes of social conflict in local arenas of power. Using the case of Indonesia, and comparing it with Thailand and the Philippines, Hadiz seeks to understand the seeming puzzle of how local predatory systems of power remain resilient in the face of international and domestic pressures. Forcefully persuasive and characteristically passionate, Hadiz challenges readers while arguing convincingly that local power and politics still matter greatly in our globalized world.

**Working-Class Environmentalism** Sep 30 2022 This book presents a timely perspective that puts working-class people at the forefront of achieving sustainability. Bell argues that environmentalism is a class issue, and confronts some

current practice, policy and research that is preventing the attainment of sustainability and a healthy environment for all. She combines two of the biggest challenges facing humanity: that millions of people around the world still do not have their social and environmental needs met (including healthy food, clean water, affordable energy, clean air); and that the earth's resources have been over-used or misused. Bell explores various solutions to these social and ecological crises and lays out an agenda for simultaneously achieving greater well-being, equality and sustainability. The result will be an invaluable resource for practitioners and policy-makers working to achieve environmental and social justice, as well as to students and scholars across social policy, sociology, human geography, and environmental studies.

### **Religious Authority and the State in Africa** Jan 03 2023

Two important dynamics have driven political and social

change in sub-Saharan Africa during the past 25 years. New religious trends have emerged within the main faiths of Islam and Christianity, in particular the emergence of more charismatic, assertive forms of religious expression.

Meanwhile, political space has opened in scores of countries as one-party rule has given way to a process of democratization, yet to be completed. Based on their field work in each country, the authors examine the various ways in which religious actors have chosen to engage with the state. They also consider how governments and political actors respond to, and seek to manage, these interactions.

### Biotechnological Approaches to Barley Improvement Feb 21

2022 This volume offers an up-to-date overview of biotechnologically oriented barley research. It is structured into two major sections: the first focusing on current agricultural challenges and approaches to barley improvement, and the second providing insights into recent

advances in methodology. Leading scientists highlight topics such as: the global importance of barley; genetic diversity and genebanks; domestication; shoot and inflorescence architecture; reproductive development; mineral nutrition; photosynthesis and leaf senescence; grain development; drought tolerance; viral and fungal pathogens; phytophagous arthropods; molecular farming; sequence resources; induced genetic variation and TILLING; meiotic recombination; *Hordeum bulbosum*; genome-wide association scans; genomic selection; haploid technology; genetic engineering; and whole plant phenomics. Providing comprehensive information on topics ranging from fundamental aspects to specific applications, this book offers a useful resource for scientists, plant breeders, teachers and advanced students in the fields of molecular and plant cell biology, plant biotechnology, and agronomy.

Islam and Politics in Kenya Jun 08 2023 8 Muslims and the Law

**Palestinian and Israeli Public Opinion** May 27 2022  
Palestinian and Israeli Public Opinion is based on a unique project: the Joint Israeli-Palestinian Poll (JIPP). Since 2000, Jacob Shamir and Khalil Shikaki have directed joint surveys among Israelis and Palestinians, providing a rare opportunity to examine public opinion on two sides of an intractable conflict. Adopting a two-level game theory approach, Shamir and Shikaki argue that public opinion is a multifaceted phenomenon and a critical player in international politics. They examine how the Israeli and Palestinian publics' assessments, expectations, mutual perceptions and misperceptions, and overt political action fed into domestic policy formation and international negotiations -- from the failure of the 2000 Camp David summit through the second Intifada and the elections of 2006. A discussion of the study's implications for

policymaking and strategic framing of future peace agreements concludes this timely and informative book.

Genomics of Plant Genetic Resources May 15 2021 Our lives and well being intimately depend on the exploitation of the plant genetic resources available to our breeding programs. Therefore, more extensive exploration and effective exploitation of plant genetic resources are essential prerequisites for the release of improved cultivars. Accordingly, the remarkable progress in genomics approaches and more recently in sequencing and bioinformatics offers unprecedented opportunities for mining germplasm collections, mapping and cloning loci of interest, identifying novel alleles and deploying them for breeding purposes. This book collects 48 highly interdisciplinary articles describing how genomics improves our capacity to characterize and harness natural and artificially induced variation in order to boost crop

productivity and provide consumers with high-quality food. This book will be an invaluable reference for all those interested in managing, mining and harnessing the genetic richness of plant genetic resources.

*The Impact of Special Autonomy on Papua's Forestry Sector* Jun 15 2021 The report focuses on the impacts of Special Autonomy in Papua on the forestry sector. It studies the advantages and problems associated with the current forestry management system. The most significant change following special autonomy for Papua was the introduction of small-scale concession permits granted to community cooperatives, locally known as Kopermas. As a result, CIFOR and the State University of Papua's research focused on these Kopermas, analyzing data on timber production and revenues from concessions, and determining the flow of benefits to customary communities' incomes and to regional revenues. The objective was to determine how

effectively the Kopermas system has empowered local communities. Using a combination of conventional and participatory/action research methods, the research team evaluated the livelihoods and environmental value of forest resources for local people. We also facilitated stakeholder input into our research findings and analysis. The team also worked with local communities to determine their current capacity for forest management; which mechanisms were used to distribute the benefits from the new system; and how people were involved in decision-making about permit applications and concession management. This research found some direct involvement of local people in forest management and short-term benefits for local communities. However, we also found that the benefits from timber revenues have not been fairly shared among local people and other actors involved in the timber business. As a result, community forestry

cooperatives have yet to contribute to equitable and sustainable development for local people. To improve this situation, local stakeholders identified an urgent need to empower customary organizations and individuals by equipping them to manage their own natural resources independently. This will reduce the likelihood that communities are exploited by more powerful stakeholders in the future.

Alongside low capacity, facilities and skills for commercial forest management

### *Sustaining Global Food*

*Security* Jul 29 2022 Population growth alone dictates that global food supplies must increase by over 50% in coming decades. Advances in technology offer an array of opportunities to meet this demand, but history shows that these can be fully realised only within an enabling policy environment. *Sustaining Global Food Security* makes a compelling case that recent technological breakthroughs can move the planet towards a secure and sustainable food supply only if new policies are designed that allow their full expression. Bob Zeigler has brought together a distinguished set of scientists and policy analysts to produce well-referenced chapters

exploring international policies on genetic resources, molecular genetics, genetic engineering, crop breeding and protection, remote sensing, the changing landscape of agricultural policies in the world's largest countries, and trade. Those entering the agricultural sciences and those who aspire to influence public policy during their careers will benefit from the insights of this unique set of experiences and perspectives.

### *Plant Breeding Reviews,*

*Volume 37* Feb 09 2021 *Plant Breeding Reviews* presents state-of-the-art reviews on plant genetics and the breeding of all types of crops by both traditional means and molecular methods. Many of the crops widely grown today stem from a very narrow genetic base; understanding and preserving crop genetic resources is vital to the security of food systems worldwide. The emphasis of the series is on methodology, a fundamental understanding of crop genetics, and applications to major crops. It is a serial

title that appears in the form of one or two volumes per year.

**Fox Populism** Sep 11 2023

Fox Populism offers fresh insights into why the Fox News Channel has been both commercially successful and politically effective. Where existing explanations of Fox's appeal have stressed the network's conservative editorial slant, Reece Peck sheds light on the importance of style as a generative mode of ideology. The book traces the historical development of Fox's counter-elite news brand and reveals how its iconoclastic news style was crafted by fusing two class-based traditions of American public culture: one native to the politics in populism and one native to the news field in tabloid journalism. Using the network's coverage of the late-2000s economic crisis as the book's principal case study, Peck then shows how style is deployed as a political tool to frame news events. A close analysis of top-rated programs reveals how Fox hails its audience as 'the real

Americans' and successfully represents narrow, conservative political demands as popular and universal. *Inequality in the Promised Land* Aug 10 2023 Nestled in neighborhoods of varying degrees of affluence, suburban public schools are typically better resourced than their inner-city peers and known for their extracurricular offerings and college preparatory programs. Despite the glowing opportunities that many families associate with suburban schooling, accessing a district's resources is not always straightforward, particularly for black and poorer families. Moving beyond class- and race-based explanations, *Inequality in the Promised Land* focuses on the everyday interactions between parents, students, teachers, and school administrators in order to understand why resources seldom trickle down to a district's racial and economic minorities. Rolling Acres Public Schools (RAPS) is one of the many well-appointed suburban school districts

across the United States that has become increasingly racially and economically diverse over the last forty years. Expanding on Charles Tilly's model of relational analysis and drawing on 100 in-depth interviews as well as participant observation and archival research, R.

L'Heureux Lewis-McCoy examines the pathways of resources in RAPS. He discovers that—due to structural factors, social and class positions, and past experiences—resources are not valued equally among families and, even when deemed valuable, financial factors and issues of opportunity hoarding often prevent certain RAPS families from accessing that resource. In addition to its fresh and incisive insights into educational inequality, this groundbreaking book also presents valuable policy-orientated solutions for administrators, teachers, activists, and politicians.

[The Politics of the Indonesian Rainforest](#) Dec 14 2023

**Major Issues in Islam** Feb 16

2024 This book explores matters that have negatively affected the public image and led to distorted depictions of Islam from the late nineteenth century to the present. The areas of uneasiness and debate among Muslims and non-Muslims alike include Islamic values and identity in the post-caliphate era, after colonialism, and now under Western hegemony. There is anxiety about the place of Shari'a in the light of Western law and the state, secularism, democracy, human rights, the equality of women, and the place of Islamic education in transmitting Islamic values as secular education dominates societies. There are apprehensions over the relation between religion and politics as in the rise of Muslim Brotherhoods, Wahhabism, Islamism, al-Qaeda, and Islamic State. In non-Muslim countries concerns are about the status of Muslim marriage, polygamy, divorce, and interest (in business). Every topic is examined through the Noble Qur'an and the Hadith,

classical writings, and linguistic analysis.

**Symbolic Confrontations** Jul 09 2023 Donal Cruise O'Brien is a leading authority on Islam in Africa. This is a collection of his writing over the last 30 years, some significantly rewritten to render this a coherent book to use for teaching about the interplay between politics and Islam in Africa. The author's main argument is that much of politics in Africa is negotiated through use of symbols, and can not be separated from the religious origins and the systems of belief from which they originate. The book focuses on Senegal, a fascinating example of the spread of Muslim brotherhoods and their overarching influence on the construction and decision-making processes of the state.

The House in the Garden Dec 22 2021 "Aspiring thinkers require a stage for their performance and an audience to help give their actions distinction and meaning. To be made durable and influential,

their charismatic stories have to be framed by supporting ideals, practices, and institutions. Although the biographies of the Empire's most famous thinkers have a comfortable platform in modern Russia's printed record, scholars have yet to explore fully the intimate context surrounding their activities in the early nineteenth century. There is, as a result, a certain homeless quality to our understandings of Imperial Russian culture, which this history of one extremely productive home will help us correct."—from *The House in the Garden* *The House in the Garden* explores the role played by domesticity in the making of Imperial Russian intellectual traditions. It tells the story of the Bakunins, a distinguished noble family who in 1779 chose to abandon their home in St. Petersburg for a rustic manor house in central Russia's Tver Province. At the time, the Russian government was encouraging its elite subjects to see their private lives as a

forum for the representation of imperial virtues and norms. Drawing on the family's vast archive, Randolph describes the Bakunins' attempts to live up to this ideal and to convert their new home, Priamukhino, into an example of modern civilization. In particular, Randolph shows how the Bakunin home fostered the development of a group of charismatic young students from Moscow University, who in the 1830s sought to use their experiences at Priamukhino to reimagine themselves as agents of Russia's enlightenment. Some of the story Randolph tells is familiar to historians. The anarchist Mikhail Bakunin, whose early philosophical evolution Randolph describes, was born at Priamukhino, while the radical critic Vissarion Belinsky claimed to have been transformed by his experiences there. When Tom Stoppard sought to portray the spiritual history of the Russian intelligentsia in his trilogy, *The Coast of Utopia*, he chose Priamukhino as the scene for

act 1. Yet Randolph's research allows us to watch this drama from a radically different perspective. It shows how the culture of Russian Idealism—so long presumed to be a product of alienation—actually relied on the support provided by the cult of distinction that the Russian government had built around noble homes. It also allows us to see the other actors and agents of private life—and most notably, the Bakunin women—as participants in the creation of modern Russian social thought. The result is a work that revises our understanding of Russian intellectual history while also contributing to the histories of women, gender, private life, and memory in nineteenth-century Russia.

[Agricultural Proteomics](#)  
[Volume 2](#) Jul 17 2021 This book will cover several topics to elaborate how proteomics may contribute in our understanding of mechanisms involved in stress adaptation. The knowledge being accumulated by a wide range of proteomics technologies may

eventually be utilized in breeding programs to enhance stress tolerance. This book presents comprehensive reviews about responses of crop and farm animals to environmental stresses. Challenges related to stress phenotyping and integration of proteomics and other omics data have also been addressed. The Barley Genome Nov 13 2023 This book presents an overview of the state-of-the-art in barley genome analysis, covering all aspects of sequencing the genome and translating this important information into new knowledge in basic and applied crop plant biology and new tools for research and crop improvement. Unlimited access to a high-quality reference sequence is removing one of the major constraints in basic and applied research. This book summarizes the advanced knowledge of the composition of the barley genome, its genes and the much larger non-coding part of the genome, and how this information facilitates studying the specific

characteristics of barley. One of the oldest domesticated crops, barley is the small grain cereal species that is best adapted to the highest altitudes and latitudes, and it exhibits the greatest tolerance to most abiotic stresses. With comprehensive access to the genome sequence, barley's importance as a genetic model in comparative studies on crop species like wheat, rye, oats and even rice is likely to increase.

Antigone; Oedipus the King; Electra Mar 25 2022 Love and loyalty, hatred and revenge, fear, deprivation, and political ambition: these are the motives which thrust the characters portrayed in these three Sophoclean masterpieces on to their collision course with catastrophe. Recognized in his own day as perhaps the greatest of the Greek tragedians, Sophocles' reputation has remained undimmed for two and a half thousand years. His greatest innovation in the tragic medium was his development of a central tragic figure, faced

with a test of will and character, risking obloquy and death rather than compromise his or her principles: it is striking that Antigone and Electra both have a woman as their intransigent 'hero'. Antigone dies rather neglect her duty to her family, Oedipus' determination to save his city results in the horrific discovery that he has committed both incest and parricide, and Electra's unremitting anger at her mother and her lover keeps her in servitude and despair. These vivid translations combine elegance and modernity, and are remarkable for their lucidity and accuracy. Their sonorous diction, economy, and sensitivity to the varied metres and modes of the original musical delivery make them equally suitable for reading or theatrical performance. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe. Each affordable volume reflects Oxford's commitment to scholarship,

providing the most accurate text plus a wealth of other valuable features, including expert introductions by leading authorities, helpful notes to clarify the text, up-to-date bibliographies for further study, and much more.

**Historical Perspectives on Climate Change** Mar 05 2023

This intriguing volume provides a thorough examination of the historical roots of global climate change as a field of inquiry, from the Enlightenment to the late twentieth century. Based on primary and archival sources, the book is filled with interesting perspectives on what people have understood, experienced, and feared about the climate and its changes in the past. Chapters explore climate and culture in Enlightenment thought; climate debates in early America; the development of international networks of observation; the scientific transformation of climate discourse; and early contributions to understanding terrestrial temperature

changes, infrared radiation, and the carbon dioxide theory of climate. But perhaps most important, this book shows what a study of the past has to offer the interdisciplinary investigation of current environmental problems.

*The Separatist Conflict in Sri Lanka* Apr 25 2022 The book provides a detailed historically-based analysis of the origin, evolution and potential resolution of the civil conflict in Sri Lanka over the struggle to establish a separate state in its Northern and Eastern provinces. This conflict between the Sri Lankan government and the secessionist LTTE (Liberation Tigers of Tamil Eelam) is one of the world's most intractable contemporary armed struggles. The internationally banned LTTE is considered the prototype of modern terrorism. It is known to have introduced suicide bombing to the world, and recently became the first terrorist organization ever to acquire an air force. The 'iron law of ethnicity' - the assumption that cultural

difference inevitably leads to conflict - has been reinforced by the 9/11 attacks and conflicts like the one in Sri Lanka. However, the connections among ethnic difference, conflict, and terrorism are not automatic. This book broadens the discourse on the separatist conflict in Sri Lanka by moving beyond the familiar bipolar Sinhala versus Tamil ethnic antagonism to show how the form and content of ethnicity are shaped by historical social forces. It develops a multipolar analysis which takes into account diverse ethnic groups, intra-ethnic, social class, caste and other variables at the local, regional and international levels. Overall, this book presents a conceptual framework useful for comparative global conflict analysis and resolution, shedding light on a host of complex issues such as terrorism, civil society, diasporas, international intervention and secessionism.

**Yugoslav Economic Development and Political**

**Change** Feb 04 2023

*Statement of Disbursements of the House as Compiled by the Chief Administrative Officer from ...* Jun 20 2024 Covers receipts and expenditures of appropriations and other funds.

**Power Lines** Jan 15 2024 How high energy consumption transformed postwar Phoenix and deepened inequalities in the American Southwest In 1940, Phoenix was a small, agricultural city of sixty-five thousand, and the Navajo Reservation was an open landscape of scattered shepherders. Forty years later, Phoenix had blossomed into a metropolis of 1.5 million people and the territory of the Navajo Nation was home to two of the largest strip mines in the world. Five coal-burning power plants surrounded the reservation, generating electricity for export to Phoenix, Los Angeles, and other cities. Exploring the postwar developments of these two very different landscapes, *Power Lines* tells the story of the far-reaching environmental and social inequalities of

metropolitan growth, and the roots of the contemporary coal-fueled climate change crisis. Andrew Needham explains how inexpensive electricity became a requirement for modern life in Phoenix—driving assembly lines and cooling the oppressive heat. Navajo officials initially hoped energy development would improve their lands too, but as ash piles marked their landscape, air pollution filled the skies, and almost half of Navajo households remained without electricity, many Navajos came to view power lines as a sign of their subordination in the Southwest. Drawing together urban, environmental, and American Indian history, Needham demonstrates how power lines created unequal connections between distant landscapes and how environmental changes associated with suburbanization reached far beyond the metropolitan frontier. Needham also offers a new account of postwar inequality, arguing that residents of the metropolitan

periphery suffered similar patterns of marginalization as those faced in America's inner cities. Telling how coal from Indian lands became the fuel of modernity in the Southwest, *Power Lines* explores the dramatic effects that this energy system has had on the people and environment of the region.

**Marker-assisted selection (MAS) in crop plants** Apr 06 2023

*Markets, Civil Society and Democracy in Kenya* Dec 02 2022 Focuses on three of the most important dimensions of grassroots development and change in the country over the last decade and a half: continuity and transformation in the cereals marketing chain, the centrepiece of World Bank, European Community and USAID efforts during the 1980s and early 1990s to liberalize Kenyan economic institutions on the basis of aid conditionality; the nature and political role of local-level development institutions, before and after the re-emergence of multi-party

politics in 1991-92; and the complex relation between recent political developments and religious organizations.

**Phenotyping at plant and cell levels: The quest for tolerant crop development**

Apr 13 2021

**The Palgrave Handbook of Contemporary Kenya** Mar 13

2021 This volume is a bold attempt to address a comprehensive range of themes and issues relating to contemporary Kenya. It covers independent Kenya's history, society, culture, economics, politics, and environment with great breadth and depth, comprising thirty-four chapters divided into three parts. Part I focuses on independence and the political economy of development, followed by Part II on environment, globalization, gender, and society. Part III examines the external context's impact and implications for Kenya and the role of Kenya in the global political economy.

**Local Power & Politics in Indonesia** May 07 2023

Indonesia is experiencing an

historic and dramatic shift in political and economic power from the centre to the local level. The collapse of the highly centralised Soeharto regime allowed long-repressed local aspirations to come to the fore. The new Indonesian Government then began one of the world's most radical decentralisation programmes, under which extensive powers are being devolved to the district level. In every region and province, diverse popular movements and local claimants to state power are challenging the central authorities. This book is the first comprehensive coverage on decentralisation in Indonesia. It contains contributions from leading academics and policy-makers on a wide range of topics relating to democratisation, devolution and the blossoming of local-level politics.

Complexity, Endogenous Money and Macroeconomic Theory Sep 18 2021 That the chapters in the volume cover such a wide range of important, often fundamental, topics is a proper tribute to

Basil Moore's influence and contributions over his working life. From the foreword by G.C. Harcourt, Jesus College, Cambridge, UK During a distinguished career, Basil Moore has made numerous important contributions to macroeconomics and monetary economics, and is renowned as the progenitor of the horizontalist analysis of endogenous money. More recently, he has embraced complexity theory as part of an ongoing effort to understand macroeconomics as an evolving, path-dependent process. This book celebrates and explores Basil Moore's interests in and contributions to monetary and macroeconomic theory.

Complexity, Endogenous Money and Macroeconomic Theory features original essays by internationally acclaimed and expert authors. It comprises a selection of papers on five distinct but interrelated themes: economic concepts, tools and methodology; complexity, uncertainty and path dependence; the

macroeconomics of endogenous money; the macroeconomics of exogenous interest rates; and unemployment, inflation and the determination of aggregate income. These papers combine to provide a comprehensive methodological and theoretical discussion of the macroeconomics of a monetary production economy. The book will be of interest to professionals and research students in the fields of macroeconomics and monetary economics especially those with an interest in the Post Keynesian approach to analyzing these fields, including the wide audience that has been reached by the contributions of Basil Moore himself.

*The Ubiquitous Siva* Oct 20 2021 John Nemeč examines the beginnings of the non-dual tantric philosophy of the famed Pratyabhijna or "Recognition [of God]" School of tenth-century Kashmir, the tradition most closely associated with Kashmiri Shaivism. In doing so it offers, for the very first time,

a critical edition and annotated translation of a large portion of the first Pratyabhijna text ever composed, the Sivadrsti of Somananda. In an extended introduction, Nemeč argues that the author presents a unique form of non-dualism, a strict pantheism that declares all beings and entities found in the universe to be fully identical with the active and willful god Siva. This view stands in contrast to the philosophically more flexible pantheism of both his disciple and commentator, Utpaladeva, and the very few other Saiva tantric works that were extant in the author's day. Nemeč also argues that the text was written for the author's fellow tantric initiates, not for a wider audience. This can be adduced from the structure of the work, the opponents the author addresses, and various other editorial strategies. Even the author's famous and vociferous arguments against the non-tantric Hindu grammarians may be shown to have been ultimately directed at an

opposing Hindu tantric school that subscribed to many of the grammarians' philosophical views. Included in the volume is a critical edition and annotated translation of the first three (of seven) chapters of the text, along with the corresponding chapters of the commentary. These are the chapters in which Somananda formulates his arguments against opposing tantric authors and schools of thought. None of the materials made available in the present volume has ever been translated into English, apart from a brief rendering of the first chapter that was published without the commentary in 1957. None of the commentary has previously been translated into any language at all.
